Jak rozpoznat predátorský časopis

Jiří Kratochvíl

Knihovna univerzitního kampusu

KUK: analýza 348 titulů v 2017–24

FAQ

Opakovaně jsme dostali nabídku publikovat v J Clin Med (IF > 4) – mohl byste, prosím, tento časopis „prolustrovat“ z hlediska potenciálně predátorského časopisu?

10. 10. 2022, ARO LF a FN USA

Jako člen odborné společnosti mám zhodnotit kvalitu prací přihlášených do soutěže. Tento časopis IF nemá a byl klamně vydáván za časopis s podobným názvem Journal of Biomedical Science. Máte informace o takovém chování predátorských časopisů, tedy o využívání podobného názvu časopisu?

11. 8. 2022, KICH LF a FN Brno

Chtěla bych se zeptat, zda máme považovat časopisy MDPI za predátorské, zda máte nějaké takové informace. Množí se takové informace a na Mendelu nedoporučují zde publikovat.

17. 10. 2022, ÚEB PĚF

Podstata problému

An aerial photograph of a multi-lane highway. The highway is oriented diagonally from the top-left to the bottom-right. The left side of the highway (relative to its direction) has two lanes highlighted in a bright green color. The right side has two lanes highlighted in a bright yellow color. There are a few small, dark shapes representing cars on the highway. The surrounding area is dark, suggesting a night or low-light setting.

Editorial Board

Science Research Association operates a group of scholarly journals, covering Computer Science & Electrical Engineering, Energy, Environmental Sciences, Life Sciences & Biology, Materials Science, Medicine & Public Health and other fields. Participation in the peer-review process is absolutely essential to the success and reputation of the journal. Editorial Members along with the editors determine which work is of quality and significance. Due to extensive readership, the research and scholarship presented will ultimately have an impact on literacy in classrooms, nationally and internationally. Once you become one of our Editorial Members, your name will be listed on the journal's webpage afterwards and the confirmation letter will be sent to you as you request.

The screenshot shows the website for 'Scholarly Open Access', which provides a critical analysis of scholarly open-access publishing. The page features a blue header with the title and subtitle. Below the header is a navigation menu with links for Home, About the Author, Disclaimer, LIST OF PUBLISHERS, and LIST OF STANDALONE JOURNALS. The main content area is titled 'LIST OF STANDALONE JOURNALS' and includes a search bar, a list of journals, and several sidebar sections: RECENT POSTS, ARCHIVES, CATEGORIES, and META. The list of journals includes titles like 'Academic Exchange Quarterly' and 'Acta de Gerencia Ciencia (CAGENA)'. The RECENT POSTS section lists articles such as 'Beall's List of Predatory Publishers 2017' and 'Is It Time to Retire ResearcherID?'. The ARCHIVES section has a dropdown menu for 'Select Month'. The CATEGORIES section lists various topics like 'article processing charges' and 'Australia'. The META section is currently empty.

LIST OF STANDALONE JOURNALS

Potential, possible, or probable predatory scholarly open-access journals

This is a list of questionable, scholarly open-access standalone journals. For journals published by a publisher, please look for the publisher on the list of publishers, [here](#). This list is only for single, standalone journals.

We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access journals whose practices match those of predatory journals have been added to the list. The criteria for determining predatory journals are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geo-cultural locus. We emphasize that journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements

VIOLATIONS

Integrity

- The publisher hides or obscures relationships with for-profit partner companies.

Website

- Does not identify a physical address for the publisher or gives a fake address.
- Journal or publisher uses a virtual office or other proxy business as its physical address.

Publication Practices

- Emails from journals received by researchers who are clearly not in the field the journal covers.

Journal Evaluation Rubric

Criterion	Good (3)	Fair (2)	Poor (1)
Step 1. Journal evaluation			
Web search for the journal	The journal is within the top 5 entries on the first page of search results and there are no scam alert postings.	The journal is on the first page of search results but not within the top 5 entries and there are no scam alert postings.	The journal is not on the first page of search results or there is at least one scam alert post about the journal.
Journal name	The journal name cannot be confused with another journal.	The journal being evaluated has a name similar to another journal but is able to be distinguished between the two.	The journal being evaluated is unable to be distinguished from another with a similar name.
Editorial board	The editorial board is listed with their full names and institutional affiliation.	The editorial board is listed with their full names only (no affiliation).	There is no editorial board listed.
Review process	The journal states whether it is peer reviewed/edited and has a review policy listed.	The journal states whether it is peer reviewed/edited and has no review policy listed.	The journal does not state whether it is peer reviewed/edited and has no review policy listed.
Conflicts of interest	The journal thoroughly and clearly states a conflicts of interest policy, including how it will handle potential conflicts of interest of editors, authors, and reviewers.	The journal states a conflicts of interest policy, but the description of how conflicts will be handled is unclear.	The journal does not state a conflicts of interest policy.
Journal website	The journal website is competently designed and functional. (examples: no broken links, easy navigation, no missing information)	The journal website is adequately designed with passable functionality. (examples: adequate navigation, few broken links, some missing information)	The journal is poorly designed and is not functional. (examples: broken links, poor navigation, missing information)

Takže jak postupovat?

