

Faculty of Science Masaryk University Directive No. 1/2019**System of Positions and Job Titles
at the Faculty of Science MU**

(effective March 1, 2020)

In accordance with Act No. 111/1998 Sb., on Higher Education Institutions and the Modification and Amendment of Other Acts (Higher Education Act), as subsequently amended (hereinafter referred to as the "Higher Education Act"), I hereby issue this Directive:

Section 1
Initial provisions

- (1) This Directive is issued to implement the rules given by the MU Job Catalogue no. 3/2018 and specifies the system of positions and job titles for employees at the Faculty of Science Masaryk University (hereinafter referred to as the Faculty).
- (2) The Directive defines the characteristics of work activities associated with a respective position, minimum qualification requirements, and procedure for assignment of employees to individual positions. This refinement is prepared in accordance with MU Job Catalogue no. 3/2018 and adjusted according to the needs of the Faculty of Science.
- (3) Provisions of this Directive apply to the employees whose main part of work is carried out at the Faculty, and whose employment relationship and associated matters are within the purview of the Dean of the Faculty or the Faculty Bursar.
- (4) This Directive does not apply to a position of a Dean, Faculty bursar, vice Dean, Head of a department, visiting professor, adjunct professor.
- (5) The Head of the workplace is defined, for this Directive, as the direct superior of the employee as per the organisation regulations of the department/other workplace. They are the Head of the Institute of the Physics of the Earth, the Head of the Botanical Garden, and the Faculty Bursar.

Section 2
Definitions of Main Terms

- (1) Terms used in this Directive and related annexes are defined as follows:
 - a) Position is meant as a generic definition of the main type of work, including essential requirements, competency models, and scope of general job duties.
 - b) Job title is meant as a specification of the position including a specific set of job duties, requirements, and responsibilities. These specifications are defined by the superior in the job description. The job title is also specified in the employment contract.
 - c) Length of relevant work experience is meant as a length of work experience before starting the position by being employed and performing similar work activities in the relevant field of expertise after obtaining the Ph.D. degree.
 - d) Characteristic of work activities is meant as a specification of the job purpose and main duties associated with the position.
 - e) Duties are meant as both general and specific work tasks to be performed by the employee.

- f) Competency model is meant as an overview of necessary skills, knowledge, or habits needed for successful job performance. These requirements stipulate a desirable level of work performance. They shall be used as a guide in the process of selection of a new employee, employee performance management, or further training & development. The model specified in the Annexes no. 5 and 6 can be expanded on by the superior, and additional competencies may be added.

Section 3 Structure of Employees

- (1) Employees are, based on the type of work performed, divided into the following groups:
- a) Academic employees – employees who carry out educational, research & development or other creative duties at the Faculty. These typically include lecturers, assistant professors, associate professors, and professors.
- Researchers can be defined as academic employees in case they also perform continuous pedagogical duty in the form of thesis supervision. Such positions are generally created at the workplaces that are part of the Roadmap of Large Infrastructures for Research, Experimental Development and Innovation of the Czech Republic as per the valid Governmental Act. Defining such a position is subject to prior approval of the Dean.
- b) Researchers – non-academic employees who carry out research & development duties related to ongoing research tasks of the department or Faculty.
- c) Support staff – non-academic employees who perform specialized and technical duties or operations at the departmental or at the faculty level.
These employees ensure:
- i. preparation and carrying out research tasks and related tasks,
 - ii. administrative and operational duties at the departments, other workplaces, or the Dean's office.

Section 4 Assignment of Employees to Positions

- (1) The decision on the number of positions needed at the department is in the responsibility of the Heads of departments/other workplaces. The number of job titles is decided with respect to the effective fulfilment of educational, research & development or operational duties needed at the department while respecting the Faculty Career Code.
- (2) Employee's assignment to an appropriate position is proposed by the Head of the department/other workplace. HR department reviews whether the required criteria for assignment to the position are met. Afterwards, the proposal is submitted for the Dean's approval (academic employees) or the Faculty Bursar's approval (non-academic employees). Exceptions are granted by the Dean or the Faculty Bursar upon a written request.
- (3) The overview of positions and job titles to be used for academic employees and researchers at the Faculty, including wage category in accordance with MU Job Catalogue, is provided in the Annex No. 1. Employees are assigned positions based on the type of work (prevalent tasks), qualification requirements, additional prerequisites, relevant work experience, and complexity of duties. These profiles are defined in the Annex No. 2 – Position profiles for academic employees and researchers.

