# SIMILARITY SEARCH

## The Metric Space Approach

---

Pavel Zezula, Giuseppe Amato,  
Vlastislav Dohnal, Michal Batko

---

# Table of Content

## Part I: Metric searching in a nutshell

- Foundations of metric space searching
- Survey of exiting approaches

## Part II: **Metric searching in large collections**

- Centralized index structures
- **Approximate similarity search**
- Parallel and distributed indexes

---

# Approximate Similarity Search

1. **relative error approximation**
2. good fraction approximation
3. small chance improvement approximation
4. proximity-based approximation
5. PAC nearest neighbor searching
6. performance trials
