### 1. A student nurse: Read the text and answer the questions with whole sentences.

Jana Nová is thirty-two years old. She studies a bachelor's degree programme in nursing at the University of London. She is a distant student. She has many interesting subjects and her favourite subject is psychotherapy. She has many subjects this semester, therefore she must study hard.

She wants to be a nurse because she likes working with people and she is interested in science, but she does not like doing paperwork. She would like to work in paediatrics, because she enjoys working with children. One day, she hopes that she will work in a children's hospital.

She is friendly, responsible and very organized. She makes people feel comfortable. She is married and has a daughter. In her free time, she goes for a walk, reads books and cooks with her husband. At the weekends, she goes to the cinema or goes with her family to their cottage in the mountains.

### 2. A future midwife: Read the text about Evelyn. a) Is she working at the moment?

My name is Evelyn. I am from Slovakia, and I am a student. I study midwifery at Masaryk University and I am in my first year. I like it very much, but it is sometimes difficult and I must work hard. I spend a lot of time in hospitals: I talk to mothers-to-be and help them give birth.

I have two children and I don't work because I am on maternity leave. Sometimes it's stressful when I need to study and my children want to play with me. My husband works in a hospital, he is a doctor and he is never at home.

In my free time, I read books and watch movies. I don't exercise much, because I don't have enough time.