For the adjunct professor position, rules given in the Masaryk University Selection Procedure Regulations are to be followed. Assigning an adjunct professor to the job title of an associate professor or professor is not allowed.

- (4) An employee can be assigned to the position of a PostDoc II or PostDoc III provided that he/she had earned a doctorate degree no more than 8 years before the selection procedure for the open position was announced. The maximal duration of an assignment to these positions can be 6 years. The MU graduates may be hired for the PostDoc II position, provided they completed their first postdoctoral assignment with a minimal 2 years duration outside of the MU.
- (5) The overview of positions to be used for support staff at the Faculty is provided in the Annex No. 3.
The overview of typically used job titles including the position profiles (main characteristics), is provided in the Annex No. 4.
Both, relevant job titles (related to different work activities performed) and applicable wage category in accordance with MU Job Catalogue, are listed for each position. Employees are assigned positions based on the minimal level of education, type of work (prevalent tasks), and complexity of duties described in the Annex No. 4.

With regard to the fact that duties carried out by support staff may be specific and may vary across the workplaces, the detailed requirements for qualifications, English proficiency, or length of work experience are stated in the actual job posting as per the specific needs of the workplace.

The Head of the department/other workplace may under exceptional circumstances propose to assign the employee to higher-wage category or the position with job title that is listed elsewhere in Annex No. 4 due to specific needs of the workplace or requirements for the position when the complexity of duties to be carried out is higher than at the usual assignment (e.g. role of deputy Head, research project management). They can further propose a new job title to be created. The proposal for employee's assignment to an appropriate position is handled as described in part 2 of this section.

- (6) The superior prepares a job description for new hires or employees with a change of the position and acquaints the employee with its content. The superior is obliged to submit this document to the Faculty HR department without delay.
- (7) Job description templates are provided [online on the Faculty HR department's section of the internal Employee Portal](#). The superior shall complete the form with specific tasks performed and shall fill in respective parts that are in italics.
- (8) In justified cases (e.g., project management needs), the job description can be further detailed in a written form.

Section 5 Management-level Positions

- (1) The system of management-level positions and job titles, including their key duties, is specified in the Faculty Organisation Rules, eventually in the department organisation regulations. Employees are assigned the corresponding position Manager based on the level of complexity of their duties, responsibility, and workplace's agenda. When academic employees also carry out the superior positions, their primary academic assignment remains unchanged.

Section 6
Temporary Provisions

- (1) This Directive is binding for new employees hired after the effective date of this Directive.
- (2) The procedure for assigning current employees into a new structure of positions and job titles in accordance with this Directive will be provided in a separate Dean´s instruction.

Section 7
Concluding Provisions

- (1) Interpretation of this Directive and its updates are the responsibility of the Head of the HR department.
- (2) Verification of compliance with this Directive is the responsibility of the Faculty Bursar.
- (3) Following annexes are an integral part of this Directive:

No. 1 - System of Positions and Job Titles for Academic Employees and Researchers

No. 2 - Position Profiles for Academic Employees and Researchers

No. 3 - System of Positions for Support Staff

No. 4 - Position Profiles and Job Titles for Support Staff

No. 5 - Competency Model for Academic Employees and Researchers

No. 6 - Competency Model for Support Staff

- (4) This Directive is valid from the day of publishing and enters into force from March 1, 2020.

