

OFFLINE VEKTOROVÉ MAPY

Seznam.cz

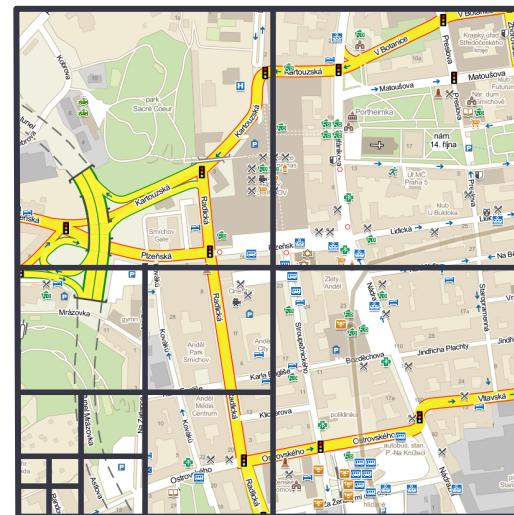

Ing. Lukáš Korba
www.mugeaters.com

Osnova

- Historie
- Vektory
- OpenGL
- Render
- Camera
- R-Tree
- Triangulace
- Texty
- Optimalizace
- Závěr

Historie - rastr

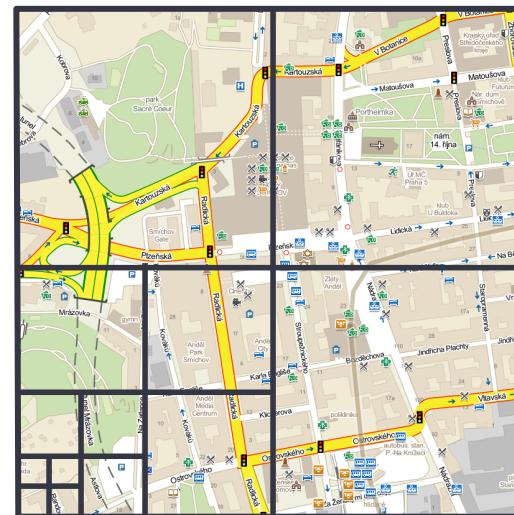

- Současný produkt ve všech mobilních zařízeních (iOS, Droid, Win)
- ale i tzv. velké mapy (www.mapy.cz)
- Proč nevyhovuje?

Historie - rastr

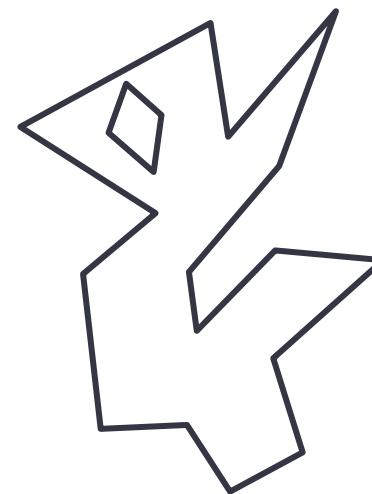

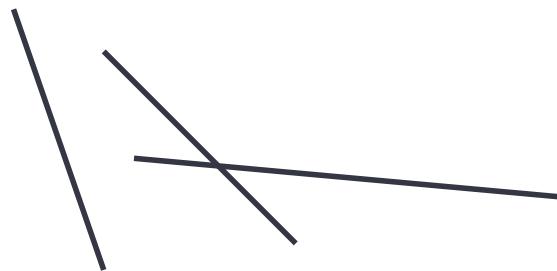

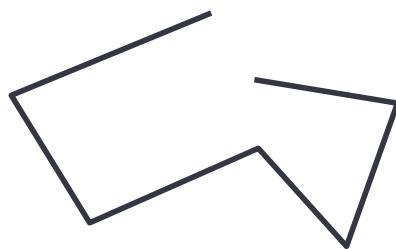

- Současný produkt ve všech mobilních zařízeních (iOS, Droid, Win)
- ale i tzv. velké mapy (www.mapy.cz)
- Proč nevyhovuje?

