The Private Course Management System (PCMS) is the web base system which helps to organize course/seminar for private lecturer and the organizer. The lecturer registers on the website and choose or offer which course and which date is available. The organizer will manage all the list of the course from the lecturer that reach the minimum requirement to be held. The student will choose which course the student want to attend and has to pay for it.

Added new subprocess to handle failure during the transaction for student and if there is error this subprocess will catch it and send the error message to the Bank as the third party involved during the transaction.

The new condition to handling the failed transaction fee for the lecturer also added to the system.
