# Financial system

---

**Definition:** *In finance, the FS is the system that allows the transfer of money between savers and borrowers. It comprises a set of complex and closely interconnected financial institutions, markets, instruments, services, practices, and transactions.*

# Function of FS

---

- ❑ Transferring money
- ❑ Share risk
- ❑ *to clear and to settle payments;*
- ❑ *to aggregate and to disaggregate wealth and flows of funds bringing together large/small-scale investors with savers;*
- ❑ *to shift financial resources over time, space and industries;*
- ❑ *to accumulate, to process and to disseminate information for decision making purposes;*
- ❑ *to provide ways for managing uncertainty and controlling risk.*

# Form of FS

---

Great variety of FS in different countries.

e.g.

USA

Germany

# Spending sector (Macroeconomic)

---

- Household
- Business Firms
- Government
- Foreign Sector

# Surplus spending units

---

- ❑ Has more cash income flow than expenditure
- ❑ Other terms for SU – saver, lender,...
- ❑ The SU may buy financial assets, hold more money, ...
- ❑ Usually Household and foreign sectors

# Deficit spending units

---

- ❑ Has more expenditures on consumption and real goods
- ❑ Must participate in the financial sector
- ❑ Borrower, demander of loanable funds, and seller of securities

# Financial claims

---

- ❑ Contracts related to the transfer of funds;
- ❑ Financial assets and liabilities, securities, loans and financial investment;
- ❑ Every FA an offsetting FL.

# The flow of funds diagram

---

# Financial intermediaries

---

Channeling funds between surplus and deficit agents (Banks, Insurance companies, ....).

# Major function of intermediaries

---

- Maturity transforming
- Risk transforming
- Convenience denomination

# Advantages of FI

---

## ❑ Cost advantage:

- ❑ *Reconciling conflicting preferences of lenders and borrowers*
- ❑ *Risk aversion intermediaries help spread out the risk*
- ❑ *Economies of scale – reducing costs of lending and borrowing*
- ❑ *Economics of scope - intermediaries concentrate on the demands of the lenders and borrowers and are able to enhance their products and services*

## ❑ Market failure protection
