

“HRM & OrgDev” Introduction

Dipl.-Ing. Johannes GÖLLNER, MSc

Masaryk University, Brno, CZ

March., 10th, 2017, 11:05–16:10

Lecture 1.1

Relevant CONTENT of HRM & OrgDev:

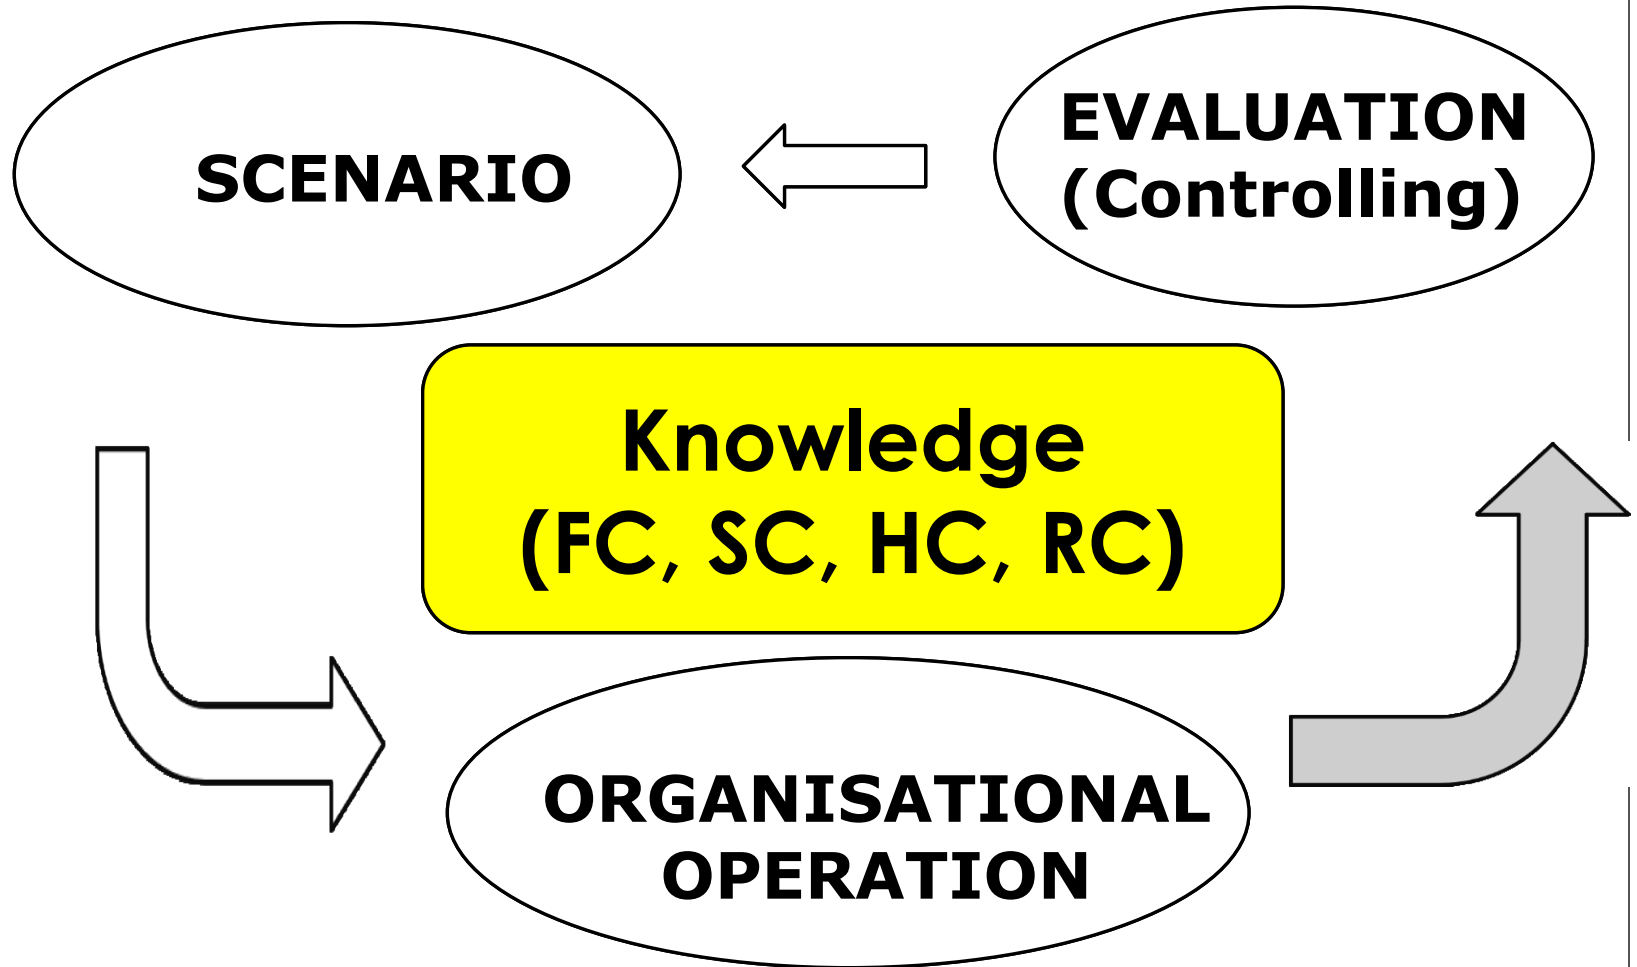

1. Which problems should have been solved by Human Resource Management in organizations, and in further consequence in economy and society?
2. Relation between organizational and individual capabilities and skills for strategic and operational organizational development
3. Relevance of Knowledge Management for Human Capital Leadership?
4. Models and methods for skill analysis and development (input, output and comparison models and methods with a special focus on assessment centres)
5. A practical example for the application of the assessment centre method in context of HRM
6. Relation between HRM, Knowledge Management and Risk Management for organizational development, controlling and leadership

