

## QA specialist - internship

**Would you like to get valuable QA practical experience and have some fun along the way? Apply for an IT internship in Kiwi.com - one of the coolest Czech startups with a globally successful product!**

### **What would you do**

- Test our products
- Identify and track bugs and issues on our website
- Review website and apps for consistency and functionality
- Apply industry best practices & processes to ensure high quality of websites and mobile apps
- Create test cases and procedures for proper manual and automatic testing
- Communicate a lot with our project managers and developers

### **We want you to**

- Have experience with testing web applications across multiple browsers and systems
- Have strong attention to detail
- Be experienced PC and smartphone user
- Be able to work independently and in team based environment
- Think outside the box
- Be willing to learn new skills

### **Plus, it would be great if**

- You have basic programming knowledge to understand our processes more easily and to be able to automate some of your work

### **We offer**

- Experience the unique spirit of one of the most promising Czech startup companies
- Very friendly work environment (dogs are welcome, too)
- Free refreshments (coffee, fruits, soft drinks...)
