Masaryk University

March 5, 2009

Assignment

- Download DirectoriesUIExample.exe from study materials <https://is.muni.cz/auth/el/1433/jaro2009/PV178/um/other/>
- Create an application with the same features
 - “Browse” allows user to chose folder, the content is then showed in a ListBox
 - “Is directory?” determines whether a selected item is a directory or file.
 - “Last access” shows when the selected item was last accessed
- Localize the application to the languages you can speak :-)
- Start with GUI design, then continue with the application logic

Hints

- Classes `TextBox`, `ListBox`, `Button`, `FolderBrowseDialog`, `MessageBox`, `FileSystemInfo`, `Directory`
- Enums `DialogResult`, `FileAttributes`
- Events `Click`, `SelectedIndexChanged`
- Properties `Enabled`, `Items`, `SelectedIndex`, `SelectedPath`, `Attributes`
- Methods `ShowDialog`, `GetFileSystemInfos`