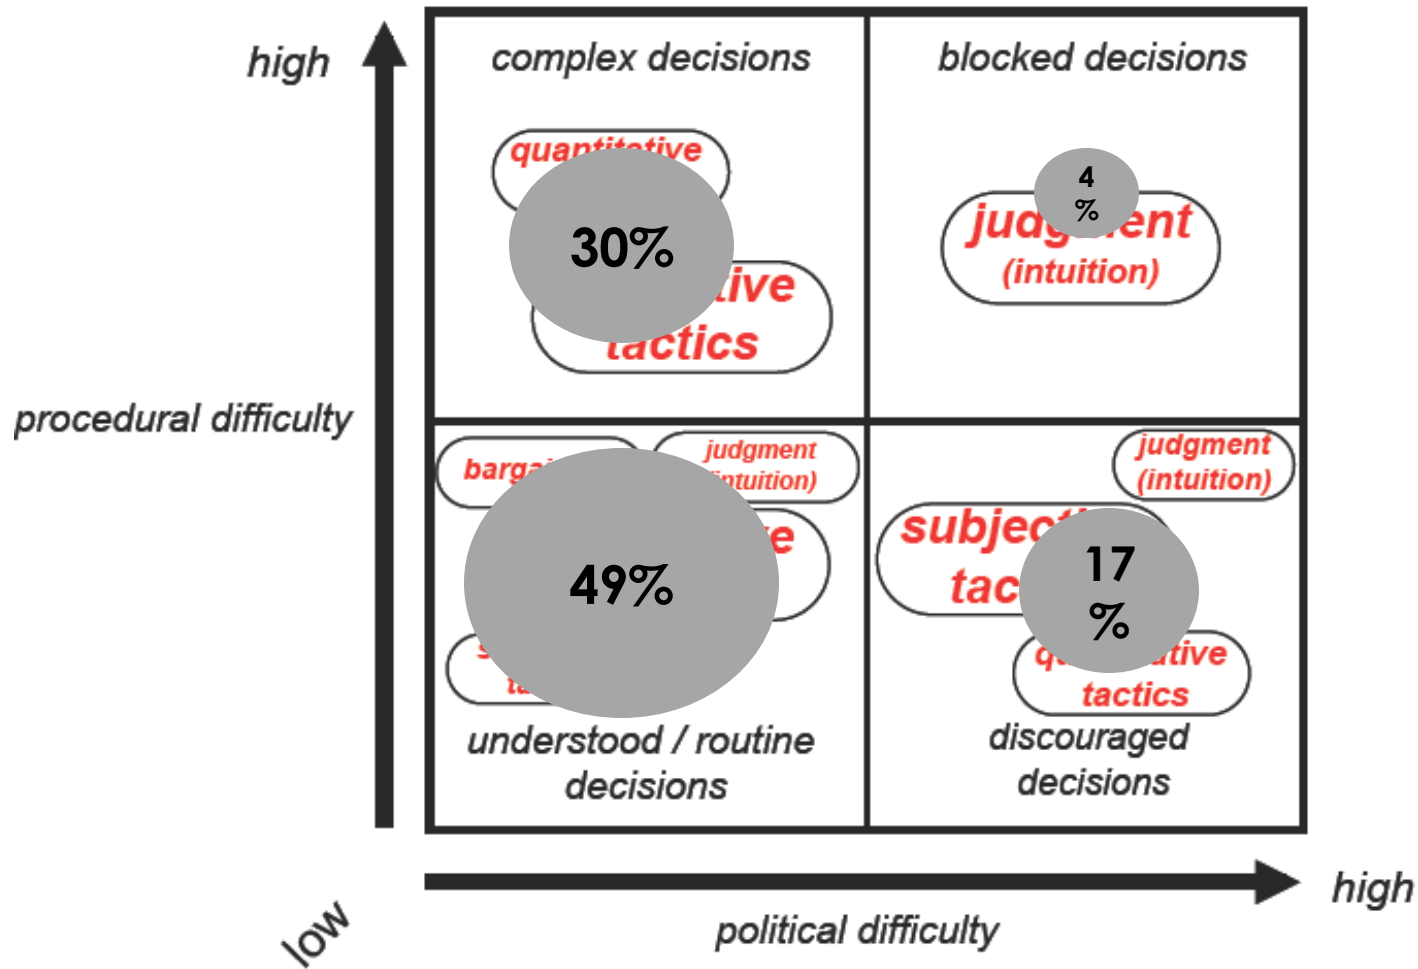

Generic description of the system ORGANISATION

Organisation-Development

Quelle: Paul C. Nutt, 1998

Building the Knowledge Performance System with a Model Based Approach

*No engineer, designer or architect works without a
plan / planning / BPM - tool!*

Do we have a KM - System, a Knowledge planning/
modelling tool and a KM/Evaluation tool in our
organisation?