Brno, February 13, 2020

Assoc. Prof. Mgr. Tomáš Kašparovský, Ph.D.
Dean

Annex No. 4 Position Profiles and Job Titles for Support Staff

DEPARTMENTS: Support Staff – Research

Position	Wage Categ.	Job Titles	Min. Level of Education	Job Purpose	Characteristic of Work Tasks Corresponding to Wage Category	Main Duties
TECHNICIAN	4	Technician Laboratory Technician	Secondary Vocational School / High School	Technical and other tasks related to realisation of research activities of the workplace – usually preparation of research activities and application of <i>scientific concepts and operational methods of respective scientific domain</i> .	Performance of routine, simpler technical/laboratory tasks according to instructions of researchers and established procedures. Carrying out various operational, technical or related administrative tasks.	In line with research and development activities of the workplace, mainly: *preparation and collection of samples/material as per the relevant methods and procedures *carrying out routine tests/experiments in line with scientific methods
	5	Technician Laboratory Technician Sampling Technician	High School with leaving examination certification	These tasks are usually carried out in line with the instructions given by the researchers and following the scientific domain-related operating procedures. Employees also ensure the operations of the research facilities and preparation of the workplace for educational and research activities.	Performance of comprehensive technical/laboratory tasks that are important parts of broader processes, in line with operating standards and given directions, with the option to select the solution and procedure. Carrying out of various operational, technical or related administrative tasks.	*data processing including basic data analysis and outputs/reports *installation, operation, maintaining and reparation of research assets used in laboratory or in fieldwork *administrative tasks related to operations of the technical assets at the workplace.
	6	Technician Laboratory Technician	University (typically) / High School with leaving examination certification + adequate work experience	Employees may also be involved in educational activities of the workplace – students’ supervision in the laboratory, assistance in the seminars in form of demonstration of laboratory methods, preparation of working instructions/ tools for seminars, induction training on usage of laboratory equipment and instruments, collections’ register. (as per the needs and superior’s instructions). Differentiation of the job titles: Laboratory Technician carries out laboratory tasks (as per instructions and standard operating procedures) or samples analysis. Technician carries out various tasks that help to ensure operations of research or performs the fieldwork.	Independent performance of specialized agendas related to coordination of laboratory’s operation or technical equipment, including the coordination of processes and tasks, set-up of new methodologies or procedure standards. <i>Assignment to these positions is typical for the research infrastructures / large departments for which it is efficient to establish a separate laboratory coordination role in line with the scope of work and operational needs (otherwise such tasks can be split within the assignment in the wage category no. 5).</i>	To ensure the proper functioning of the research facility: *independent administration of laboratory/research facilities including the quality, operations, service and further development *coordination of work tasks of other technicians including the OHS and their methodological supervision *optimisation of the operating procedures for usage of research assets *partially also carrying out the ordinary tasks of technicians
Position	Wage Categ.	Job Titles	Min. Level of Education	Job Purpose	Characteristic of Work Tasks Corresponding with Wage Category	Main Duties

SPECIALIST	Specialist II	6	Specialist Programmer Information Analyst	<p>University (typically) / High School with leaving examination certification provided particular specialisation and extensive work experience</p>	<p>Performance of specialized/expert tasks in search activities of the workplace, related to application of scientific concepts and complex methods related to particular scientific domain or their further development, strengthening of expertise.</p> <p>Employees are involved in comprehensive analyses, development of new concepts and techniques supporting the realisation of research activities or used operational methods, with the aim to enhance the research assets or outcomes, in close cooperation with researchers or independently.</p>	<p>Independent performance of complex specialized/expert tasks in the laboratory or technical ones, with option to set-up new procedures, providing a methodological supervision to technicians.</p> <p>Performing partial creative tasks, which are key parts of the specialized research activities.</p>	<p>In line with domain/specialisation, mainly:</p> <ul style="list-style-type: none"> *to carry out expert technical agendas independently, including preparation of materials *to perform measurements on specialized equipment including technical assistance, testing of proposed procedures *comprehensive laboratory tasks and experiments including data preparation or analysis
	Specialist III	7	Specialist Programmer Analyst	<p>University</p>	<p>To perform such tasks, it is necessary to continuously deepen the knowledge of actual scientific findings and methods in the respective domain or advanced technological procedures and their application.</p>	<p>Performance of expert and complex technician/laboratory tasks including the optimisation of procedures and solutions. Performance of methodological / conceptual tasks and creative (development) tasks carried out through a manner and with outputs not specified in advance.</p>	<ul style="list-style-type: none"> *to programme/develop applications usable in research activities *data processing and advanced data analysis including preparation of reports *development of new methods/ procedures and their validation