1. Objem dat
2. Rozlišení displaye
3. Striktně 2D
4. Nelze editovat

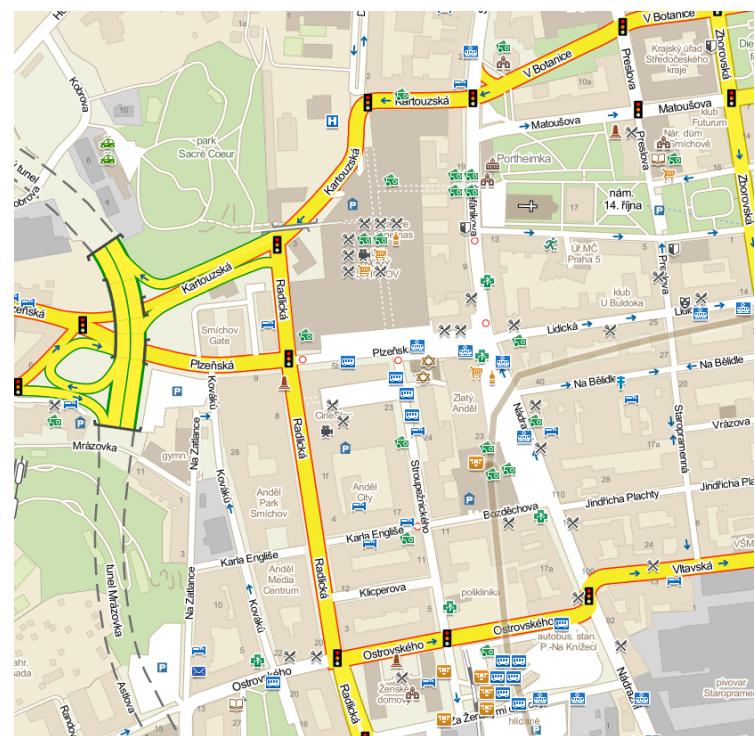

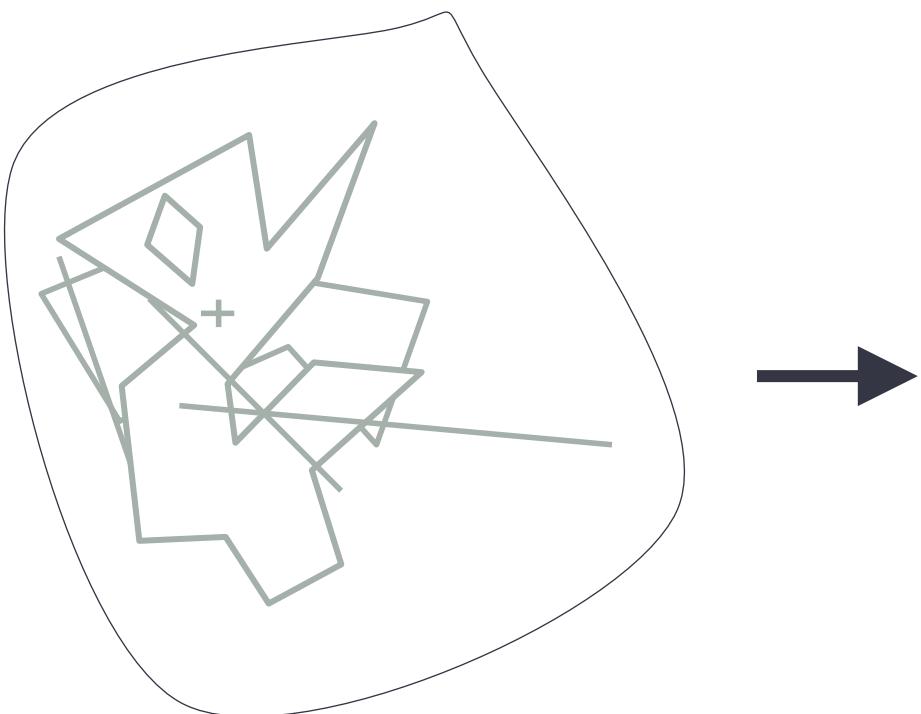

Vektory I

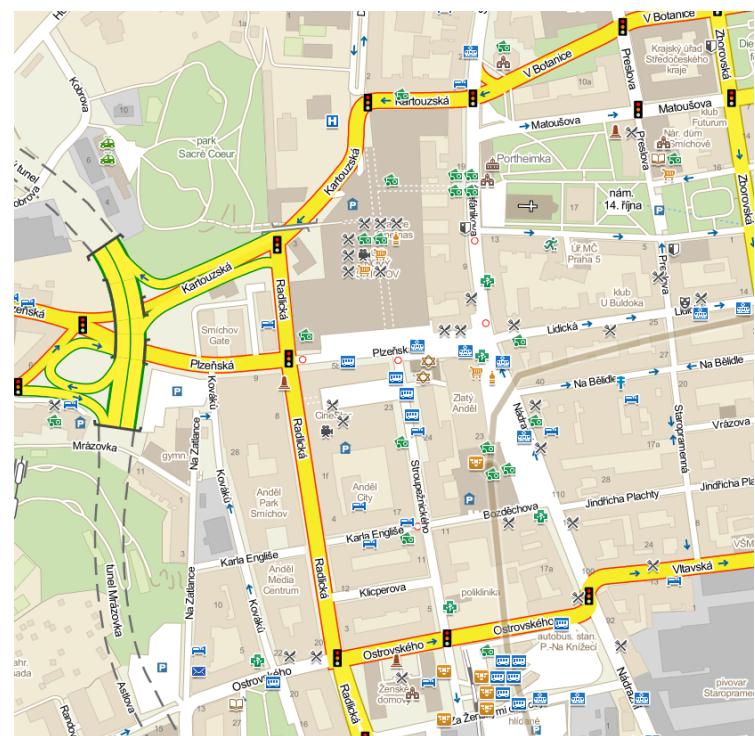

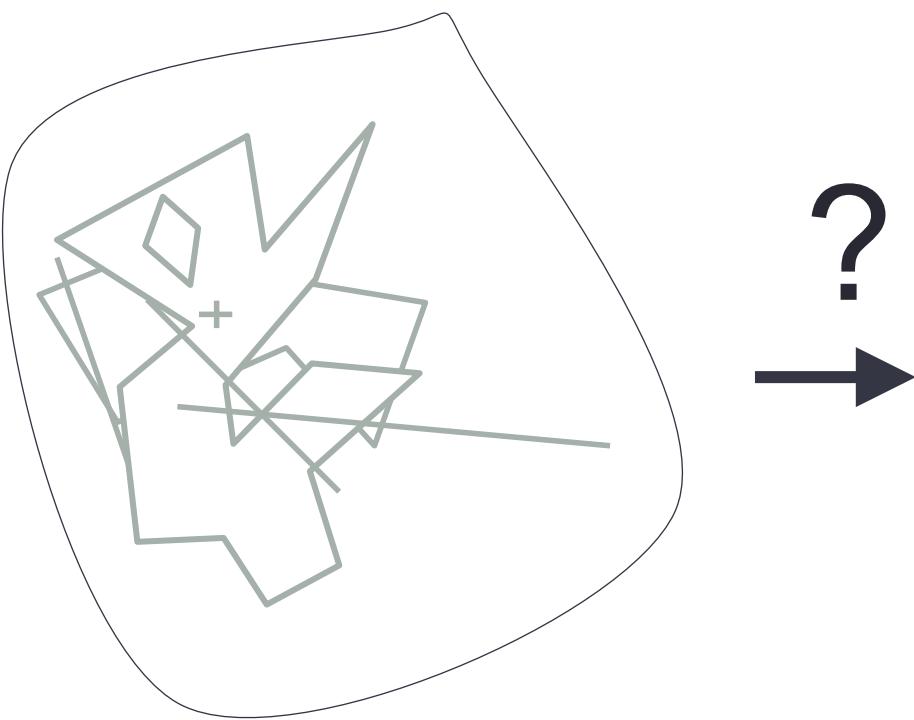

+

Vektory II

Vektory II

Vektory III

- Styly

```
<polygonsymbolizer fill="#f2f1e1" fill-opacity="1.0" gamma="1.0" symbolizerName="polygon_maskovaci_cr16"/>
<linesymbolizer stroke="#847f79" stroke-dasharray="none" stroke-linecap="butt" stroke-linejoin="miter" stroke-opacity="1" stroke-width="2.8"
symbolizerName="line_MOBmapa16-14_3tridy-ulice-casing_R38_0"/>
<textsymbolizer allow-overlap="true" angleRotate="0" avoid-edges="" character-spacing="" dx="" dy="" face-name="Arial Bold" fill="#057f0d"