„idea“

**IF YOU CAN'T MEASURE -
YOU CAN'T MANAGE IT!**

Goal/Task

Evaluation

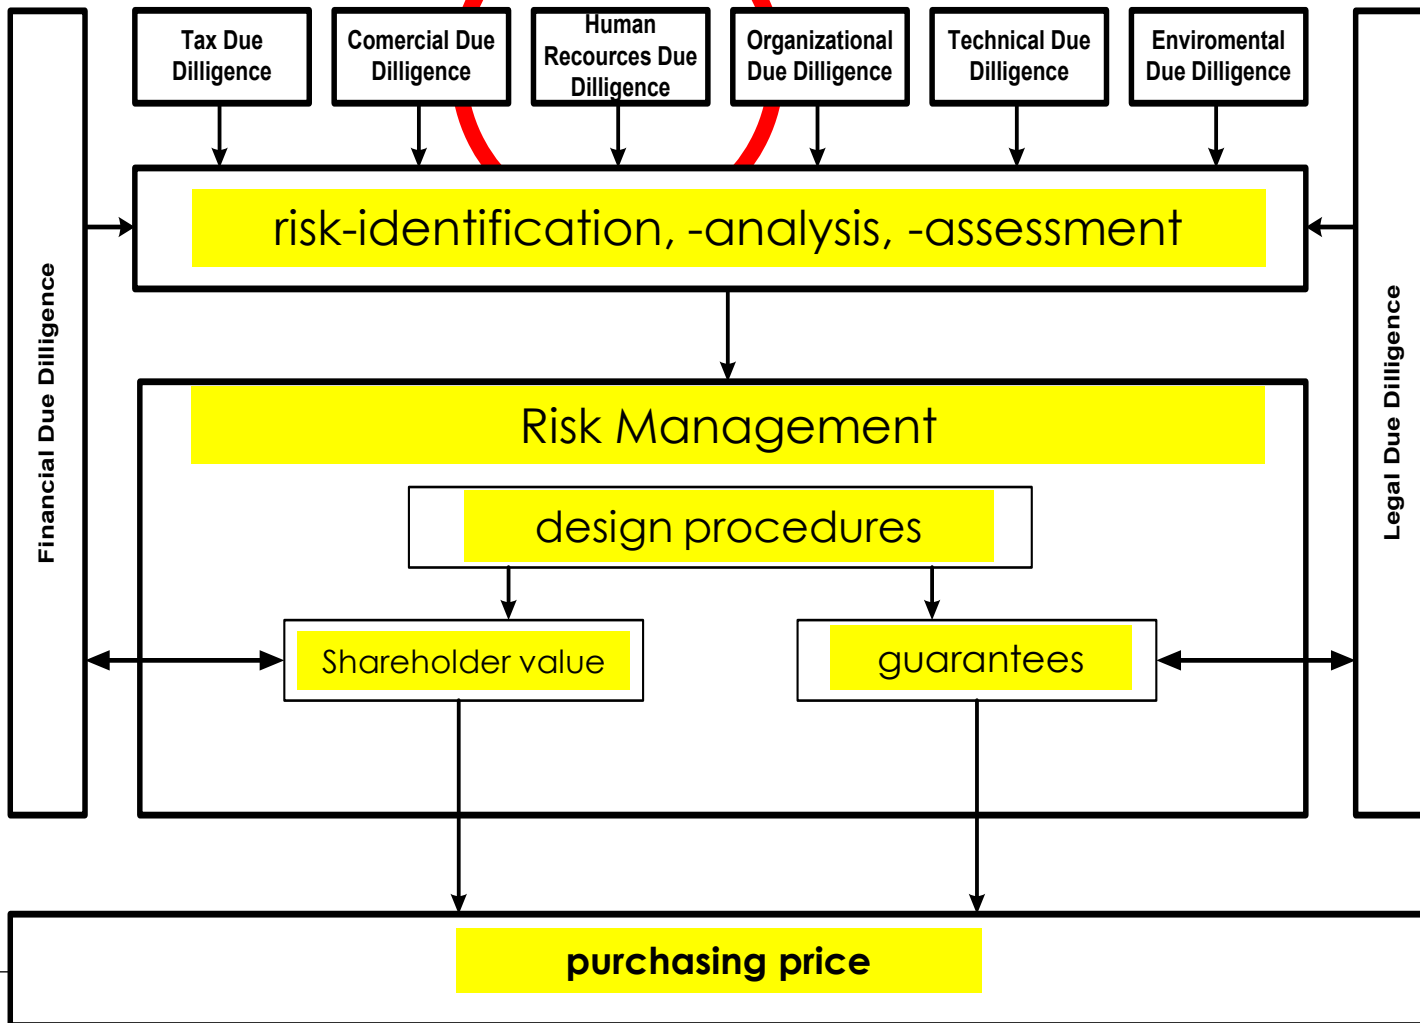

„The Knowledge-Product – anchor point
of business process oriented
Knowledge Management“

- Use case and product
- HC relations and skills
- Processes and structures
- Ressources and support

Relation HC and Risk Management (RM) for organisational development

CORPORATE COMPLIANCE

All measures designed to ensure the correct conduct of a company, its management and supervisory bodies and its employees.