DEPARTMENTS: Support Staff – Administration & Operations

	Position	Wage Categ.	Job Titles	Min. Level of Education	Job Purpose	Characteristic of Work Tasks Corresponding with Wage Category	Main Duties	
WORKER	WORKER I	1	Cleaning Staff Glass Washer	Primary School	Performance of routine manual tasks that are important for the maintenance of premises or equipment.	Performance of auxiliary and less qualified repetitive tasks, in accordance with defined procedures.	Due to diversity of works performed at these positions, duties of the particular position (job title) are specified in employee’s job description, in line with the administrative and operational needs of the Department.	
OFFICER	OFFICER II	4	Administrative Assistant	High School with leaving examination certification	Performance of various administrative tasks important for the proper operations of the Department, conducted in line with agendas of the Dean's Office. Tasks are carried out in accordance with established methodological procedures and in close cooperation/ under the guidance of relevant Dean's Office workplace / Department Bursar.	Performance of repetitive administrative and operational tasks according to established procedures.		
	OFFICER III	5	Secretary (complex admin tasks) Officer (in specific domain/s) Project Administrator	High School with leaving examination certification		Performance of broader administrative, economic or operational activities or preparation and administration of documents for specialized agendas, in accordance with defined procedures.		
	OFFICER IV	6	Promotion Officer Marketing Assistant	University	Administration and coordination of specialized agendas in the area of promotion of education and research.	Independent performance of administrative tasks and partial creative activities.		
SPECIALIST	SPECIALIST I	5	ICT Technician	High School with leaving examination certification	Performance of various specialized tasks that are necessary for securing or coordination of economic, administrative, technological and other agendas at the Department. These activities are carried out in close cooperation with the relevant Dean's Office workplace and in accordance with methodological procedures. <i>These positions are established based on operational needs of the Department, usually created when conducting large research projects.</i>	Performance of specialized tasks of operational nature, which are important parts of the agenda provided by the workplace, according to standard operating procedures.		
	SPECIALIST II	6	ICT Administrator Project Financial Manager	University		Independent performance of specialized tasks that are the core parts of specialized agendas, including partial coordination of activities or selection of procedures and solutions.		
	SPECIALIST III	7	Project Coordinator Infrastructure Coordinator Public Tender Coordinator	University		Performance of specialized/system-related tasks lined to comprehensive delivery and coordination of specialized agendas that are performed in an unspecified manner/with unspecified outputs.		
MANAGER	MANAGER I	7	Department Bursar	University	Methodological coordination of administrative, technical and economic agendas across the Department, including their implementation and compliance, in close cooperation with the Faculty Bursar and the Dean's Office.	Complex coordination of entrusted agendas and related processes and systems across the Department, including the option to select and optimize procedures and solutions, in accordance with the methodical guidelines of the Dean's Office workplaces.		Duties of this position are specified in employee’s job description, in line with the Organisation Rules of the Faculty/Department.

DEAN ´S OFFICE: Support Staff - Administration & Operations

Annex No. 5 Competency Model for Academic Employees and Researchers

Competency model introduces an overview of recommended key competencies (skills, knowledge, or attitudes) that are needed for successful job performance across positions performed by academic employees and researchers.

Essential prerequisites for a work performance are qualification requirements stated in Annex no. 2 of this Directive - Position Profiles. For positions of an associate professor and professor, additional specific requirements in pedagogical, profession and research area are defined in the MU document (CZ) [Formální náležitosti k habilitačnímu a profesorskému řízení](#).

Competency model serves a complementing purpose and shall be used as a guidance in the process of selection of a new employee and further training & development. Competencies framework represents a development potential – description of competency specifies an ideal state of work behaviour. Competencies stated for each work area are not required to be fulfilled or developed all at once, focus shall be put on those competencies linked to employee's current duties performed at the position or to employee's developmental needs.

Key competencies for academic employees and researchers are stated in 3 dimensions as follows:

- A. Pedagogical competencies
- B. Research competencies
- C. Competencies for maintaining a good working environment

Additionally, key competencies for resources management (leading of projects and people) are defined.

