Fauxtimation

- ilúzia automatizácie
- prácu robia ľudia
- skrýva prácu
- väčšie zisky

Mechanický Turek

- člověk pod stolom ovláda stroj
- turek “hrá šach”
- vystavený v múzeu
- po zničení bolo vyzradené tajomstvo

Amazon “Just walk out”

- pomocou senzorov a kamier dokáže “AI” zistiť cenu nákupu
- verifikácia trvala hodiny, ľudia mali podozrenia
- 70 % transakcií verifikovali reálny ľudia

Self-service

- “automatizuje” pokladníkov
- v skutočnosti presúva prácu na zákazníka
- používané ako vyhrážka pre zamestnancov

Google Gemini

- demo AI modelu
- video ukazuje rýchlo reagujúce, schopné AI
- v skutočnosti boli nutné špecifické prompty

How about this one?

Gemini: I see a hand with two fingers extended, which is a common symbol for the number two.

But wait ... what if we asked Gemini to reason about all of these images *together*?

What do you think I'm doing? Hint: it's a game.

Gemini: You're playing rock, paper, scissors.

Why all the lies?

Iran Strikes Tel Aviv with Heavy Missiles

In a significant escalation of tensions, Iran launched a heavy missile attack on Tel Aviv, Israel, resulting in intense bombardment, fires, burning, and the destruction of several buildings. The attack is currently ongoing, with reports indicating that the missiles are causing widespread damage in the city.

Grok is an early feature and can make mistakes. Verify its outputs.

Otázky pre obecenstvo

- Je takýto typ “automatizácie” etický?
- Mali by za tieto činnosti byť podniky trestne stíhané?
- Myslíte, že existuje prípad kde by fauxtimation bolo etické?