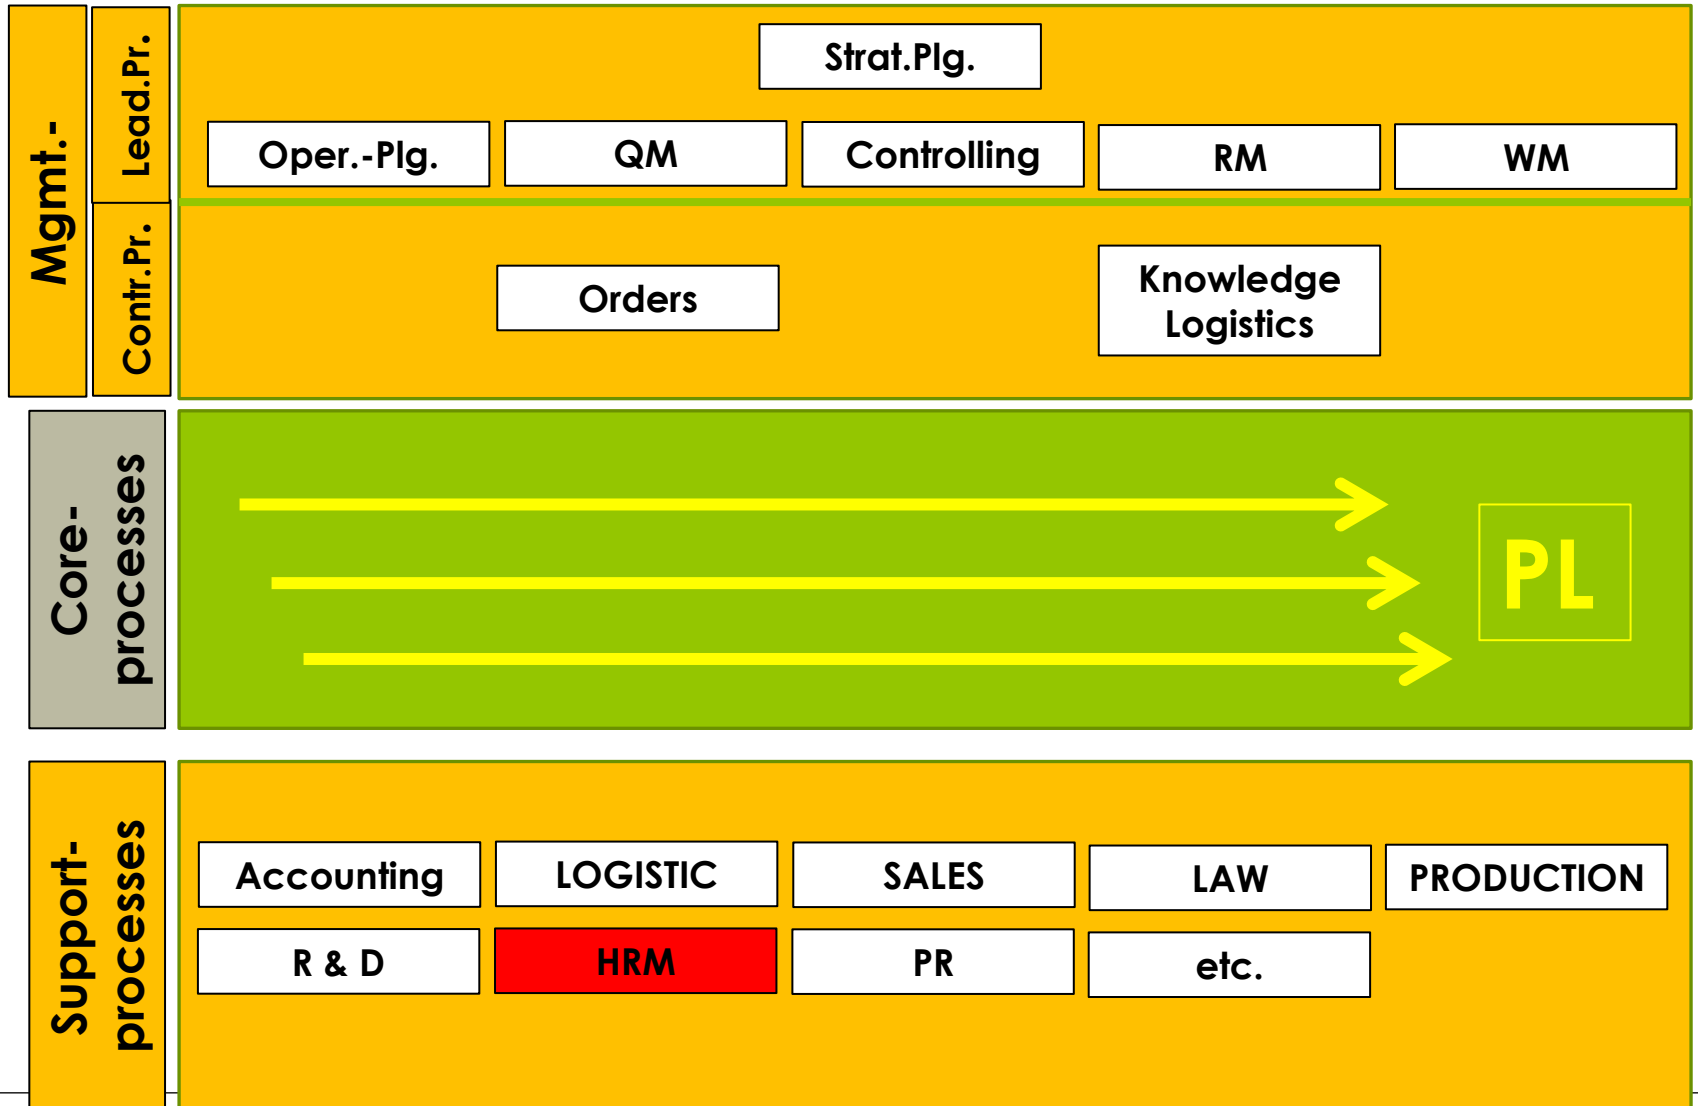

The main task of the Board / CEO is to ensure that:

- organizational measures, training and controls and**
- the correct conduct of the company and its employees**