fontset-name="" force-odd-labels="false" halo-fill="#f2f1e1" halo-radius="1" horizontal-alignment="middle" justify-alignment="" label-position-
tolerance="" line-spacing="" max_char_angle_delta="" minimum-distance="" minimum-padding="" minimum-path-length="" name=""
opacity="1.0" orientation="" placement="point" placement-type="" placements="" size="12" spacing=""
symbolizerName="text_MOBmapa10_exity-cislo_R0_0" text-radio="" text-transform="none" vertical-alignment="top" wrap-before="" wrap-
character="~" wrap-width="1"/>
<circlesymbolizer angleRotate="0" color="#ffffff" file="sym/kruh-3trida100-100.png" outlinecolor="none" outlinewidth="0.00" radius="24.50"
symbolizerName="circle_MOBmapa16-14_kruh-3trida-stredni_R0_0" transform="identity"/>
<textsymbolizer allow-overlap="true" angleRotate="0" avoid-edges="false" character-spacing="" dx="" dy="" face-name="Arial Bold"
fill="#000000" fontset-name="" force-odd-labels="false" halo-fill="#ffffff" halo-radius="3" horizontal-alignment="right" justify-alignment="left"
label-position--tolerance="" line-spacing="-2" max_char_angle_delta="" minimum-distance="" minimum-padding="" minimum-path-length="" name=""
opacity="1.0" orientation="" placement="point" placement-type="" placements="" size="31" spacing=""
symbolizerName="text_MOBmapa10_nazvy-sidel-multiline_R0_0" text-radio="" text-transform="none" vertical-alignment="middle" wrap-
before="" wrap-character="~" wrap-width="1"/>
```

