

In our publication, we focus on the most popular sports games, which are taught at our faculty (FSpS MU). There are eight collective games: basketball, baseball, floorball, football, handball, ice hockey, softball, tennis and volleyball. Our publication is based on the lectures of each subject teaching Theory and didactics of sports games, where they are respected by past experience and knowledge of existing theories verified. We mainly on disclosure of material to help students improve study preparation, to expand knowledge of the theory taught us sports and bring students to the publication, where in each chapter to find comprehensive information on the sport. Selected Chapters, together with the theoretical form first preview of the current approach of individual teachers to didactics and the theory of games and are just learning the basic material to obtain knowledge of the selected sports games.
