| **6. In your opinion, what does the teacher excel in? What do you value most in their course or in their approach to teaching? Do you have any recommendations regarding the teacher's lessons or approach to teaching?** |
|---|
| I did not get anything from the seminar course cause of pressure by lecturer side |
| I would like to highly appreciate the course of Alla Kachur. She is a very good teacher, she always helps and explains topics in a way that everyone can understand. She tries to convey information and makes sure that students learn the material. |
| She did well in how she structured the class and took time to explain the course, she made extra time for outside class engagements. |
| Too much stuff to cover in such a short period |
| She (A.K.) has to learn how to teach first. Saying the absolute same words from book doesn't mean that we understand it. She never explained a single thing with the easy way. We had to search internet for the easier explanation, so she helped us on absolute nothing. She acted like she is helping but she didn't do. |
| The teacher's persistence to explain the issues over and over is a quality to admire. The lectures could be improved by making them more practical through solving examples and exercises relating to the seminar questions. |
| We had too much homework and we were not provided with a clear correction at the end of each seminar. I recommend changing the method of correcting the exercises. |
| Recommendation : Be more engaging and engage students most ofthe time since its a tough course, more interaction in class and with students helps in grasping alot of the things taught. Also reply to students and care about explaining things for students to understand not rush to finish the syllabus or assignments. Be easy to students, not overly harsh, most students literally come to class traumatized if they cannot solve a problem. |
| Not good |
| Alla Kachur is an outstanding and very patient teacher. If students had any questions Alla was able to find a time before or after seminars and answer the questions in very clear manner. She had an pure willing to make every student to understand material. So, if you have any questions, just ask and she always will help you. Besides, during seminars, all tasks were solved and explained in step by step to make it clear for everyone. I strongly recommend you to do seminars in Alla group because she knows material excellent. But what's more important, she can explain in a way that you will understand it. |
| I along with a few others felt discriminated by professor Masaryk is a very well-known university for international students in the Czech Republic but the kind of teaching that the teacher provided was disappointing and the last I was expecting was discrimination. |
| Excellent communication |

| --- |
| *Good* |
| *Understanding and helpfullness* |
| *Teacher was well organized and prepared for every lecture. Also it was easy to ask any question and teacher was very helpful. What is more, all requirements were understandable and adequate to fulfill.* |
| *She's really receptive to everyone who doesn't understands one or the other but her method of teaching isn't really that good as you find it difficult to understand what she teaches especially with Mathematical problems* |
| *Good* |
| *The knowledge she have about the subject, so as a fresh perspective of the usage of the shared knowledge Using some.integration with the students at the beginning of the course may improve participation, is a hard subjetc for students, providing them with confidence will make them feel more confident when participating* |
| *The teacher excel in the knowledge of course. Composed and performs well. The teacher is good and her approach to teaching is great.* |
| *She has a vast knowledge of macroeconomics. and really helpful for students in all aspects. She always welcomes students, they can knock on her anytime and take advice, guidance, and solution to their queries regarding course. Time spam for this course very shirt as compare their theoratical knowledge require for this course.* |
| *Excellent teaching skills and always happy to help the students to understand the course material in a better way.* |
| *she is nice* |
| *Alla Kachur is an amazing teacher regarding all the aspects. Yes, the course is pretty hard, and even after her explanation there is a lot of questions just because many students don't find it useful in their career. But Alla was always trying to explain everything and never said anything bad towards our knowledge.* |
| *No* |

| *Not good* |
| *Good* |
| *In my opinion, this course is really hard and it is impossible for a lot of students to study it just for one semester. Most of the international students don't have macroeconomics background at all so it is a huge challenge to study the macroeconomics in such deep details or at least it would be nice if the teacher can give the opportunity to close that subject with E grade if the student have been working hard for the whole semester. Otherwise at it will be good at least lower the passing grade till 50%.* |
| *I only met him during exams and was surprised he's taking the course as a lecturer. He was a complete stranger to me.* |

