Friendly environment

WE'RE LEADERS  
IN SCIENCE

We are among leading research institutions in the Czech Republic.

We focus on issues such as air pollution, healthcare economics and circular economy.

We keep up with the latest trends in education and involve students in research.

## Prize for innovation awarded to scientists from ECON MUNI

The MUNI Innovation Award went to Vilém Pařil, Martin Šauer and Daniel Seidenglanz (in memoriam) from the Faculty of Economics and Administration. Using data on SIM card movements, they were able to find out how many people regularly travel between Prague, Brno, and Ostrava. Their research can be used, for example, by the Ministry of Transport or Czech Railways.

13 MAR

## University can help public administration to be modern and efficient, says Filip Hruza

Cooperation between scientists and public administration institutions is crucial for improving their functioning, says Filip Hruza from the Institute of Public Administration. The Institute has been operating at the Faculty of Economics and Administration since 2003, and during its existence it has been able to advise public administration officials, city councillors as well as ministries. Those interested in cooperation or expertise can reach out to the Institute.

31 MAR

## Future transportation will be shaped by technologies as well as sustainability and social equity, says Sorath Shah

A new expert on transport economics will be joining the Institute for Transport Economics, Geography and Policy (ITREGEP) thanks to ERA Fellowship. The prestigious grant was awarded to Sorath Shah who will work under the supervision of Zdeněk Tomeš. During her two-year stay at the Faculty of Economics and Administration, she will focus on European micromobility systems such as bike or e-scooter sharing.

12 APR

## Michal Kvasnička: The new app knows the locations of frequent traffic accidents. But it won't replace police analysts.

A new app reveals the locations of frequent serious traffic accidents on Czech roads. The software, developed by scientists from the Faculty of Economics and Administration of MU in cooperation with Charles University will help traffic police officers to more easily implement preventive measures. Michal Kvasnička, its main designer, talks about why the application is needed and how it is unique.

15 MAY

## ECON MUNI research team proposes measures to improve the quality of air and life in Brno

What do we breathe in Brno and how can we make the air cleaner in the future? The team of Vilém Pařil and Dominika Tóthová, in cooperation with the City of Brno, will propose measures for cleaner air and, consequently, better quality of life in the city. In recent weeks, the scientists have met several times with representatives of the city's districts to hear their comments.
