

# Data scientist - internship!

**Would you like to get valuable practical experience and have some fun along the way? Apply for an IT internship in Skypicker - one of the coolest Czech startups with a globally successful product!**

Skypicker is a Brno-based tech startup building a global flights directory, allowing customers to find and book the best and cheapest flights. We are growing like crazy and expecting even more. To achieve that, we want to have a great team of motivated and fun individuals, who are not scared of a challenge or of tasks they may not have encountered before.

Moreover, we have loads of data (almost all airline schedules and prices), full of potential. If you like playing magic with data and looking for ways how to make practical use of them, you may find this job quite exciting! We are currently setting up a team of best data scientists who enjoy both parties and expert conferences. Interested? Then read on!

## Example of projects you could work on:

- Improve flight search results filtering
- Global demand modelling
- Yield management algorithm
- More secret projects (running on hundred-server cluster)

## We want you to have:

- Good knowledge of Python/SQL
- Some experience with scikit-learn, Pandas, statsmodel, TensorFlow or similar tools
- Some projects you can present us and thus show your skill and experience
- Good command of English
- Reliability

## We offer:

- A unique experience of growing with one of the hottest Czech startups operating globally
- A very friendly work environment (pet friendly, too)
- A dedicated and motivated team
- Free refreshments (fruit, soft drinks, Red bulls...)

If you like what you're reading, let us know that by sending your CV to **Nina Paulisová** ([nina.paulisova@skypicker.com](mailto:nina.paulisova@skypicker.com))!
