

# Internet of Hyperconnected Things

Bacem Mbarek, Ph.D.

Masaryk University, Czech Republic  
Lasaris Lab ( Lab of Software Architectures and Information Systems)

IoT refers to systems that involve computation, sensing, communication, and actuation (Ref. NIST SP 800-183)

### IETF IoT Protocol Stack

### TCP/IP Protocol Stack

Application Layer

IETF COAP

HTTP, FTP, DNS, SSH, SMTP, NTP, ...

Transport Layer

UDP

TCP, UDP

Network Layer

IPv6, IETF RPL

IPv4, IPV6

Adaption Layer

IETF 6LoWPAN

N/A

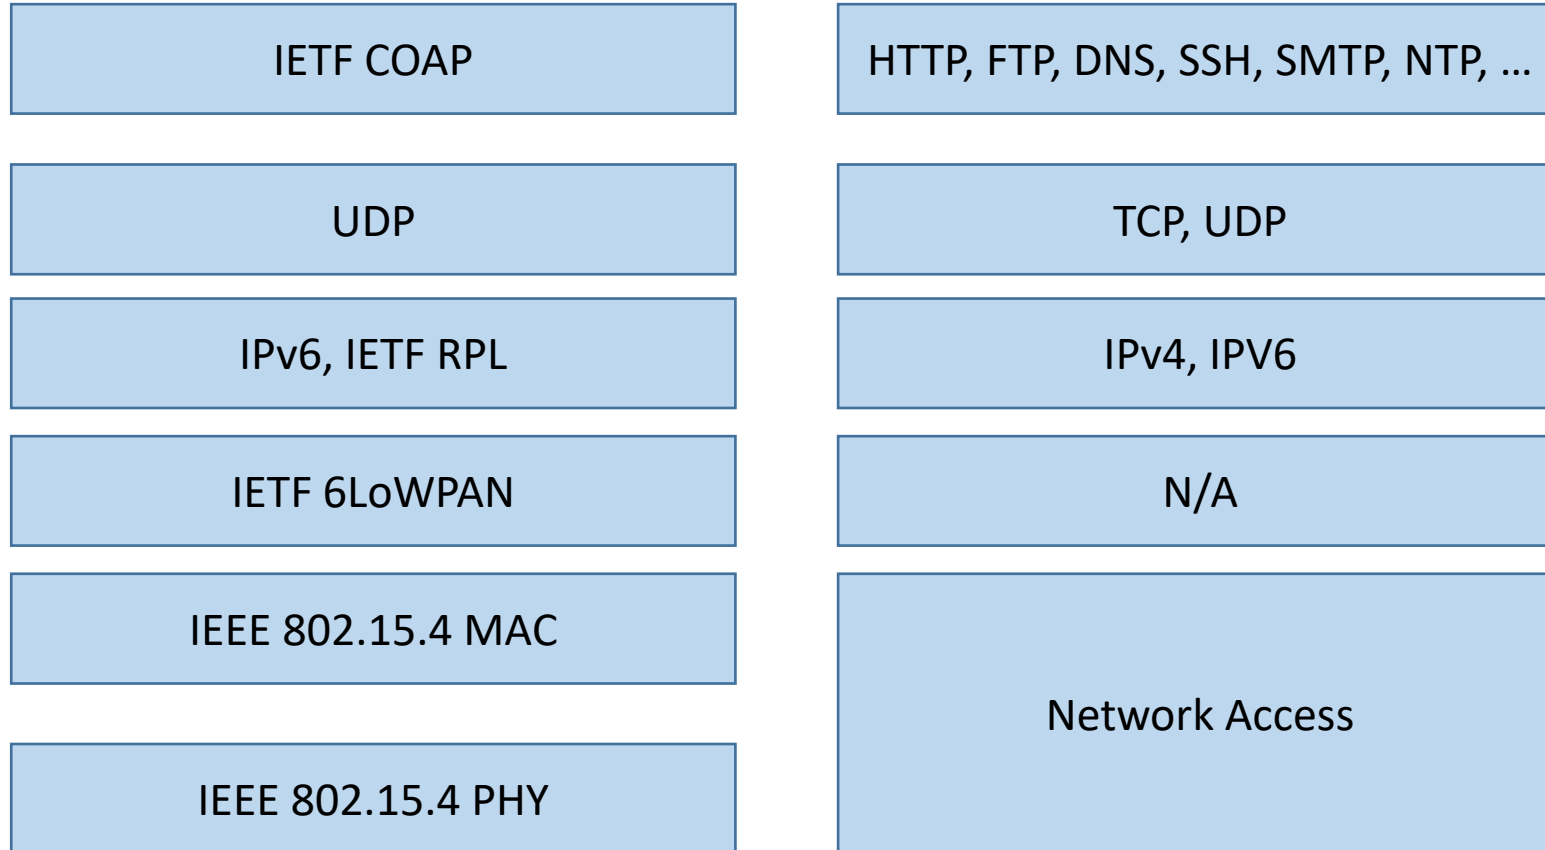

MAC Layer

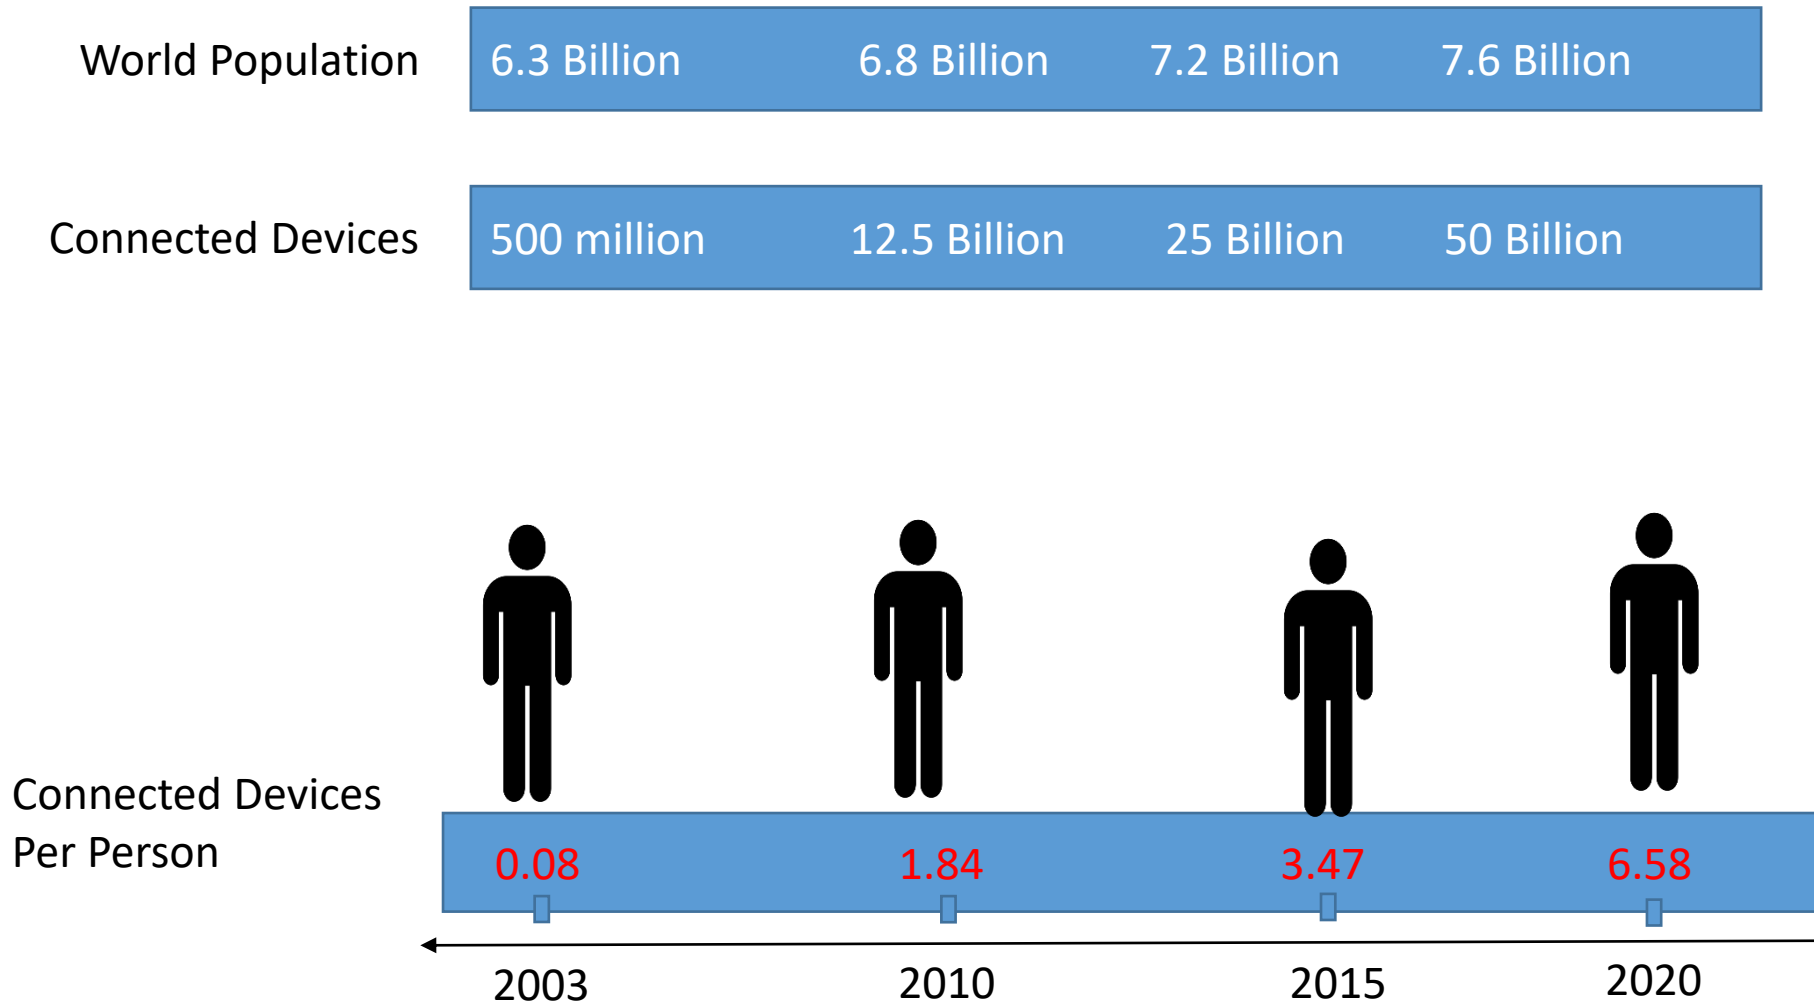

IEEE 802.15.4 MAC

Network Access

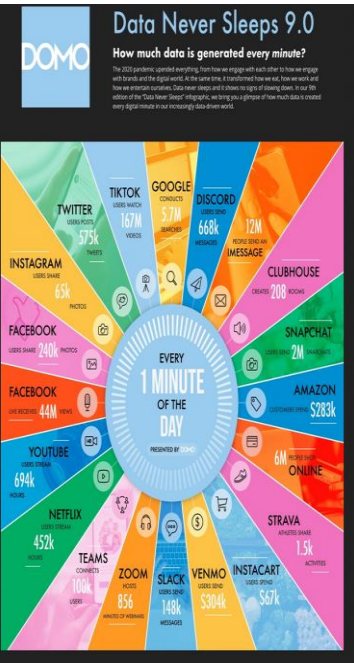

Physical Layer

IEEE 802.15.4 PHY

Rank	Country/Territory	Unconnected People	% of Population
1	India	685,591,071	50%
2	China	582,063,733	41%
3	Pakistan	142,347,735	65%
4	Nigeria	118,059,352	58%
5	Bangladesh	97,427,352	59%
6	Indonesia	96,709,226	36%
7	Ethiopia	92,385,728	81%
8	Democratic Republic of Congo	71,823,319	81%
9	Brazil	61,423,295	29%
10	Egypt	46,626,170	46%

