Yam, J., & Skorburg, J. A. (2021). From human resources to human rights: Impact assessments for hiring algorithms. *Ethics and Information Technology*, 23(4), 611–623. <https://doi.org/10.1007/s10676-021-09599-7>

Yam and Skorburg (2021) explore the ethical and moral implications of artificial intelligence (AI) when employed in hiring algorithms. The transition from traditional human resources considerations requires the establishment of a framework to assess how algorithms impact various aspects of human rights. By scrutinizing the ethical challenges associated with algorithmic hiring, the paper provides valuable insights for the ongoing discourse on the responsible and equitable use of technology in employment practices. This work contributes to the discussion among scholars, practitioners, and policymakers, aiming to ensure that algorithms in hiring align with human rights principles.

<Citation using APA style>

<Annotation (write 120-140 words)>