KEY PEDAGOGICAL COMPETENCIES		
Work Area	Competence	Description
Teaching	Transfer of info for Teaching	To focus on practical application of taught content or on the current trends within the subject. To apply own scientific expertise or multidisciplinary approach while teaching.
		To deliver lectures in a structured and comprehensible manner and also with adequate preparation time.
	Organisational skills	To engage students in active involvement and discussion during the class.
		To set clear instructions for work organization during lessons, course arrangements, and assessment methods.
		To follow effective time-management while lecturing
	Didactic skills	To use modern teaching aids and materials and maintain them up to date.
If applicable, to use modern assessment tools and methods.		
Consultations Thesis Supervision	Mentoring skills	To encourage students to think critically and respect expressed thoughts and opinions.
		To provide timely and constructive feedback to students' work.
		To help students in their further career planning and provide them with examples of further employment options.
Excellence in Teaching	Openness to new teaching practices	To be interested in feedback and suggestions to improve his/her teaching skills.
		To follow new trends in didactic, self-educate in the subject and apply new methods in teaching.

KEY RESEARCH COMPETENCIES		
Work Area	Competence	Description
Research & Development Tasks	Practical research skills	To be familiar with different research strategies, methods, techniques, or tools and apply the most suitable approach in given research task/challenge.
		To work on assigned research tasks in a precise, focused, and organized manner, to strive for timely and excellent quality delivery.
		To be able to plan research experiments effectively and to design a research project.
		To enhance critical & analytical thinking abilities.
		To apply adequate principles and methods in research data management (data usage, back-up, and etc.)
		To understand the nature of the research profession as successful outcomes are often accomplished only in a long-term perspective. Does not mind routine or occasional research failures or challenges.
	Transfer of info for Research	To enhance subject-matter expertise, self-educate, follow current trends within the field, and broaden research experience.
		To apply new knowledge and skills in research practice.
		IT skills

Research & Development Tasks	Innovative thinking	To reframe problems in a different light to find new approaches. If considered as relevant, to develop his/her research hypothesis in a viable research study.
	Creative potential	To publish actively (mainly at international level) and to be able to present research outcomes and impact to a broader audience outside of the scientific community.
		To improve continuously his/her written skills (focused on English) and to invest adequate time into the preparation of scientific or technical texts.
	Networking	To be involved in scientific or professional associations and build relationships at national and international level.
Research & Development Tasks	Project management skills	To understand the importance of active and timely communication and cooperation with the research team and support staff in both preparation, and realisation phases of the research project.
Securing Research Funding		To respect rules given by the Faculty or the University for submission of research proposals and follow the rules and deadlines given by providers.
		When starting a new research project, to learn properly about the project plan, deliverables, roles, and duties of co-workers.
		During project delivery, to comply with project rules (internal, provider's etc.)

COMPETENCIES FOR MAINTAINING GOOD WORKING ENVIRONMENT		
Work Area	Competence	Description
Work Environment	Responsiveness to change	To keep open-minded approach towards innovations and new trends in organisation management. To support changes in organisational culture in terms of working with people, i.e. colleagues, subordinates or internal clients, focused on the improvement of working culture towards openness and transparency.
Teamwork	Tactfulness	To always act with respect and communicate clearly and in an understandable way. Strive to reach a constructive solution in difficult situations.
	Team spirit	To work actively towards meeting team duties and targets, cooperate with team members and be open to sharing of know-how or best practices.
	Self-reflection	To respect different opinions or perspectives and ask for feedback on his/her work.