Doporučujeme

1. zkontrolovat objektivně ověřitelná kritéria

#	Název kritéria	Popis ověření kritéria	Parametry kritéria	Bodové ohodnocení
1	Volný přístup k plnému textu	Ověřuje se, zdali na webu časopisu v aktuálním ročníku lze volně stáhnout/zobrazit plné texty článku	Ano, články lze volně stáhnout/zobrazit Ne, žádné, nebo některé články nelze stáhnout/zobrazit	
2	Jednoznačné stanovení autorských poplatků	Ověřuje se, zdali na webu časopisu je uvedena zcela konkrétní výše autorských poplatků	Časopis uvádí, že žádné autorské poplatky nevybírá Ano, výše poplatků je vyjádřena konkrétní konečnou částkou Výše poplatků je nejasná (např. kromě ceny za článek je uvedena poznámka o případném zpoplatnění stran navíc bez uvedení konkrétní částky) Cena není uvedena	
3	Popis recenzního řízení	Ověřuje se, zdali na webu časopisu je detailně popsán průběh recenzního řízení, tj. jestli jde o tzv. double-blind peer review, nebo otevřené recenzní řízení, kolik recenzentů text posuzuje.	Ano, průběh recenzního řízení je popsán. Je uvedeno pouze "Peer-reviewed" bez popisu jeho průběhu Ne, průběh recenzního řízení není popsán.	
4	Afiliace členů redakční rady	Ověřuje se, zdali na webu časopisu v seznamu členů redakční rady je u všech uvedena úplná afiliace, tj. název instituce a město/stát	Afiliace je úplná, tj. uvedena instituce i město/stát Afiliace je neúplná, chybí instituce, nebo město/stát Afiliace není uvedena	

Doporučujeme

1. zkontrolovat objektivně ověřitelná kritéria
2. provést obsahovou analýzu

Introduction

[Go to](#)

Conventionally, the understanding of any given human ailment aligns from system to organ to tissues to cells. We call it "Cyto-Pathology", we engage in a variety of diagnostic tools to evidence such cyto-pathology to confirm our diagnoses and tailor a medical or surgical plan according to the given established protocols.

Atomic Force Microscopy (AFM) has brought a new paradigm in the view to best clear our understanding of the emerging pathophysiology of a given symptomatic pathology. No more we can logically treat a disease based on the symptomatic realm, admitting "Etiology Unknown".

Today, majority of the ailments have only symptomatic relief/treatment. There is an urgency to take a deeper look at the source of ailments and try to define the possible etiology. We all are familiar with the Nucleus of a given cell being the controlling entity for that cell's homeostasis, timely development and its functions.

So is true of the controlling Neurons of the Brain. In 2004, Late Dr. Edward Wagoner and his team at the University of California at Irvine did not fathom the idea that they are about to change a whole new paradigm. His team Dr. Alex Malkin, Dr. Alex McPhearson and Dr. M. ...

Author Guidelines | Juniper Publishers

Authors are advised to go through these ethics firmly, as mentioned here under:

- Submitted manuscripts should be of their original work or of the work, they are associated with during their tenure. Submitted manuscripts should contain original and authentic results, data and their ideas, which are not published elsewhere.
- Authors should not submit the same manuscript, in the same language simultaneously to more than one journal. The rationale for this standard is the potential for disagreement when two (or more) journals claim the right to publish a manuscript that has been submitted simultaneously to more than one journal, and the possibility that two or more journals will unknowingly and unnecessarily undertake the work of peer review, edit the same manuscript, and publish the same article.
- Preparing of data and results, intellectual property theft and plagiarism are highly unacceptable, it is beyond the ethics of an author. Information obtained from various media can be provided in the manuscript only with prior permission from the owner of the source of information or data.
- Authors should properly cite the work they are referring, authors are advised to cross check the reference before submission of manuscript that it has all the contents that a manuscript should have.
- Authors and co-authors are requested to review and ensure the accuracy and validity of all the results prior to submission. Any potential conflict of interest should be informed to the editor in advance.
- All authors are requested to submit the copyright transfer form without failure once they receive the acceptance of their article for publication.
- When human experimentation is being reported, a statement must be included confirming that the work was done in accordance with the appropriate institutional review body and carried out with the ethical standards.

