| 6. In your opinion, what does the teacher excel in? What do you value most in their course or in their approach to teaching? Do you have any recommendations regarding the teacher's lessons or approach to teaching? |
|---|
| *Communication with students and guiding students to solve problems. Teaching is also student centered approach as all students are involved in lessons.* |
| *The Teacher excels in breaking things down to our level of understanding and demonstrates exceptional knowledge of the course.* |
| *Good* |
| *Nice personality* |
| *The overall course structure was okay and the information in IS was also well structured and clear, however, professor's speech and teaching skills have to be improved because sometimes it seems that professor scares students and scare to answer questions in the class (via email all was okay). Also the way how the material is delivered has to be improved becuase it was very complicated to hear for 2 hours such monotonous speech and poor explanation, but i think it is because professor has to imporve his public presentation skills and be more confident and strict with students. However, i appreciated the manner how the professor communicates with students via emails and interesting extra tasks (economic experiments and surveys) where students can participate.* |
| *He needs an assistant to be able to perform better in the class. Trying to teach online and in the class at the same time is challanging.* |
| *It is clear that teacher has knowledge, but it was also clear during the lessons that he is new. In my opinion he should be a little bit more strict to the students.* |
| *He´s a really good professor* |
| *Mr. Luca Fumarco was well prepared for his students. We clearly understood his lectures and we had no problems with this course. I believe that his methodology will create new paths in education.* |

The lecturer and lectures were overall good.

Very structured course and well-prepaid professor for every class. Moreover, professor treated to speak more and express opinion which is very useful for this course.
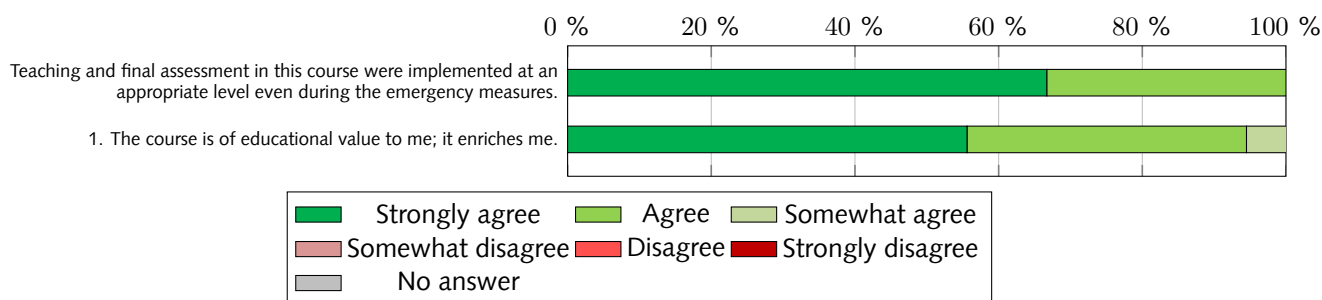

I learned a lot from her.

one of my best lecturers, very accommodating and cooperative when it comes to classroom activities.

This course is one of the best I have ever had, it is just amazing how little we usually know about presentation skills.

The best course of the semester. Very interactive and a lot to learn about eye contact and presenting and top-notch presentation skills in general

He did very great in explanations and making us understand the subject. It was also very interractive.

What I value most will be the teaching approach which was a very interactive class and presenting concepts from known to unknown and lots of assignments which makes it easier for students to understand. I think the assignments in this course was too much and could be reduced to make students have time for other lessons.

The class was super dinamic, and interesting for our thesis in the future

Lecturers approach was good and insightful. I am glad I took this class

Horrible teacher. Has racist and sarcastic behavior towards the students. Very childish and arrogant. He needs to learn manners.

What I value most will be the teaching approach which was a very interactive class and presenting concepts from known to unknown and lots of assignments which makes it easier for students to understand. I think the assignments in this course was too much and could be reduced to make students have time for other lessons.

The teacher's practical way of teaching and in depth knowledge of the course is very commendable!