6. In your opinion, what does the teacher excel in? What do you value most in their course or in their approach to teaching? Do you have any recommendations regarding the teacher's lessons or approach to teaching?
In my personal and humble opinion, the teacher presented an utmost lack of professionalism, communication, and empathy towards the students. A tremendous amount of self-righteousness and lack of respect toward her students. As a student of a Master's program, i expect to be treated differently, as we are educated people and have "minimal intelligence". If i was a bachelor's student right out of high school then yes such an approach might be appropriate. Nevertheless, that's not what anyone wishes for to be talked to, lectured, or even looked at "down degrading looks", as we are different species that her, separating us according to our race, origin, and her personal liking. At the end of this i wish the university to better consider the qualifications of such teachers before imposing them on us.
She was always well prepared and answered students questions in a accurate way Mixing practical examples for students to do during the lecture may help a better understanding of the topic
I would like to highly appreciate the course of Alla Kachur. She is a very good teacher, she always helps and explains topics in a way that everyone can understand. She tries to convey information and makes sure that students learn the material.
The lectures were pretty interesting but I feel bored cause of teacher's method of convey the sources
The teacher excel in the knowledge of course. Composed and performs well. The teacher is good and her approach to teaching is great.
Too much stuff to cover in such a short period
I don't remember learning anything from her lectures or what she said. We had to check internet sources and other literatures after the lecture, because her teaching methods are very complicated. She needs to reconsider being a teacher, cause she is not good at it, absolutely not.
the course is heavy and demanding, I recommend teaching it at a slower pace
The great explanation of the lecture, always here to help. But the only problem is that the teacher is running around you in the tests/exams which puts you under the stress and it is impossible to concentrate in that conditions. It is great when the teacher wants everything to be fair but the observation could be done not in such insane manner.
Not good
Weekly test was an amazing approach to learn about a topic, also, the semestral project is a good idea so that students understand the concepts in detail. Use of socrative game is nice for revision, nice approach
Looking at the knowledge acquired in this class, using examination as the highest means of assessment is not a fair assessment.
Excellent teaching skills and always happy to help the students to understand the course material in a better way.
Minimum grade requirement from final exam was hard for us.
As I already mentioned, Alla Kachur is a very talented professor, both her professional and personal characteristics are very high developed. But I think the main problem of the course is the man who created this course, because I heard a lot of Czech and previous international students complaining about him.
She is nice
Good
She seems to know the stuff but unable to express it and shes most often impatient and rude at times.
I would like to thanks and highly estimate our teacher Alla Kachur. She was doing her best to teach students in a very clear way that all students could understand material. She was explaining material intelligibly. Lectures were interactive and creative. We regularly did Socrative and Ropots to check how students understood material. There always were space for questions. Alla was very attentive and responsive. If we had any questions and were shy to ask during lecture we could ask her privately and she always found time to explain everything again to students who were in need. Besides, students could ask Professor professional advice and she always helped for instance with job or career issues. It was priceless. I am very grateful for all knowledge and very kind attitude to students.
I along with a few others felt discriminated by the professor. Masaryk is a very well-known university for international students in the Czech Republic but the kind of teaching that the teacher provided was disappointing and the last I was expecting was discrimination.
Understanding and helpfullness
She tries a lot to make student understand but student often didn't understand because of her accent. But she is a good teacher.

6. In your opinion, what does the teacher excel in? What do you value most in their course or in their approach to teaching? Do you have any recommendations regarding the teacher's lessons or approach to teaching?

I like his approach of teaching and he tries hard to make the student understand the subject at hand. He has good communication skills

It was an interesting class that covered the area of European rail policy and the railway system works in comparison with different countries.

He is a practical person, he made the theory interesting because of his experience.

| --- |
| *Reading* |
| *Teacher was really helpful and nice but the course for master degree completely unnecessary.* |
| *The teacher is awesome! Encourages interactive classes and seminars, ready and always available to answer any concerns. I valued the method of giving assignments to work on, then do the peer assesment, it was very informative.* |
| *All was good, teacher was high professinal and competent, however,the system of checking attendance was strange and incurred some issues.* |
| *Good* |
| *I had high expectations of the course because I had no previous knowledge of academic writing. However, I do not feel as if I learned a lot from this course. I struggled in working on my projects and assignments. The professor was friendly and tried his best to explain everything but the content of the course was not enough.* |
| *He was very approachable. I think this is a very important thing to have as a teacher. He was also clear with his explanations. His teaching materials were very helpful for our learning.* |
| *I think attendance in lectures must be voluntary* |
| *Good teacher* |
