

Executive summary 2023

In 2023, there was a decrease in the number of implemented projects by approximately 14%, which corresponds to 150 projects in implementation. This decline can be primarily attributed to the lower success rate of projects funded by grants from GAČR and AZV compared to the previous year 2022. Furthermore, some projects were terminated as part of calls under the Operational Programme Research, Development, and Education for Competitiveness (OP VVV). Financial settlements and reporting took place during 2023, The ratio between national and international projects is approximately 78% national and 22% international

Note: Amount of budget spending include both operating and investment budgets.
