

# 540701\_hotel

Give the end a meaningful name (eg Customer checked-in).

This should be the XOR merge gateway. The inclusive merge gateway should be in sync with the split inclusive gateway. -1

Do both tasks in parallel!

Result: 11

This system is designed for customers to check in at the grand hotel Brno. There are two types of customer, one who have pre-reservation and one who doesn't have pre-reservation, like walk-in customers.
