

- A) This text is from a YouTube Let's Play video covering an Alien vs. Predator (AVP) game; the bulk of the text focuses on the technical aspects of the recorded video. Read the text once and figure out the main points the YouTuber is trying to make. Then revise it in groups. Focus on grammar, vocabulary, punctuation and paragraphs; however, try to keep your rewrite as close to the original text as you can.**

I decided to retrace one piece again, no video instructions again. The reason is simple. Previous older videos from the video instructions below AVP so strong and of good quality in HD resolution. In addition, old videos were played under Directx 9 at the highest dx 10 to nothing much. I was weak, 1280x720 resolution, although the standard may not suit everyone. Therefore, the game was playing in a better resolution of 1440 x 900th I had to create everything again. And play the game at maximum detail and most importantly you can not wait the full support of DirectX 11 Older video games are not played under the AVP dx 11th Even the video quality is not perfect: - /

So I embarked on a new video guide that should have everything from the maximum extension of the graphic to better resolution: 1440x900 is still, unfortunately in Full HD 1080th Which might not matter. To repeat play, and not shooting at the same difficulty as I did change. As a bonus, adding that this game is something extremely difficult to finish the difficulty: Nightmare. It's pretty easy you just think about it more on your strategy and play with more enthusiasm. And then you will finish it completely , -)

- B) The following exercises focus on the article titled "Millions of Facebook users have no idea they're using the internet."**
- a. Try to come up with a summary of the article in one sentence (do not copy the title!)
 - b. Look at the "Internet users and Facebook users" chart. Imagine you are using the chart in your research. Write one sentence that discusses the data in the chart. Do not forget to reference the chart itself!
 - c. Look at the text from the article. Complete the text with necessary punctuation marks.
 - d. Look at the "Regional contribution of Facebook users and revenue" chart. What does it show? Try to come up with a few sentences summarizing the data in the chart.

Text:

At Davos this year Sandberg told the well heeled crowd that in the developing world people will walk into phone stores and say I want Facebook. People actually confuse Facebook and the internet in some places. Or as Iris Orriss Facebooks head of localization and internationalization has put it Awareness of the Internet in developing countries is very limited. In fact for many users Facebook *is* the internet as its often the only accessible application.