Author Guidelines | Juniper Publishers

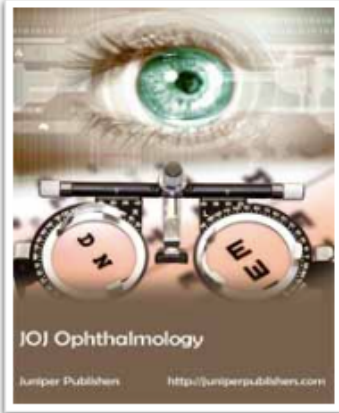

Authors are advised to go through these ethics firmly, as mentioned here under:

- Submitted manuscripts should be of their original work or of the work, they are associated with during their tenure. Submitted manuscripts should contain original and authentic results, data and their ideas, which are not published elsewhere.
- Authors should not submit the same manuscript, in the same language simultaneously to more than one journal. The rationale for this standard is the potential for disagreement when two (or more) journals claim the right to publish a manuscript that has been submitted simultaneously to more than one journal, and the possibility that two or more journals will unknowingly and unnecessarily undertake the work of peer review, edit the same manuscript, and publish the same article.
- Preparing of data and results, intellectual property theft and plagiarism are highly unacceptable, it is beyond the ethics of an author. Information obtained from various media can be provided in the manuscript only with prior permission from the owner of the source of information or data.
- Authors should properly cite the work they are referring, authors are advised to cross check the reference before submission of manuscript that it has all the contents that a manuscript should have.
- Authors and co-authors are requested to review and ensure the accuracy and validity of all the results prior to submission. Any potential conflict of interest should be informed to the editor in advance.
- All authors are requested to submit the copyright transfer form without failure once they receive the acceptance of their article for publication.
- When human experimentation is being reported, a statement must be included confirming that the work was done in accordance with the appropriate institutional review body and carried out with the ethical standards.
- Manuscript should include a signed statement of informed consent to publish (in online) patient descriptions, photographs, and pedigrees from all persons (parents or legal guardians for minors) who can be identified in such written descriptions, photographs, or pedigrees. Such persons should be shown the manuscript before its submission.
- Sharing with public media, government agencies, or manufacturers the scientific information described in a paper or a letter to the editor that has been accepted but not yet published violates the policies of many journals.

JOJ Ophthalmology

JOJ Ophthalmology is a progressive journal that presents the information concerned with the study and treatment of disorders and diseases of the eye. JOJO has worldwide distribution and supports medical professionals in the delivery of excellent ophthalmic information by publishing. This journal focuses on the anatomy, physiology, pathology of diseases related to eye and even encircles the broad range of topics like treatment, recent developments in ophthalmology, optometry, vision science, pathophysiology and etiology of eye diseases as well as advances in diagnostic techniques, surgical treatment. The journal pleasantly welcomes various papers like Opinions, Research, Review Articles, Mini- Reviews, Short Communications, Letter to Editors etc., for the most recent ongoing and future research.

The screenshot shows a ResearchGate post titled "Predatory journals/publishers?". The post is a discussion thread with two answers. The first answer is from Anton Vrdoljak, dated November 27, 2021, mentioning "Juniper Publishers" and "Beall's list" with a link to <https://beallslist.net/>. The second answer is from Rob Keller, also dated November 27, 2021, addressing "Ahlem sarah Moulay Brahim" and providing a detailed analysis of predatory publishing indicators. He lists several red flags: mentioning PubMed indexed papers misleadingly, contact info suggesting nice residences but no real office address, misleading metrics on their indexing site, and a fake impact factor. He concludes with "I would say avoid this one." and "Best regards."

Anton Vrdoljak added an answer November 27, 2021

To [Ahlem sarah Moulay Brahim](#): Juniper Publishers is mentioned in the **Beall's list**: <https://beallslist.net/>

Recommend Share ▾ 3 Recommendations

Rob Keller added an answer November 27, 2021

Dear [Ahlem sarah Moulay Brahim](#) ,

As indicated by [Anton Vrdoljak](#) and yourself the publisher behind the journal is mentioned in the Beall's list. As by 'definition' and I quote: "All journals published by a predatory publisher are potentially predatory unless stated otherwise" (see <https://beallslist.net/>). Mentioned in the Beall's list is a red flag but there are more:

- Prominently mentioning PubMed indexed papers is misleadingly suggesting a 'real' PubMed indexing but the mentioned indexing is because of NIH funding of one or more of the authors and has nothing to do with the journal(s).
- <http://flakyj.blogspot.com/search/label/Juniper>
- Contact info suggests nice residences but no real(istic) office address
- Journal shows numerous misleading metrics (<https://beallslist.net/misleading-metrics/>) on their indexing site <https://juniperpublishers.com/member-in.php> like DRJI and Citefactor
- Prominently mentioned (<https://juniperpublishers.com/argh/>) impact factor is fake

