

Op. univ. serui:

UZ: $\frac{w \cup -a \text{ pol.}}{\text{if } A \rightarrow V.B \beta \in \text{UZ}(\alpha) \wedge B \rightarrow w \in P \text{ then } B \rightarrow w \in \text{UZ}}$ $\rightarrow w \cup -a \text{ pol.}$ (shaur \rightarrow shau)

Fun UZ (in q : shau): shau
begin forall $A \rightarrow V.B \beta \in Q \mid B \rightarrow w \in P \mid B \rightarrow w \notin Q$

do $q := \alpha \cup \beta \rightarrow w$?
until $\overline{w \cup -a}$ dalam pol. se waktu' p'ri'oket, n'k'ur (α)

Op. univ. serui:

Fun NASL (in q : shau, in X : NoZ): shau
begin return (UZ ($\alpha \wedge X \rightarrow \alpha \wedge X \cdot \beta \mid A \rightarrow \alpha \wedge X \beta \in Q$))

Input $Q = (\dots)$, Output: $(Q, Z \cup N, S, Q_0, F)$

Method: $Q_0 := \text{UZ} \{ S \rightarrow \alpha \mid S \rightarrow \alpha \in P \}$

do forall $q \in Q \mid X \in \text{NoZ} : \text{NASL}(q, X) \neq \emptyset \wedge \text{NASL}(q, X) \neq Q$
do $Q := Q \cup \text{NASL}(q, X) ; \overline{\delta} := \overline{\delta} \cup \delta(q, X, \text{NASL}(q, X))$

until $\overline{w \cup -a}$ dalam pol. serui shau se do Q waktu' p'ri'oket.
