

E-loan

E-loan is a service for viewing scanned study literature from MU libraries on a computer screen, without the possibility of downloading and saving it.

- For one book, it is possible to make only as many electronic loans at a time as MU libraries have free physical copies in their collection. Loans are based on a “first come” system.
- The e-loan only allows viewing the pages of selected books on the screen, no other functions (reservations, lending, etc.) are allowed.

Instructions:

- Access to e-loan is possible directly via the web catalog <https://katalog.muni.cz>
- On the initial search screen, click the **E-loan** filter link. You will receive a set of all e-loans in the MUNI catalog. Further, refine your requirements, locate the desired book, and expand its record by clicking the title.
- Scroll down the **book record**, and find the red **E-loan** link (displayed in the Holdings section).
- By clicking on the E-loan link, you will be redirected to MUNI unified login (**UČO** and **primary password**); after successful login, the pages of the book will be displayed.
- After successful login, you must complete the loan by clicking the appropriate button. The maximum duration of your loan is 3 hours.
- For finish browsing the book, you must return it by clicking **the Return the Book** button and then you can search for another one.
