

Jak změnit cestu k souboru?

Prostředí Power BI se s novou verzí změnilo, ale postup je pořád stejný.

Varianta 1.

1. Vyberu krok source u každé tabulky

The screenshot shows the Power Query Editor interface. The main area displays a table with 8 rows and 5 columns. The columns are labeled 'Name', 'Data', 'Item', 'Kind', and 'Hidden'. The rows contain data for 'Country', 'Manufacturer', 'Sales', 'Product', 'bi_salesFact', and two database filters. The 'APPLIED STEPS' pane on the right shows a list of steps: 'Source', 'Navigation', 'Promoted Headers', 'Changed Type', and 'Appended Query'. The 'Source' step is highlighted with a red circle and a red arrow pointing to it from the left.

A ^B C	Name	Data	A ^B C	Item	A ^B C	Kind	Hidden
1	Country	Table	Country	Country	Sheet	FALSE	FALSE
2	Manufacturer	Table	Manufacturer	Manufacturer	Sheet	FALSE	FALSE
3	Sales	Table	Sales	Sales	Sheet	FALSE	FALSE
4	Product	Table	Product	Product	Sheet	FALSE	FALSE
5	bi_salesFact	Table	bi_salesFact	bi_salesFact	Table	FALSE	FALSE
6	_xinm_FilterDatabase	Table	Country_xinm_FilterDatabase	Country_xinm_FilterDatabase	DefinedName	TRUE	TRUE
7	_xinm_FilterDatabase1	Table	Sales_xinm_FilterDatabase	Sales_xinm_FilterDatabase	DefinedName	TRUE	TRUE
8	ExternalData_1	Table	Sales!ExternalData_1	Sales!ExternalData_1	DefinedName	TRUE	TRUE

2. Pokud na krok klepnu 2x nebo pokud klepnete na ozubené kolečko, tak se objeví nový dialog pro vybrání cesty k souboru. Dám Browse a vyberu správně cestu k souboru.

The screenshot shows the Power Query Editor interface. The main window displays a table with 5 columns and 8 rows. The columns are labeled 'Name', 'Data', 'Item', 'Kind', and 'Hidden'. The rows contain data for 'Country', 'Manufacturer', 'Sales', 'Product', and 'bi_salesFact'. A dialog box titled 'Excel' is open, showing the 'Basic' tab. The 'File path' field contains the path 'E:\Users\Adela\OneDrive - Intelligent Technologies, s.r.o\Czechitas\DA Brn'. The 'Browse...' button is circled in red. The 'Open file as' dropdown is set to 'Excel Workbook'. The 'QUERY SETTINGS' pane on the right shows the 'PROPERTIES' and 'APPLIED STEPS' sections.

A ^B C	Name	Data	A ^B C	Item	A ^B C	Kind	Hidden
1	Country	Table	Country	Sheet	FALSE		
2	Manufacturer	Table	Manufacturer	Sheet	FALSE		
3	Sales	Table	Sales	Sheet	FALSE		
4	Product	Table	Product	Sheet	FALSE		
5	bi_salesFact	Table	bi_salesFact	Table	FALSE		

*Můžete cestu k souboru měnit i rovnou v kódu, jde jen o to tam správně vložit cestu do složky, která obsahuje excely ☺.

Varianta 2.

1. Klepnu na data query settings a klepnuna change source.

The screenshot shows the Power BI Desktop interface. The ribbon is set to 'Data Sources'. The 'Data source settings' button is circled in red. A dialog box titled 'Data source settings' is open, displaying a list of data sources. The 'Change Source...' button at the bottom of the dialog is also circled in red.