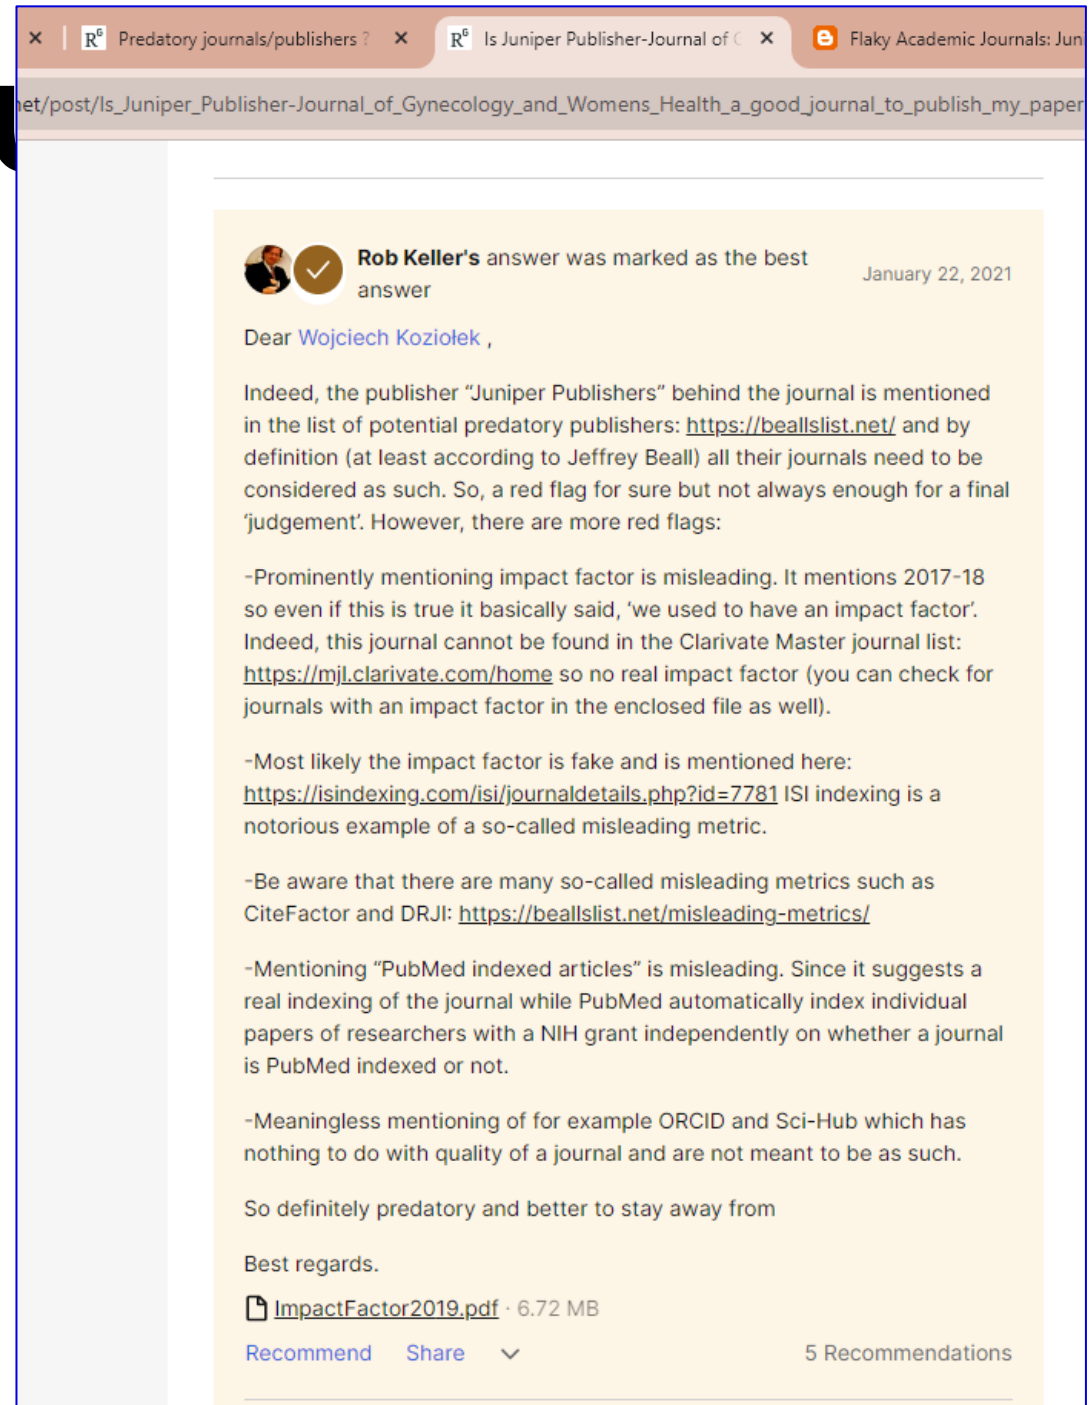

I would say avoid this one.

Best regards.

The screenshot shows a web browser with three tabs: 'Predatory journals/publishers?', 'Is Juniper Publisher-Journal of Gynecology and Womens Health a good journal to publish my paper', and 'Flaky Academic Journals: Juniper Publishers'. The main content is a post by Rob Keller, dated January 22, 2021, which has been marked as the best answer. The post discusses the journal 'Juniper Publishers' and lists several red flags: 1) Misleading impact factor (2017-18) that is not in the Clarivate Master journal list. 2) Likely fake impact factor from ISI indexing. 3) Misleading metrics like CiteFactor and DRJI. 4) Misleading claim of PubMed indexing. 5) Meaningless mentions of ORCID and Sci-Hub. The post concludes that the journal is definitely predatory and advises staying away from it. It includes a PDF attachment 'ImpactFactor2019.pdf' (6.72 MB) and has 5 recommendations.

