Note: Total users includes users who do not have a language set

Conclusions:

Average of all metrics does not show any significant difference from last year.

Users tend to visit the CEITEC website slightly less in the summer holiday season (July-August)

During January and February we've activated paid promotion for PhD School on Social media, that resulted in boost of all metrics after Christmas Holiday drop.

This also corrected February and March drop that was observed from last year.

Definitions:

Unique users = users who initiated at least one visit. The number of users is not equal to the number of re: Page views = total number of pages viewed

Visits = total visits during a given time period. A visit is the time the user is actively involved in websites, ap All usage data is always associated with a visit

 Press Releases / Articles - Published on CEITEC website by Month

Month	Title	Press Release
January	Six best publications of the last year were awarded CEITEC MU AWARD	1
January	The best of CEITEC MU 2022: What have we achieved together in the past year	
January	EMBO Workshop Eukaryotic RNA Turnover and Viral Biology	
January	Scientists described different reactions to cadmium exposure in tobacco and thale cress	1
January	Helena Peschelová získala Pamětní grant Martiny Roeselové (only in Czech)	
January	Nový diagnostický nástroj umožní diagnostiku mimo laboratoř do 30 minut (only in Czech)	1
January	Tomas Sikola and Jiri Fajkus were awarded by the city of Brno	1
January	The new ADDIT-CE project will revolutionize Alzheimer's disease diagnostic	1
January	INSECTS: Animals with plant telomerase	1
January	The new infertility solution of Ondrej Slaby will move from the laboratory into practice	1
February	CEITEC Masaryk University as a stepping stone for an ERA Chair position in Malta	
February	Happy International Day of Women and Girls in Science	
February	Dutch students from TU Delft and Leiden University visited CEITEC and MUNI	
February	Maximize Your Chances of Getting MSCA Postdoctoral Fellowship Funding	
February	Celebrate Days of Electron Microscopy on the university campus Bohunice	
March	Celebrate MUNI Day with us! Meet colleagues from all over the university while playing sports	
March	What are biomarkers for stress resilience and stress vulnerability?	1
March	Minister Helena Langsdlova visited CEITEC MUNI	1
April	Jaroslav Koca Bridge Fund: Get funding for your interdisciplinary project	
April	Jan Smeringai (Brno PhD Talent awardee) is studying the plasticity and capacity of plant regeneration	
April	Neurovědci z CEITEC MUNI pracují na unikátním výzkumu řeči a jazyka u Parkinsoniků (only in Czech)	
May	Scientists describe how expansin affects plant root growth	1
May	Czech economic and scientific diplomats visited CEITEC MUNI	1
June	Masaryk University's leukaemia drug receives US patent	1
June	CEITEC MUNI hosted the Czech-Slovak conference on strategic management in science	1
June	Pavel Plevka will lead CEITEC MUNI	1
June	Analysis of Czech Genomes for Theranostics has completed its implementation phase	
July	New GDI Starter Kit to enable access across borders to genomic and phenotypic data	1
July	Dalibor Blazek became an EMBO member	1
August	Unlocking the secrets of plant DNA: How evolution shapes telomeres for survival	1
August	Taking care of a brand is not a one-man show, says the new head of communication, Halina Jilkova	

September	Meet CEITEC's newest Research group leader Petr Tesina	
September	Petr Tesina received a prestigious ERC Starting Grant	1
September	The telomere database contributes to the understanding of evolution and allows direct involvement of the broader scientific community in its updates	
September	Scientists have decoded the genome of horseradish	1
September	"Postdocs need a community of colleagues to do the research. And we have that at CEITEC", say the members of the Postdoc Peer Committee	
September	A flagellate parasiting firebugs helps scientists understand the diversity of RNA viruses	
September	We still can't cure Parkinson's disease, but we can significantly reduce its symptoms	
September	European RNA experts passed on their experience to the next generation of scientists at the fifth RNA Summer School at CEITEC MU	
October	Scientists from CEITEC and Masaryk University have contributed to a better understanding of the human RECQ4 protein, which is important for maintaining cell integrity	1
October	The courage to venture into the unknown can be an advantage in a grant strategy	
October	Revolutionizing Genomic Research: Introducing GERONIMO, The User-Friendly ncRNA Discovery Tool	
November	Maternal mental health during pregnancy: how it translates to brain development and child's behaviour	
December	Masaryk University awarded CEITEC scientists for their research under the wings of the MUNI Grant Agency	
December	Computer simulations confirm new insights into phospholipid transport at the cellular level	

Articles or References about CEITEC in 2023

Monitored period: 1. 1. 2023 - 31. 12. 2023

Table 6

Articles / References - Number Published by Month

Month	# Articles / References
January	58
