Masaryk University Library Regulations

Directive 14/05

This directive is issued pursuant to para 1 *Chapter* 10 Act 111/1998 on Higher Education Institutions and modifications of other Acts (the Higher Education Act).

Article 1
Scope of the Directive

The Masaryk University Library Regulations (hereinafter referred to as "MU Regulations") stipulate the principles and standards of library operation of the Masaryk University (hereinafter referred to as "MU") pursuant to the Act 257/2001 on libraries and operation terms and conditions for public library and information services (hereinafter referred to as "Library Act").

Article 2
MU Library System

1. The MU Library System consists of the central faculty libraries and MU elements' libraries as listed in Annex 1 (hereinafter referred to as "MU Libraries"). The libraries may be further structured down to library divisions.

2. The MU Libraries provide library and information services as deemed necessary to meet the information demand of the particular MU offices and departments. The MU Libraries operation comply the MU Libraries operation provisions (hereinafter referred to as "MU Libraries Provisions") issued by the Deans or directors of the elements pursuant to the MU Regulations.

3. The MU library system operation coordination is under the responsibility of Library Information Centre of the MU Institute of Computer Science (hereinafter referred to as "KIC") particularly in codification of document processing including compilation of a comprehensive catalogue, acquisition and utilisation of electronic information sources, development and records of library proficiency projects.

Název	**01 Pocta Leoši Janáčkovi**
Title	Homage to Leoš Janáček
Description	A collection of works of art that was part of "Hommage à Leoš Janáček", an exhibition composed of contributions by leading artists from all over Europe as their responses to the music written by this outstanding Czech composer. The works of art were either made expressly for the exhibition or created at an earlier date; they were later presented by the artists to the newly founded Masaryk University Art Museum.

Otakar Borůvka

* 10. 5. 1899 Uherský Ostroh
† 22. 7. 1995 Brno

📄 **DML-CZ: Otakar Borůvka digital archive**

Description: Otakar Borůvka (1899-1995) is one of the most prominent Czech mathematicians of the 20th century. He spent most of his professional life in Brno (working at Masaryk University and at the Mathematical Institute of the Academy of Sciences of the Czech Republic - AV ČR). His extensive scientific work, i.e. 85 original scientific works and 5 monographs which have been translated into many languages, covers 5 mathematical areas: classical mathematical analysis, graph theory, differential geometry, algebra and theory of differential equations. Not only did he contribute significantly to each of these mathematical fields, but he also established scientific schools which were continued by his students and his students' students at Masaryk University and elsewhere.

Borůvka's works on classical analysis date mainly from the period 1923 -- 1925. In his paper "On a minimal problem" (1926) he was a pioneer in transport problems, the area that many years later became an important part of the theory of graphs. In his momentous works on projective differential geometry O. Borůvka was the first who studied analytic correspondences between two projective planes. Borůvka was also one of the main founders of the basic conception of general algebra. He established the theory of groupoids: his basic notions in this field made it possible to form deep and far reaching algebraic theories. After WW2 the essential part of Borůvka's work deals with differential equations, where he developed the original and fruitful theory of global transformations of linear differential equations of the second order.

Otakar Borůvka was not only excellent scientist but also an outstanding pedagogue, well-known by his well prepared lectures and winning his auditors by his tireless diligence.

The great importance of Borůvka's achievements has had wide response in a number of honours awarded to him in Czechoslovakia and abroad, and in numerous invitations to lecture at foreign universities and conferences. His contribution to the world science will never be forgotten.

THE ZERO-COMPLETION OF A MEDIAN ALGEBRA

HANS-JÜRGEN BANDELT, Hamburg, GERASIMOS C. MELETIOU, Arta

(Received May 15, 1989)

A distributive lattice $(L, \wedge, \vee)$ gives rise to a self-dual symmetric ternary operation, viz.,

$(*)$ $\qquad x, y, z := (xyz) := (x \wedge y) \vee (x \wedge z) \vee (y \wedge z),$

named the median operation of L. This operation satisfies the identities

$(xxy) = x$

$(vw(xyz)) = ((vwx)(vwy)z).$

A *median algebra* M is a symmetric ternary algebra satisfying these two identities. Such an algebra is close to a distributive lattice: for any element a of M one obtains a *median semilattice* $(M, \wedge)$ with partial join $\vee$ (distributing over $\wedge$) and least element a via

$x \wedge y := (xay)$

such that the median of any x, y, z is recovered by the expression $(*)$. In general, $(M, \wedge, \vee)$ is not a lattice, but still admits a representation as a lower set of some distributive lattice.

Typically, a property of a distributive lattice L that is invariant under interchanging meet and join is expressible merely in terms of the median operation. Most concepts, though, are not self-dual. For instance, the *translational hull* ΩL of $(L, \wedge, \vee)$ usually refers to the meet $\wedge$. It consists of all $\wedge$-*translations* of L, i.e., mappings $\tau: L \to L$ satisfying

$\tau(x \wedge y) = x \wedge \tau y$ for all $x, y \in L$.

ISSN: 0524-6881
Publisher: Masarykova univerzita, Filozofická fakulta, Brno
Published: 2009-present

Description: Časopis Brno Studies in English, ISSN 0524-6881, je recenzovaný mezinárodní časopis publikující články z oblasti anglistiky a amerikanistiky. Vychází od roku 2009 dvakrát ročně. Je pokračováním stejnojmenného periodika založeného v roce 1959, jehož prvních jedenáct svazků vyšlo v rámci edice Spisy Filozofické fakulty Univerzity J. E. Purkyně v Brně (v letech 1959-1976), poté vycházelo v rámci Sborníku prací filozofické fakulty brněnské univerzity, řady K, germanisticko-anglistické, ISSN 0231-5351 (1979-1994) a dále jako řada S, anglistická, ISSN 1211-1791 (1995-2008).

TROLLING IN ONLINE DISCUSSIONS: FROM PROVOCATION TO COMMUNITY-BUILDING

Abstract
This paper focuses on the practice of trolling in online discussions. Working with a corpus taken from the websites of three British newspapers, it examines how users themselves define trolling; comparison with a previous study (Hardaker 2010) suggests that users' definitions of trolling may vary depending on the discussion topic. The paper then presents a qualitative pragmatic analysis of one discussion which was attacked by trolls. After examining how trolls announce their presence and attempt to provoke reactions from core community members, the article then moves on to discuss several salient aspects of the antagonistic facework used during the ensuing 'flame war'. Finally, the article turns to address the social dimension of trolling, outlining how a practice which is generally considered destructive can also paradoxically have constructive effects, helping to build new communities and strengthen existing ones.

6. Open Access at MU

OA at MU

2006   **MU e-theses & dissertations in OA**

2010   **MU signed Berlin Declaration**

2011   **MU green OA mandate adopted**

2012   **MU Institutional repository fully operational**

2013   **great OA-dispute –> green OA mandate relaxed, voluntary deposit policy instead…**

- …OA progress suspended at MU
- **national OA strategy badly missing!**

Thank you for your attention!
