Download MySQL Community Server

MySQL Community Edition is a freely downloadable version of the world's most popular open source database that is supported by an active community of open source developers and enthusiasts.

MySQL Cluster [Community Edition](#) is available as a separate download. The reason for this change is so that MySQL Cluster can provide more frequent updates and support using the latest sources of MySQL Cluster Carrier Grade Edition.

Installation

Installation Complete

Choosing a Setup Type

Please select the Setup Type that suits your use case.

- Developer Default**
Installs all products needed for MySQL development purposes.
- Server only**
Installs only the MySQL Server product.
- Client only**
Installs only the MySQL Client products, without a server.
- Full**
Installs all included MySQL products and features.
- Custom**
Manually select the products that should be installed on the system.

Setup Type Description

Installs the MySQL Server and the tools required for MySQL application development. This is useful if you intend to develop applications for an existing server.

This Setup Type includes:

- * MySQL Server
- * MySQL Workbench
The GUI application to develop for and manage the server.
- * MySQL for Excel
Excel plug-in to easily access and manipulate MySQL data.
- * MySQL for Visual Studio
To work with the MySQL Server from VS.
- * MySQL Connectors
Connector/Net, Java, C/C++, ODBC and others.

Configure MySQL Server as a Windows Service

Windows Service Details

Please specify a Windows Service name to be used for this MySQL Server instance. A unique name is required for each instance.

Windows Service Name:

Start the MySQL Server at System Startup

Run Windows Service as ...

The MySQL Server needs to run under a given user account. Based on the security requirements of your system you need to pick one of the options below.

Standard System Account
Recommended for most scenarios.

Custom User
An existing user account can be selected for advanced scenarios.
