Last assignment - presentations

- Every team will make its own documentation & code available online
 - Upload to IS
- Other teams will make security analysis of the architecture and code (2 projects)
- Points will be awarded according to:
 - number and severity of the problems found in reviewed projects
 - quality of own architecture and code

Practical assignment

- React on problems found
 - Correct your specification
 - Fix bugs found in code
- Submit corrected version to IS
 - [Skupina krypto - 7. ukol \(review fix\)](#)
