

## **Associate Dean (International), Huddersfield Business School**

My name is John Anchor and I am Professor of International Strategy in the University of Huddersfield. My research is focused on emerging markets, especially in Central and Eastern Europe and the Middle East. Studies have been undertaken of students' earnings expectations in Central Europe and political risk assessment and strategic planning use in the Middle East. The main research question which I am seeking to answer is "do emerging markets make a difference to organisational conduct and performance and/or individual behaviour?".
