#### Article 4

##### **Method of Recognition of Foreign Stays**

- 1) The student's foreign stay must be fully recognised according to the documents specified in Article 3, paragraph 3. Only successfully completed foreign stays or successfully completed courses from a foreign stay are recognised.
- 2) In the case of recognition of foreign stays implemented by means of a Learning Agreement for Studies, a Transcript of Records and a Confirmation of Study Period, the student must apply for recognition of the foreign stay in two possible ways:
  - a) credit for MU courses listed as required or elective. In this case, the course is recognised according to the MU curriculum, i.e. the credit value is allocated as the credit value of the MU course. The classification of the course is recognised according to the classification obtained from the host institution (in the case of a different classification system, it is converted to the scale used at MU). A student may only apply for recognition of a course that is listed in the MU course catalogue.
  - b) credit for MU courses listed as elective or selective. Courses so recognised are newly created in the IS and the information about the host institution's course is taken from the submitted documents (title, language of instruction, transferred credit value and classification). At the same time, the classification and credit value from the host institution are recognised along with the course. The credit value may not be reduced or increased in the case of the use of the ECTS system at the host institution. Exceptions are made for credits with a decimal value, for which mathematical rounding is applied.
- 3) In the case of recognition of foreign stays implemented by means of a Learning Agreement for Traineeship or a Foreign activity Plan and a Traineeship certificate, the student must apply for recognition for MU courses listed as required, elective or selective. In this case, the course is recognised according to the MU study plan, i.e. the credit value is allocated in the credit value of the MU course. A student may only apply for recognition of a course that is listed in the MU course catalogue.
- 4) If the foreign institution does not use the ECTS system, the course classification and credit values are converted to ECTS according to the conversion table included in the Transcript of Records or provided by the host institution or generally accepted. In cases of ambiguity or in other cases, the person in charge of registration/recognition is entitled to decide on the classification and credit value.
- 5) The method of recognition must be set out in the Learning Agreement for studies or the Learning Agreement for Traineeship/Traineeship Certificate or Foreign Activity Plan/Foreign Activity Report.