# Current radio technologies

**By 2022, Narrowband IoT (NB-IoT) will be the winner due to the ability of its MNOs to deliver reliability and coverage**

2 Countries

34 Countries

79 Countries

There is a small- and rapidly closing- window to ensure that IoT is adopted in a way that maximizes security and minimizes risk. If the country fails to do so, it will be coping with the consequences for generations

- Incorporate Security at the Design Phase
- Advance Security Updates and Vulnerability Management
- Build on Proven Security Practices
- Prioritize Security Measures According to Potential Impact
- Promote Transparency across IoT
- Connect Carefully and Deliberately

# WHAT IS SECURITY

## DICTIONARY SAYS:

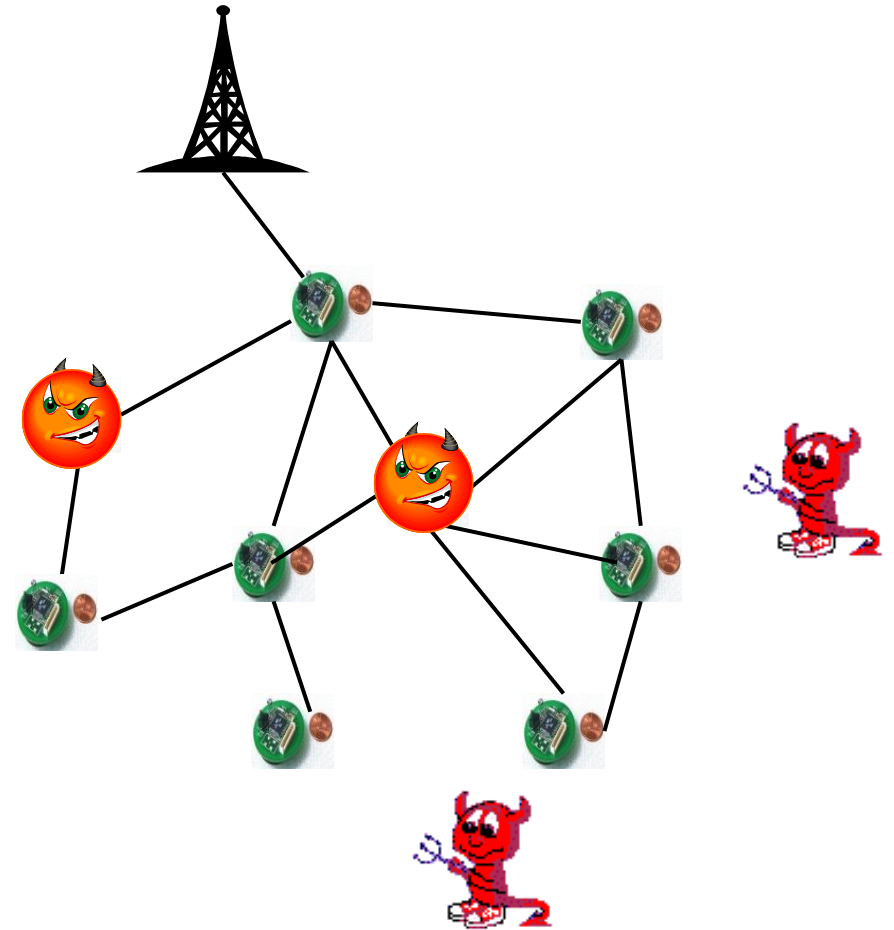

1. Freedom from risk or danger ; safety.
2. Freedom from doubt, anxiety and fear ; confidence.
3. Something that gives or assures safety , as:
  1. A group or department of private guards.
  2. Measures adopted by a government to prevent sabotage or attack.
  3. Measures adopted , as by a business or homeowner , to prevent a crime...... ETC

# WHO IS VULNERABLE?

- Financial institutions and banks.
- Internet service providers.
- Pharmaceutical companies.
- Government and defense agencies.
- Contractors to various government agencies.
- Multinational corporations.
- **ANYONE ON THE NETWORK.....**

IoT security is the **practice that keeps your IoT systems safe**
