

## ASSIGNMENT No 1

### A 5- MINUTE POWERPOINT LECTURE– POPULAR SCIENTIFIC TOPIC

You are a secondary school teacher. You need to explain to your 18-year old students the basics of the popular scientific topic given to you by your teacher.

⇒TASK: Give a **five-minute** PowerPoint lecture. In your lecture you will

- explain a specialist topic but present it in a way comprehensible to the layman.
- use the facts given to you by your teacher. If necessary you can omit some information or expand it by using information from other sources.
- use visual aids.
- share your personal interest in this topic.
- emphasize how your students will benefit from having this information.
- include questions for the audience to test YOU if you have done a good job explaining it.