Predatory journals/publishers? x R⁶ Is Juniper Publisher-Journal of Gynecology and Womens Health a good journal to publish my paper x Flaky Academic Journals: Juniper Publishers

Rob Keller's answer was marked as the best answer January 22, 2021

Dear Wojciech Koziółek ,

Indeed, the publisher "Juniper Publishers" behind the journal is mentioned in the list of potential predatory publishers: <https://bealllist.net/> and by definition (at least according to Jeffrey Beall) all their journals need to be considered as such. So, a red flag for sure but not always enough for a final 'judgement'. However, there are more red flags:

- Prominently mentioning impact factor is misleading. It mentions 2017-18 so even if this is true it basically said, 'we used to have an impact factor'. Indeed, this journal cannot be found in the Clarivate Master journal list: <https://mjl.clarivate.com/home> so no real impact factor (you can check for journals with an impact factor in the enclosed file as well).
- Most likely the impact factor is fake and is mentioned here: <https://isindexing.com/isi/journaldetails.php?id=7781> ISI indexing is a notorious example of a so-called misleading metric.
- Be aware that there are many so-called misleading metrics such as CiteFactor and DRJI: <https://bealllist.net/misleading-metrics/>
- Mentioning "PubMed indexed articles" is misleading. Since it suggests a real indexing of the journal while PubMed automatically index individual papers of researchers with a NIH grant independently on whether a journal is PubMed indexed or not.
- Meaningless mentioning of for example ORCID and Sci-Hub which has nothing to do with quality of a journal and are not meant to be as such.

So definitely predatory and better to stay away from

Best regards.

Juniper's Biometrics and Biostatistics Open Access Journal (BBOAJ)

Juniper Publishers reputedly produces **nonsensical articles and plagiarized papers**. Its mailing address in Irvine, California, is a "Professional Mail Address For Your Business" and "Mail Forwarding Services on request" from **Same Day Virtual**. Its scope is extraterrestrial—it wants to reach "the research community **throughout the universe**." Consistent with the publisher's desire "to offer the **best in class**," its *Global Journal of Addiction and Rehabilitation Medicine* included the infamous **Dr. Olivia Doll**--a pit bull with a concocted C.V. of canine research--on its editorial board.

Among its 75 journals is the *Biostatistics and Biometrics Open Access Journal*. BBOAJ "encourages in spreading the information and advances in assorted areas that are concerned with the application of i. Statistics ... And ii. Biometrics." (In case you did not know, it defines the former as "Responsible for the proper interpretation of scientific data generated in the biology, public health and other health sciences like biomedical sciences" and the latter as "Dealing with the measurable biological characteristics.")

I looked for information on the first two "Honorable Editors." I did not look into any of the (less honorable?) "Associate Editors." At the top of the list is **Siquan Wang** of "Columbia University USA." According to LinkedIn, Dr. Wang received his Ph.D. this year from Columbia's Mailman School of Public Health and has experience as a graduate teaching and research assistant and a summer intern at Morgan Stanley.

The second honorable editor is **Ramalingam Shanmugam** of "Texas State University USA"--an "**Honorary Professor of International Studies** in the School of Health Administration," the President of the San Antonio Chapter of the American Statistical Association (ASA), and a recent ASA Fellow. He is listed as an editor of one journal after another from publishers that have been criticized as fraudulent or predatory--**Omics** (fined \$50,000,000 for **deceptive practices**), **Scholarena** (discussed [on this blog](#)), **Kenkyu Group**, and perhaps more