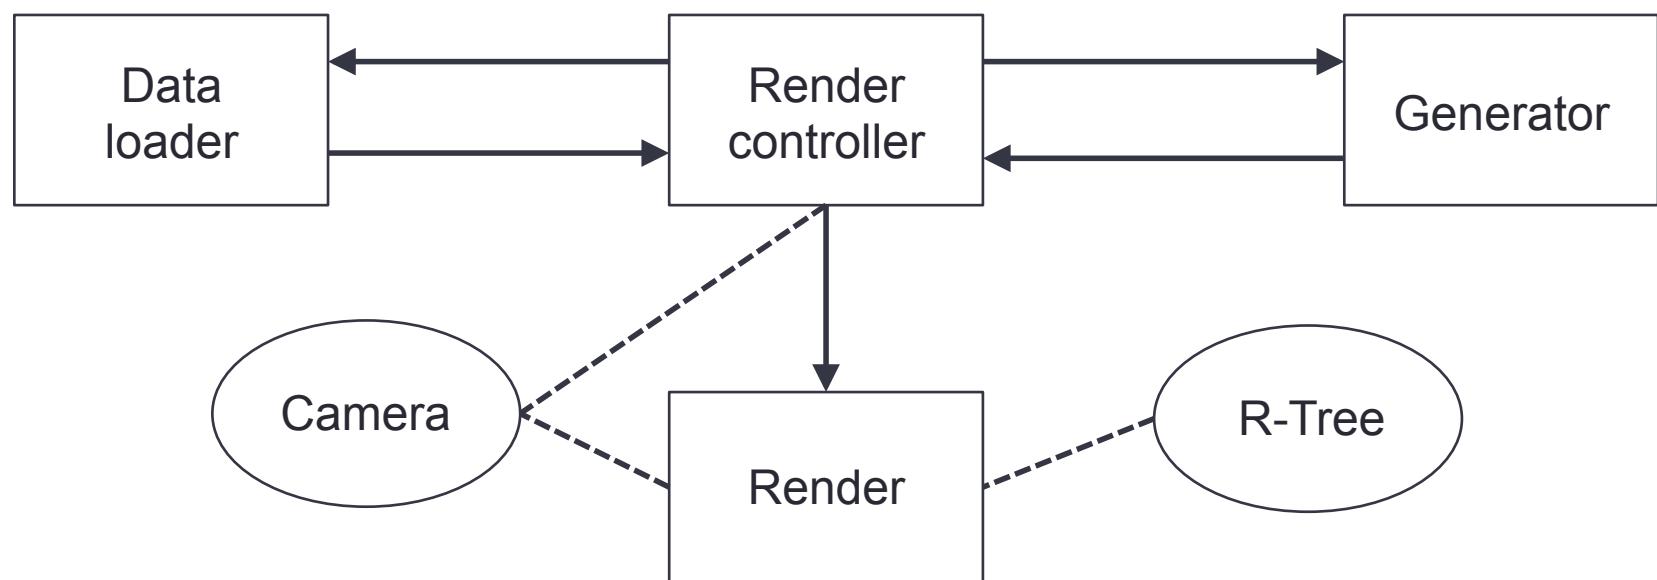

- Určují vzhled a pořadí

OpenGL

- OpenGL ES 1.1 – fixní pipeline
 - Nutnost řešit antialiasing
- OpenGL ES 2.0 – programovatelná pipeline
 - Multisampling
 - Shadery – verze 1.2, precision

