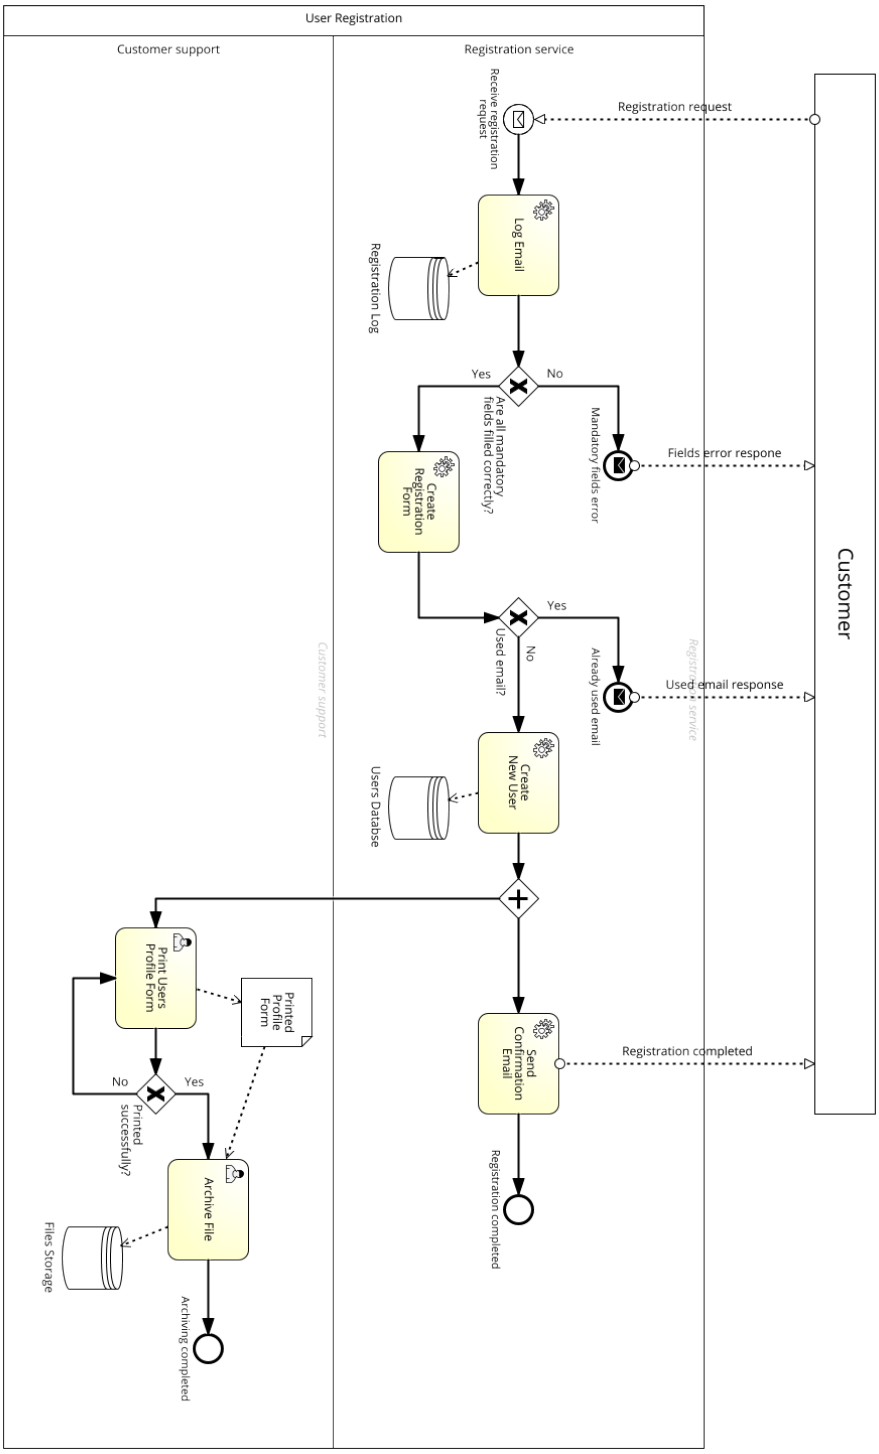
Homework 1: BPMN 2.0 Level 1

UČO: 527383
Meno a priezvisko: Tomáš Budáč



Total result: 8 out of 8

Custom user registration

Service customers can make registration to the system. Every registration request logs email address. All mandatory registration fields have to be filled correctly. Email address have to be checked for duplicity. If email is already used, the registration is cancelled. If email is unique, the system saves a new user. When a new user is created, customer support have to print and archive users profile form. When a user is saved, the system sends a confirmation email to customer.