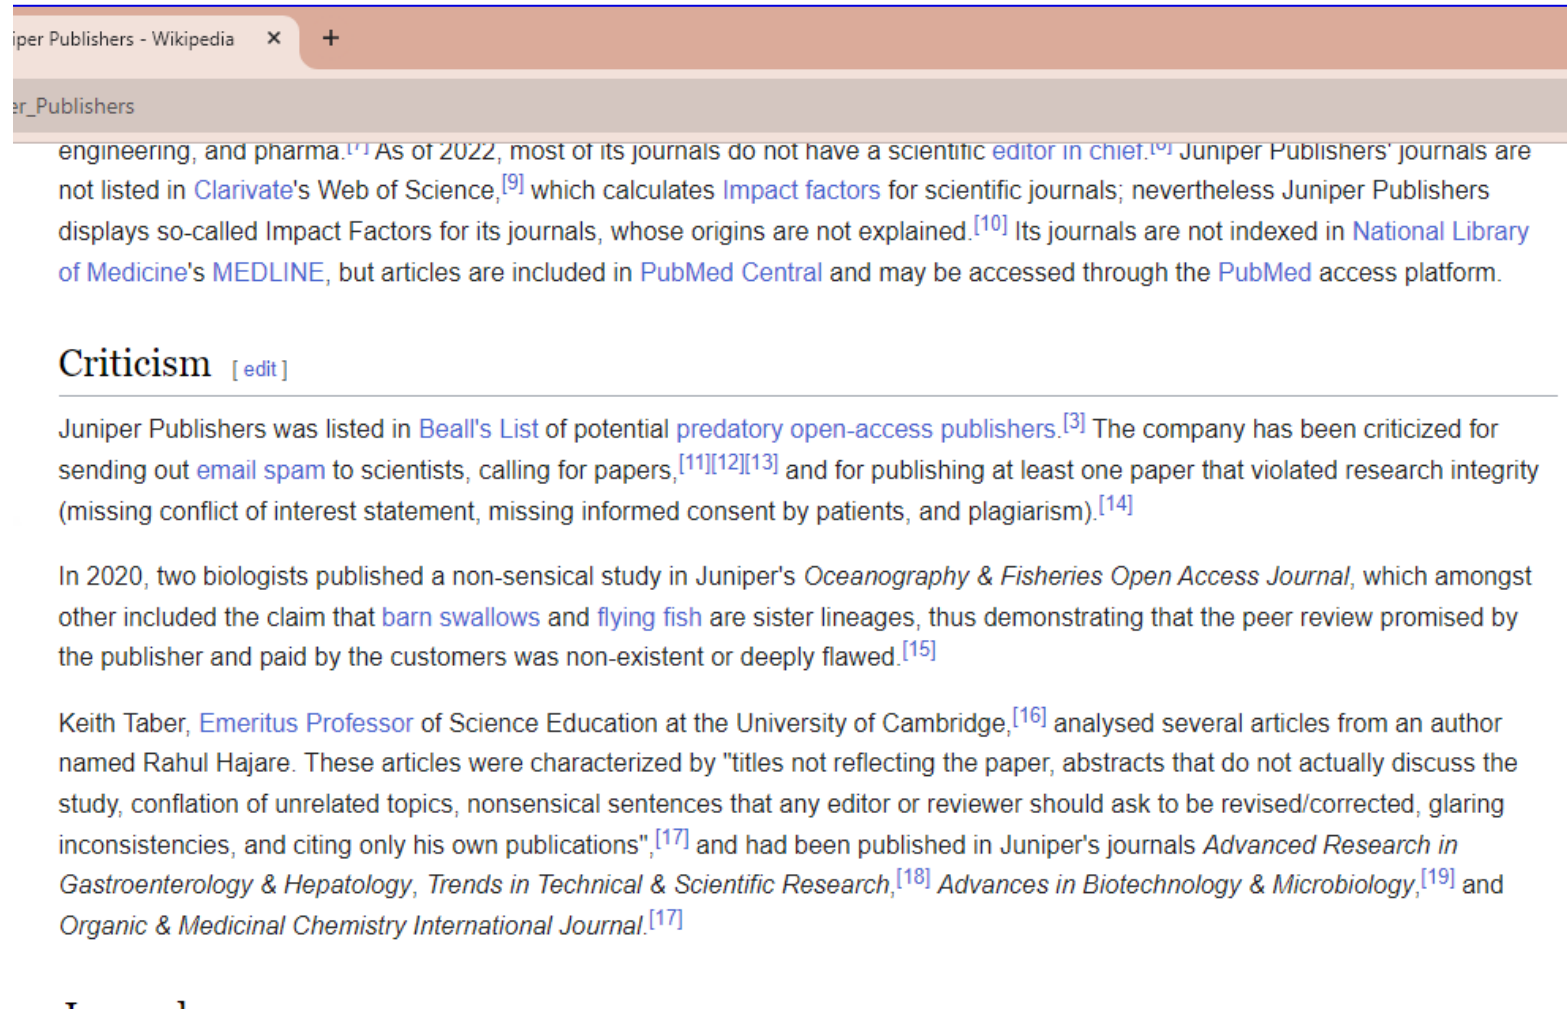

Contrary to what its home page suggests, BBOAJ is **not indexed for MEDLINE** and is not in the National Library of Medicine collection.

The screenshot shows a Wikipedia article titled "Juniper Publishers". The text discusses the publisher's operations, its lack of listing in major databases like Clarivate's Web of Science and MEDLINE, and its use of Impact Factors. It also covers criticism of the publisher, including its inclusion in Beall's List of predatory open-access publishers, its history of sending email spam, and a specific incident in 2020 where a non-sensical study was published in one of its journals. The article mentions that the publisher's peer review process was flawed and that an author named Rahul Hajare had published several articles in its journals that were characterized by nonsensical content and self-citation.

Juniper Publishers - Wikipedia

Juniper Publishers

engineering, and pharma.^[1] As of 2022, most of its journals do not have a scientific [editor in chief](#).^[9] Juniper Publishers' journals are not listed in [Clarivate's Web of Science](#),^[9] which calculates [Impact factors](#) for scientific journals; nevertheless Juniper Publishers displays so-called Impact Factors for its journals, whose origins are not explained.^[10] Its journals are not indexed in [National Library of Medicine's MEDLINE](#), but articles are included in [PubMed Central](#) and may be accessed through the [PubMed](#) access platform.