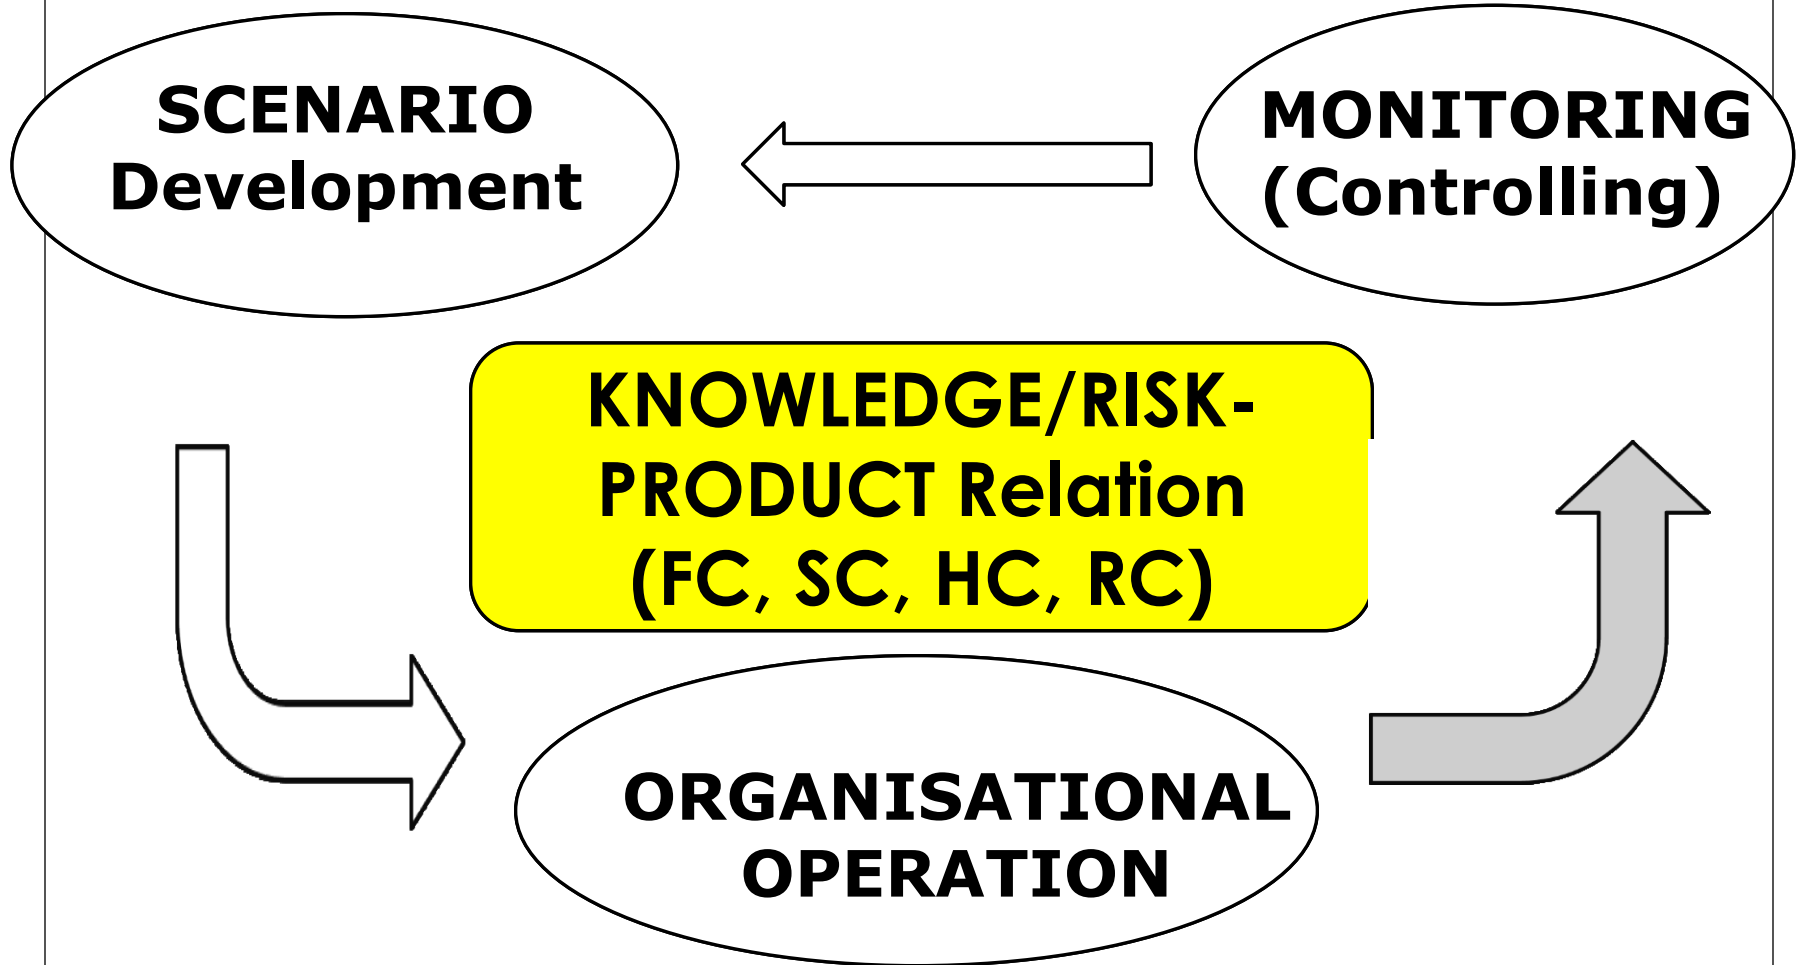

is ensured.

The company should be protected from claims for damages and judicial and administrative authorities penalties.

Mitglieder der »Superzelle« im Inneren des Netzwerks kontrollieren fast 40 Prozent des Vermögens aller transnationalen Firmen

Human Capital - Ideas

for instance:

- Prof. Eduard E. Lawler III, USA, Development: **Human-Capital-Measurement** 1970-1980 as well as political implications for enterprises, shareholder and state,
- Prof. David P. Norton, USA, developed **Balanced Scorecard under the criteria of measurement of Intangible Assets**,
- The book: „**Humanvermögensrechnung**“ von Dr. Herbert Schmidt im Jahr 1974 and
- **Flamholt s Buch: Human Resource Accounting, published 1974,**
- **Introduction of Human Resource Accounting (HRA) at Barry Corporation, USA, 1972,**
- **HC-Measurements at the enterprise SKANDIA** (Skandia Navigator)
- HYPO-BANK, Germany, Realisation of the **Human-Capital-Measurements via Employee-Value-Index (EVI) 1990,**
- Buck Consultants of Mellon Financial: Development of a **EVi-Expected Value of the individual** (EVi represents the value of a individual for the organisation as minimum of the expected partitional contribution to the profit of the organisation)
- Intellectual Capital Report (Wissensbilanz) of the Austrian Research Centers ARC (2003)
- **Intellectual Capital Report-Act** (Wissensbilanz) for Austrian Public Universities (2004)

Scandia Navigator:

Human Capital - Models

- **Input Models:** value of the HC = in employee invested sum of money
- **Output Models:** value of the HC = from employee earned profits
- **Comparison Value Models:** value of the HC = difference between at the employment market potentially achievable value and the transacted investments
- **Indicator Models:**
 - often only listings of indices
 - mostly approximations

scheme of HC-models

○ **Input Models:**

- HumanAssetWorth (Mayos 2001)
- Value Added Intellectual Coefficient (Public 1998/2000)