KEY COMPETENCIES FOR RESOURCES MANAGEMENT		
Work Area	Competence	Description
Complex Research Tasks	Strategic planning skills	To follow the latest trends in the field of expertise.
Securing Research funding		To review and set up internal processes, secure funding and broaden cooperation to achieve the best results as a research group/department in a long-term perspective (i.e., the attractiveness of study programme and graduates' success rate, international research recognition, etc.)
Project Management	Responsibility	As a project lead, to approach the fulfilment of project deliverables and overall success responsibly. To review and track progress in project delivery on a regular basis and provide support and qualified solution in difficult situations.
	Communication skills	To inform his/her co-workers in an adequate and timely manner, to communicate instructions or orders in a clear and structured way.
	Person of trust	To keep his/her word and meet your agreements or obligations.
People Management	Leadership skills	To assign tasks and formulate team objectives in a manner corresponding with colleagues' skills and competencies and support their accomplishments and engagement.
		To be the role model and provide active support to co-workers in achieving the objectives. To appreciate co-worker's work and effort.
		To monitor and review the delivery of objectives on a regular basis. If needed, provide adequate support to help a co-worker success in challenging situations.
		Mentor colleagues and support them in further competence development and work engagement. Create a positive working atmosphere and environment. Any interpersonal problems are solved in a timely and constructive manner.

Annex No. 6 Competency Model for Support Staff

Essential prerequisites for a work performance are qualification requirements stated in Annex no. 4 of this Directive and professional knowledge and skills as per the work specifics and duties carried out by the position. Competency model introduces an overview of recommended key competencies (skills, knowledge, or attitudes) that are needed for successful job performance across support staff positions. These competencies can be further expanded by the Head of the workplace according to the specifics and needs of the workplace and assigned work activities.

Competency model serves a complementing purpose and shall be used as a guidance in the process of selection of a new employee and further training & development. Competencies framework represents a development potential – description of competency specifies an ideal state of work behaviour. Competencies stated for each work area are not required to be fulfilled or developed all at once, focus shall be put on those competencies linked to employee’s current duties performed at the position or to employee’s developmental needs.

Key competencies for support staff are stated in 2 dimensions as follows:

- A. Main competencies for the positions of supporting character
- B. Competencies for maintaining a good working environment

Additionally, key competencies for resources management (leading of projects and people) are defined.

KEY COMPETENCES FOR SUPPOR STAFF ROLE		
Work Area	Competence	Description
Duties Performance	Expertise (Knowledge & Skills)	To have and to be able to apply practically the technical/domain/subject matter knowledge related to the agenda of the workplace. To proactively follow the latest trends in the field of expertise, to familiarize with new internal procedures and guidelines. To be open to new trainings (e.g., in area of IT technologies).
	Carefulness & Reliability	To perform assigned tasks in good quality and on time, according to the agreement and instructions. To carry out duties carefully, in case of any delays/complications, to notify in time or ask for advice/support.
Dealing with Others	Communication skills (including English knowledge)	To communicate (both written and verbal presentation) clearly, in structured and understandable way and politely. To follow adequate communication manners.
		In line with internalisation of the working environment, to improve continuously the command of English (<i>if the usage of English is relevant for the position</i>).
Problem Solving	Professional Attitude with Client Orientation	When dealing with the customer, no matter what position or difficult situation, to act with empathy, with helpfulness and politeness.
		To solve queries and problems in constructive manner, and solutions are proposed based on careful analysis and evidence. To seek for constructive solution in regard to the needs or to provide an adequate and relevant advice.
Systems and Processes Problem Solving	System Thinking	To be aware of the interrelations/impact of performed duties to work/activities of other colleagues or departments. To have an overview and orientate him/herself easily in faculty’s complex systems, processes and procedures.

COMPETENCIES FOR MAINTAINING GOOD WORKING ENVIRONMENT		
Work Area	Competence	Description
Work Environment	Responsiveness to change	To keep an open-minded approach towards innovations and new trends in organisation management. To support changes in organisational culture in terms of working with people, i.e. colleagues, subordinates or internal clients, focused on the improvement of working culture towards openness and transparency.
Teamwork	Tactfulness	To always act with respect and communicate clearly and in an understandable way. Strive to reach a constructive solution in difficult situations.
	Team spirit	To work actively towards meeting team duties and targets, cooperate with team members. To be open to sharing of know-how or best practices and to develop good cooperation within/outside of the workplaces.
	Self-reflection	To respect different opinions or perspectives and ask for feedback on his/her work.

KEY COMPETENCES FOR LEADING OTHERS

Work Area	Competence	Description
Workplace Operations	Focus on Quality Assurance	To focus on a feedback mechanism towards the services provided by the workplace and to ensure effective cooperation in the agenda performance across the Faculty.
