

Trip planning

After the project of our French partners is carried out, focus together on this more general language-oriented task:

Your task is to plan together a trip UK (imagining, of course, a situation in which travelling is allowed and everything is possible). You must spend at least 1 week there and visit at least 3 distinct places/cities and such. Focus on the details, do not hesitate to search any information and such.

Leading questions:

What time of year are you travelling there?

How much is your budget?

What activities can we plan within our budget? (find specific costs)

What places do you really want to visit/do not care about visiting?

How shall we travel there?

How shall we travel around?

What type of accommodation are we going for (specifically, each day, each place, search around, though pretend of course all the places are open and available)?

What souvenirs would be interesting to bring home?