Criticism [[edit](#)]

Juniper Publishers was listed in [Beall's List](#) of potential [predatory open-access publishers](#).^[3] The company has been criticized for sending out [email spam](#) to scientists, calling for papers,^{[11][12][13]} and for publishing at least one paper that violated research integrity (missing conflict of interest statement, missing informed consent by patients, and plagiarism).^[14]

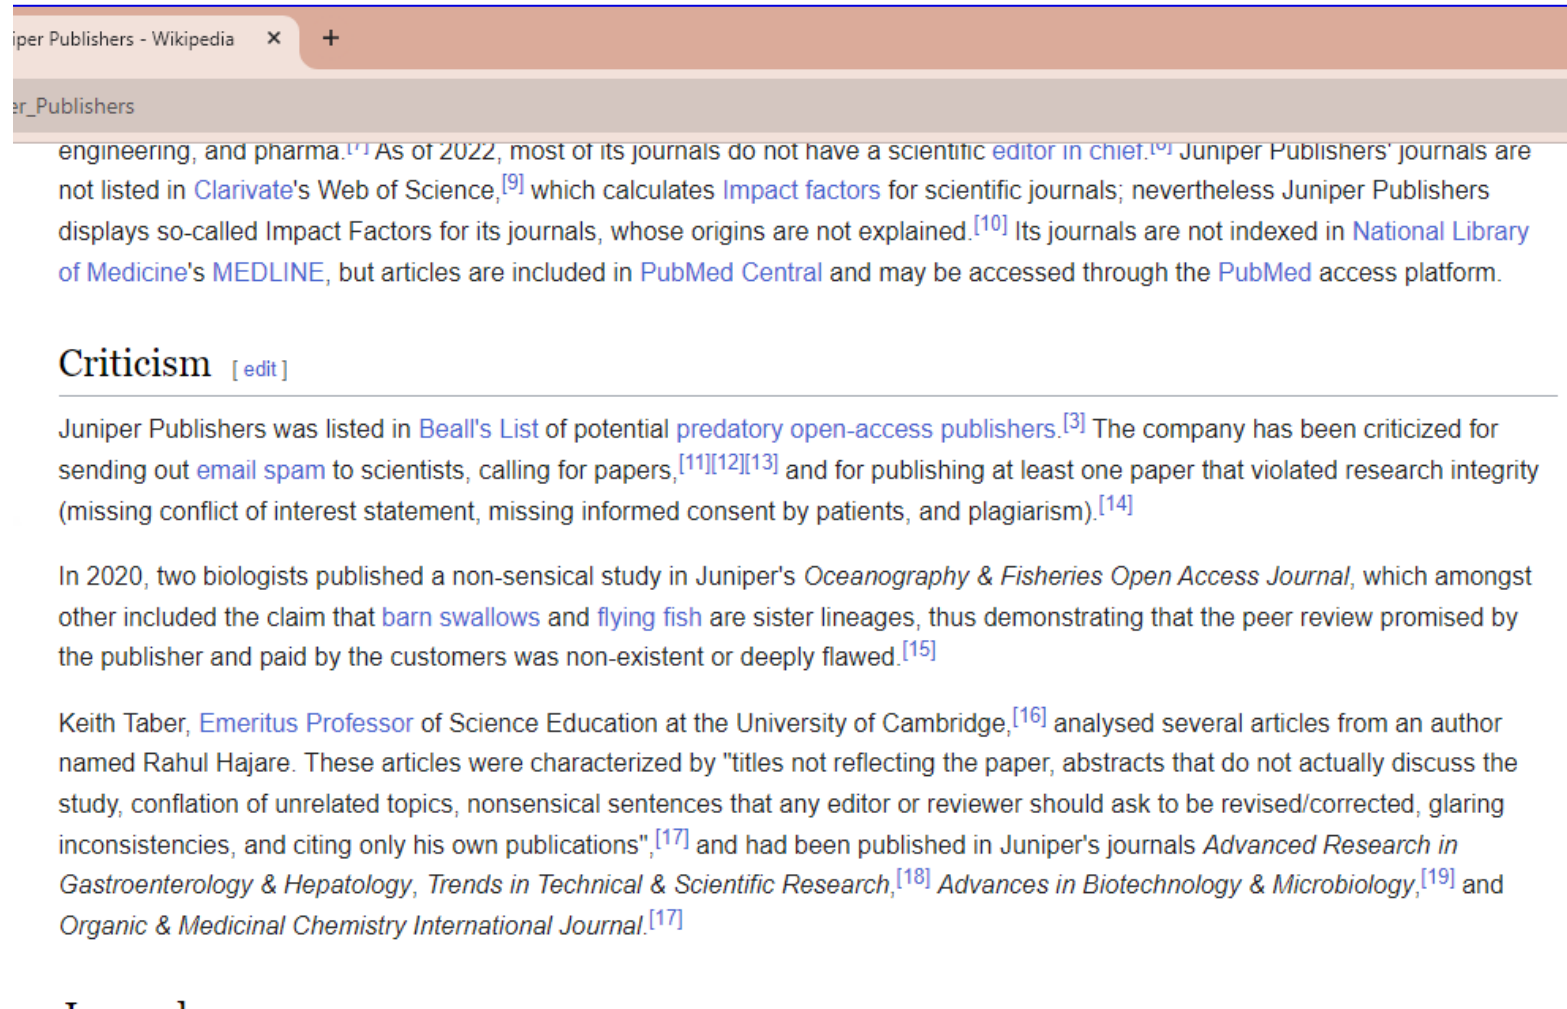

In 2020, two biologists published a non-sensical study in Juniper's *Oceanography & Fisheries Open Access Journal*, which amongst other included the claim that [barn swallows](#) and [flying fish](#) are sister lineages, thus demonstrating that the peer review promised by the publisher and paid by the customers was non-existent or deeply flawed.^[15]

Keith Taber, [Emeritus Professor](#) of Science Education at the University of Cambridge,^[16] analysed several articles from an author named Rahul Hajare. These articles were characterized by "titles not reflecting the paper, abstracts that do not actually discuss the study, conflation of unrelated topics, nonsensical sentences that any editor or reviewer should ask to be revised/corrected, glaring inconsistencies, and citing only his own publications",^[17] and had been published in Juniper's journals *Advanced Research in Gastroenterology & Hepatology*, *Trends in Technical & Scientific Research*,^[18] *Advances in Biotechnology & Microbiology*,^[19] and *Organic & Medicinal Chemistry International Journal*.^[17]

Předmět: Invitation to Peer Review: IJEPRR-16-050
Od: "IJEPRR Review Department" <ijepr2016@drjafs.info>
Datum: 4.8.2016 16:08

Dear Colleague,

It is a great pleasure to invite you to peer review the research topic ENTITLED "ACCESS TO INFORMATION: THE ROLE OF PUBLIC LIBRARIES IN NIGERIAN SOCIETY".

Find the Abstract below:

ABSTRACT: This paper examines Access to information: the role of public libraries in Nigerian society. Information is a basic human right and is absolutely important in the development of any society. Access to information means unhindered access to information. In today's society, access to information is required at any point in time for the citizens, since it is a catalyst for social, economic and political development as well as for good decision making. Access to Information is access to Internet and it is a means for overcoming inequality of information in the society. With Information and communication technology, the means of accessing information also changed. Many users go to the public library for internet access and The Internet allows the users have access to vast quantities of Information for them to choose with the right skills. In this paper, access to Information was discussed in depth from the following perspective: Access to Information. Freedom of Information, Information Literacy Skills and the Role of Public Libraries, Internet Access, Challenges, Conclusions and Recommendation were made.

