Can I get exception to enroll the course?
The demand for the course is big. We **do not grant** exceptions in these cases:
- Its your compulsory option for your field of study
- You really want to take the course

Students must follow the university process. That means you will have to wait and hopefully some students will drop their enrolment in second or third week (very often number of students leave the course third week of the semester)

Can I have cross-seminar team?
No. The teams must consist of people in same seminar group. All of the students must be present during milestone evaluation.

Can I get exception to enroll a specific seminar group? I can bring my notebook.
No we do not grant exceptions to enroll specific seminar group. The room in which we teach is big enough to accomodate 50 people, which is exactly the maximum number of enrolled students. Bringing notebook doesn't help because there are no chairs left and there is no space where one can put a chair.

Can we have a team of 3 people? Can we have a team of 5 people?
No. The team must consist of exactly 4 people.

My project works on my laptop in my NetBeans. Why did you penalized us in milestone evaluation for unbuildable project?
Every project at every milestone must be buildable and testable by Maven 3 from command line on both Windows and Linux. This is one of the main properties of well developed enterprise application.