○ **Output Models:**

- Accounting for the Future (Nash 2003)
- Calculated intangible Value (NCI Research, Stewart 1997)
- Human Capital Pricing Model (Bender/Röhling 2001)
- ROI on Human Capital (Fitzenz 200)
- Knowledge Capital Scoreboard (Lev/Bothwell 2001)
- EVi - (expected value of the individual) (Buck Consultants)

scheme of HC-models

o Comparison Value Models:

- o Excellence Modell (EFQM) (European Foundation for Quality Management, Brüssel)
- o Global Human Resources Survey Report (PriceWaterhouseCooper, 2003)
- o TRI*M Index (NFO Infratest)
- o Overall Human Capital Index (Watson Wyatt)
- o Ranking: Attractive Employer (Hewitt 2001)
- o Value Creation Index (Cap Gemini Ernst & Young, 1997/2000)
- o CIPD Framework (Scarborough/Chartered Institute of Personnel & Development 2003)
- o Intellectual Capital Ranking (Edvinsson 2000)
- o Human Capital Value (Human-Capital-Club e.V. Munich, Ge, 2003)
- o Intellectual Capital Audit (Brooking 2000)

scheme of HC-models

- **Indicator Models:**

- Intangible Assets Monitor (Sveiby 1986/87)
- Skandia Navigator (Edvinsson 1991)
- Intellectual Capital Navigator (Stewart 1995)
- Human Resource Scorecard
(Becker/Huselid/Ulrich 2001)
- Human Capital Indicator (Mercer 2001)
- Werttreiber-Modell (Wucknitz 2002)
(value driver-Model)

scheme of HC-models

- o Saarbrücker Formel (formula):

Practical example

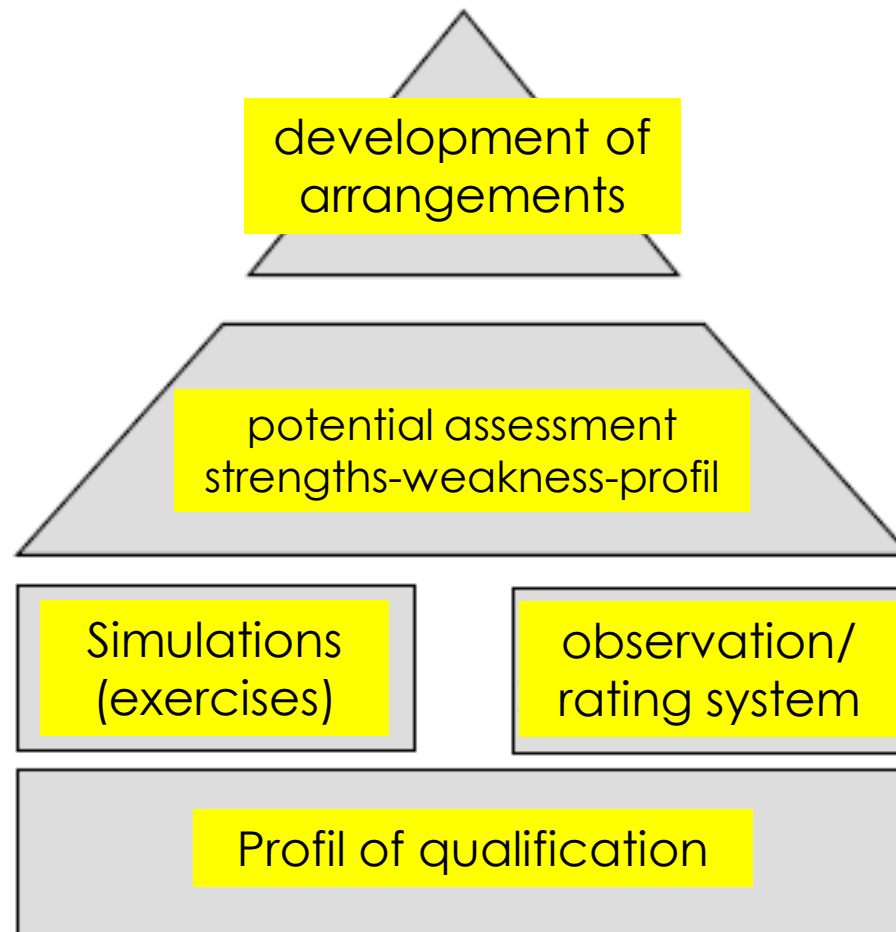

- competence profiling:
 - social competences
 - personal competences
 - professional competences
 - technique competences