Key Words: Information Access, information society, information literacy, public libraries, Internet Access, Freedom of Information.

However, you are free to forward/recommend any of your friend or colleague should the attached manuscript is not in your field of interest.

Thank you for your attention and consideration in this important matter.

Kindly acknowledge the receipt of this mail.

I appreciate your effort.

Best regards,

Editorial Board

Science Research Association operates a group of scholarly journals, covering Computer Science & Electrical Engineering, Energy, Environmental Sciences, Life Sciences & Biology, Materials Science, Medicine & Public Health and other fields. Participation in the peer-review process is absolutely essential to the success and reputation of the journal. Editorial Members along with the editors determine which work is of quality and significance. Due to extensive readership, the research and scholarship presented will ultimately have an impact on literacy in classrooms, nationally and internationally. Once you become one of our Editorial Members, your name will be listed on the journal's webpage afterwards and the confirmation letter will be sent to you as you request.

Dear Dr.Schweyk,

Thank you very much for your kind reply. It is great that you are willing to review the paper. Please find the review form and the APR-1821 full text in the attachment.

When you finish it, you could send me the report directly and I will help to upload it to our submission system. And I would appreciate it if you could send back the report before 25 October 2024, though kindly let me know if you need more time.

Looking forward to your reply.

Kind regards,

Ms. Yvonne Hyde

komu: Yvonne, ralali ▾

Dear Ms. Hyde,

Who knows how many other reviewers you invited to review the article "Enhancing Academic Self-Efficacy..." but you're not keeping track of the recipients. The fact is that I discovered your invitation in spam and responded to it from a fictitious email address, including changing the sender to Dr. Schweyk. And you didn't find it strange that someone to whom you didn't write responded and sent him the full text. This is an absolutely unacceptable editorial practice and I have reason to believe that Applied Psychology Reseach is a so-called predatory journal.

Cc: Mr. Rommel Mahmoud Alali, the apparent author of the article according to the metadata in the file and who should be informed that he had sent his article to a disputable journal. Mr. Alali, let me recommend you immediately ask Ms. Hyde to withdraw your article if you don't want your work to come to be useless.

So called J.A. Schweyk
