

Production Support Developer - Brno

Start your career and gain commercial experience in programming and grow to seasoned and skilled developer. FNZ offers various paths that you can take from here

Your main responsibilities will be:

- Investigation of errors in live high-end platforms
- Researching and fixing defects based on description
- Developing code, scripts, schemas required to solve complex technical issues
- Investigating problems on databases, web and application servers
- Dealing with performance issues
- Communication with Production Support Analysts and Testers
- Automation of manual processes within Production support (CSI)
- Working in a group of highly skilled support developers to resolve production issues

What experience you should have:

- Good understanding of OOP and ability to debug (at least from school projects)
- All our platforms are built on Microsoft technologies so experience with C# and ASP.NET or VB.NET is ideal to have
- At least basics in MS SQL Database
- Willingness to learn new things is important as there is a lot to learn and master
- Logical thinking is crucial and you should also enjoy solving puzzles

We offer/Opportunities:

- You will work in international teams with professionals from all around the world
- Your growth will be supported by training courses, certifications and regular knowledge-sharing lessons
- Modern offices right in the centre of Brno
- Relaxed atmosphere (with Friday beers)
- 26 days of vacation
- Meal vouchers, free breakfasts, cereals, toasts, coffee, tea and fruit