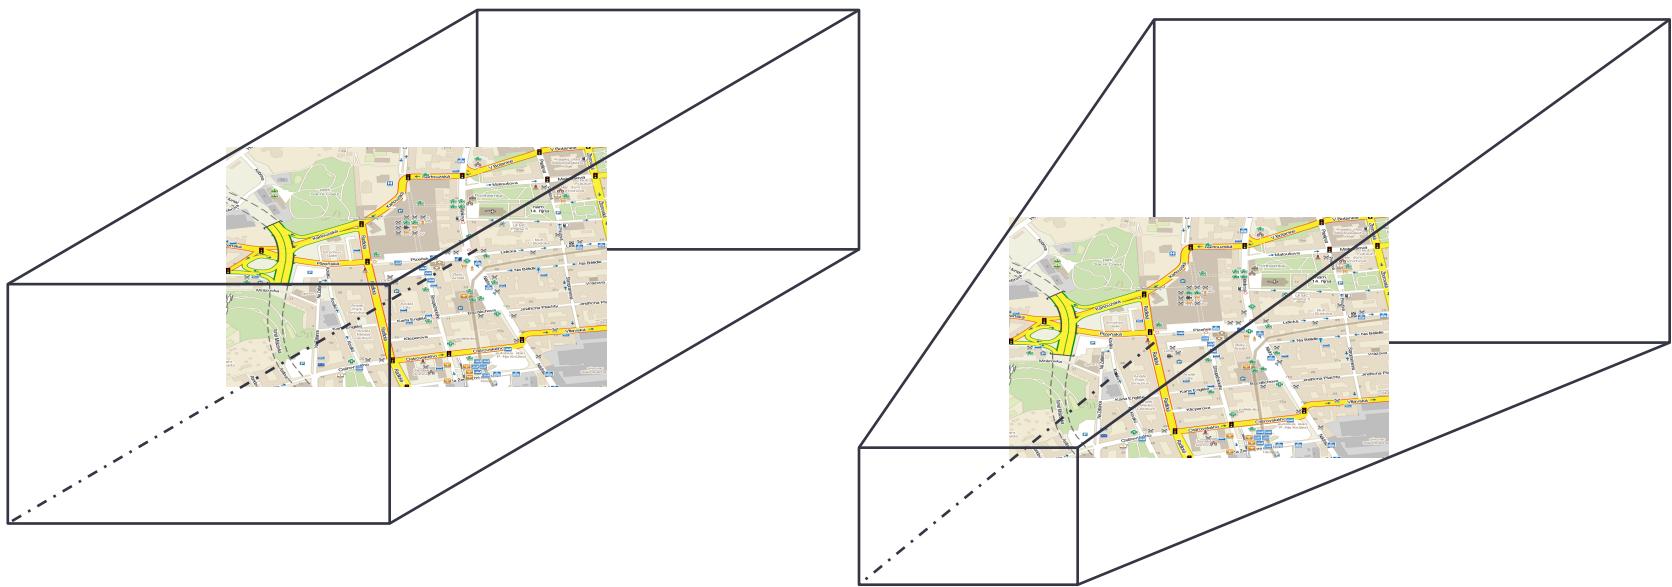

-
- OpenGL
 - Nejobecnější
 - Shadery dle grafické karty

Render

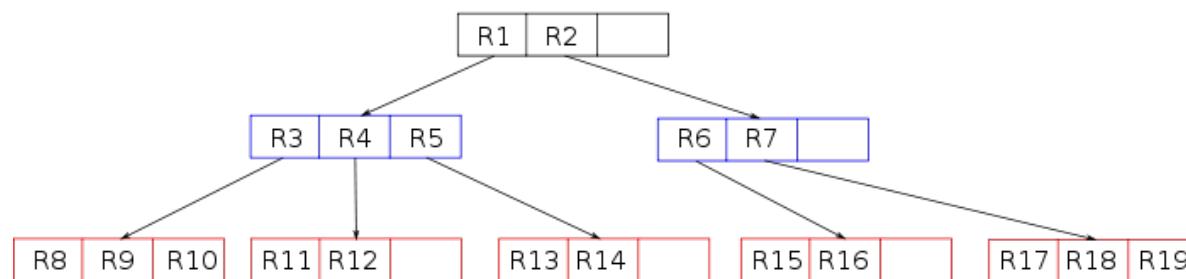

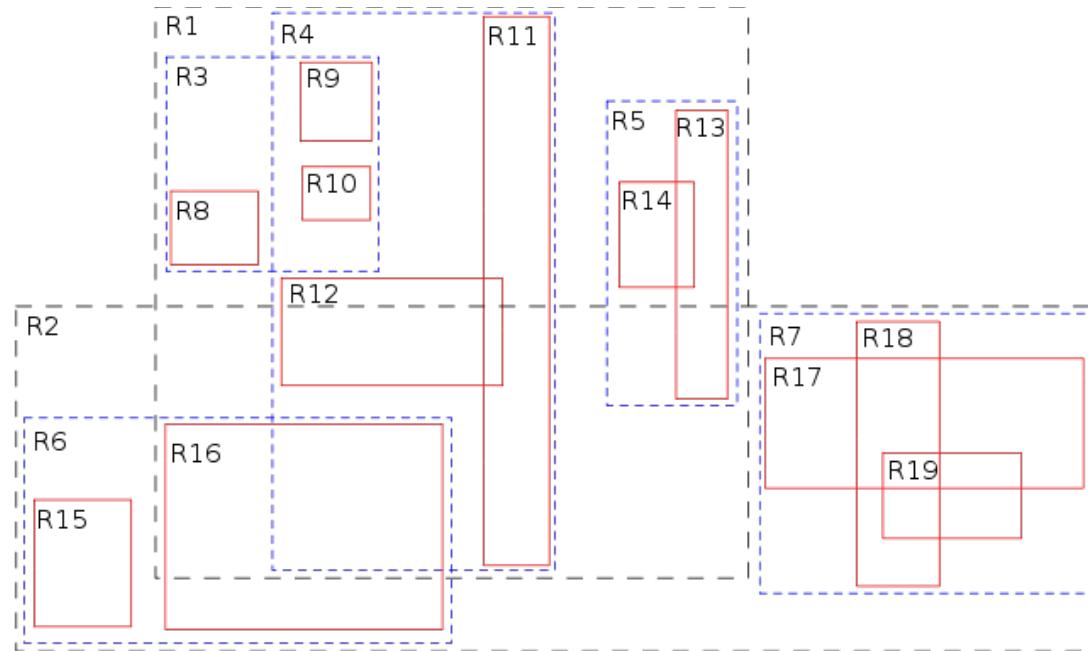

Camera

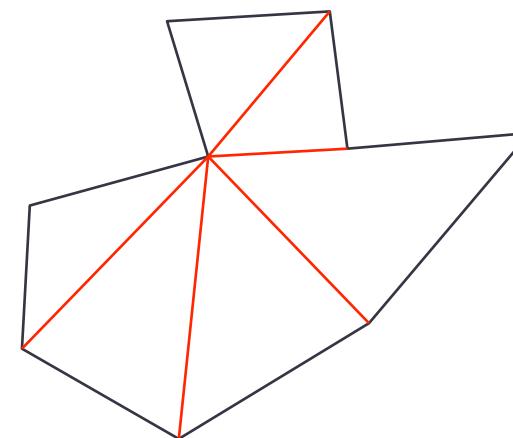

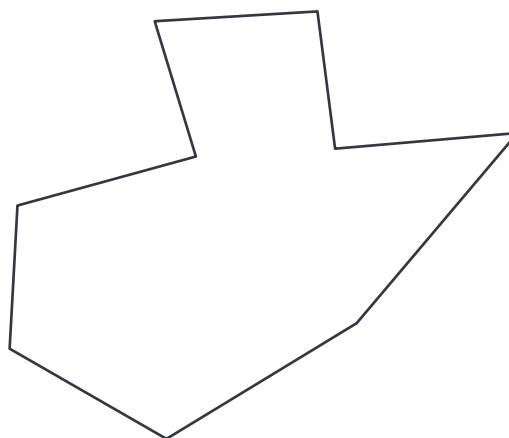

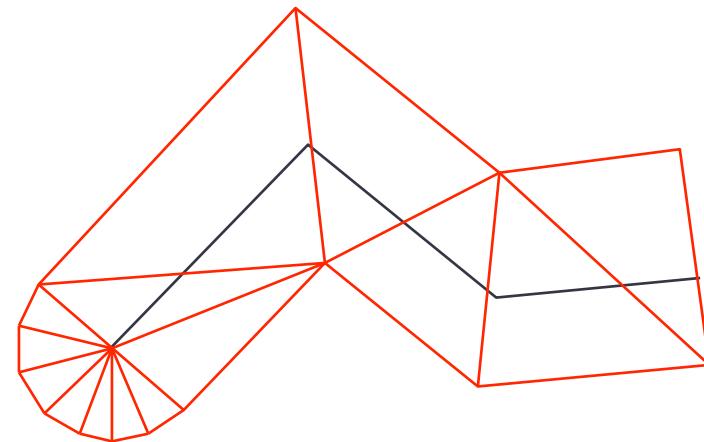

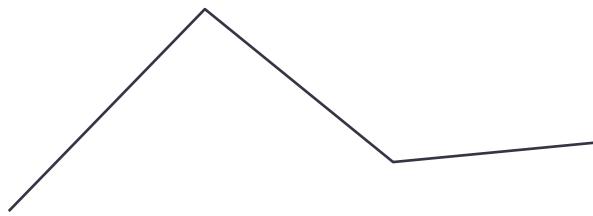

- Ortho vs. Frustum (2D vs. 3D)
- Poloha v prostoru

R-Tree

Generator - Triangulace

Texty

- Bodové vs. vektorové

Pozicování na vektor

- Kolize

Nábržecní
Palackého

Václavské
náměstí
Národní
muzeum

Optimalizace

- Vícevláknová aplikace
- R-Tree s “dlaždicemi”
- Generování vektorů do rasteru
- Čáry pomocí textur

Závěr

- Zpět k nevýhodám rasteru
 1. Objem dat řádově MB
 2. Nezávislost na rozlišení
 3. 2D, 2.5D a 3D efekty
 4. Možnost stylizovat
- Dotazy
