Programování generativního designu

MgA. Helena Lukášová, ArtD.
RNDr. Barbora Kozlíková, PhD.

organizace

Úvod do problematiky programování vizuálních výstupů pro grafický design a umění

Výuka orientovaná prakticky - práce na zadáních

Prezentace studentských prací – každý 1x za semestr

organizace

Barva - barevné palety skrze interpolaci, zpracovaní barevné palety z obrazu, organizace ploch podle programovaných hodnot.

Tvar - organizace rytmicky řazených tvarů, komplexních modulů v rastru, generování růstové struktury, programování štětců, štětce pro kreslení písmem a komplexními moduly.

Písmo - parametry vektorového písma, programování hodnot ovlivňující velikost písma, orientaci písma, vizualizace písma v textu, práce s křivkami, programovaná mutace písma.

Náhodnost a šum, oscilační křivky.

Atraktory, stromové diagramy, dynamické datové struktury.

cíle

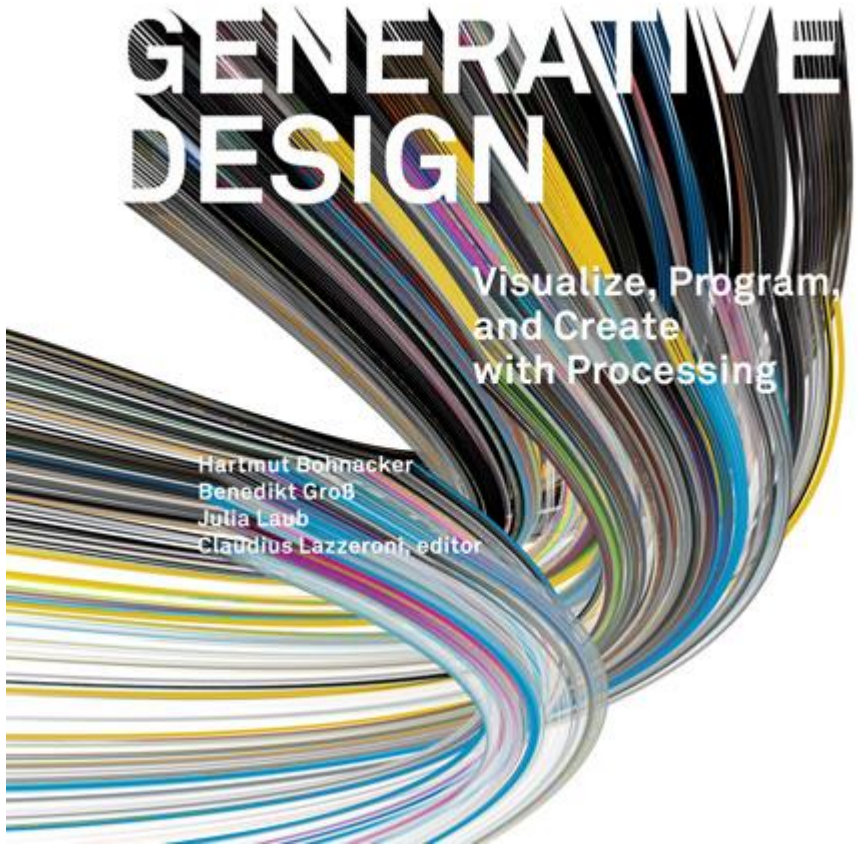
Rozvíjení interdisciplinárního uvažování

Zkušenost s uplatněním kreativního kódování ve vizuálním díle

Rozšíření možností především v tvorbě grafických návrhů

Radost

Studijní materiály



http://www.generative-gestaltung.de/code

Studijní materiály

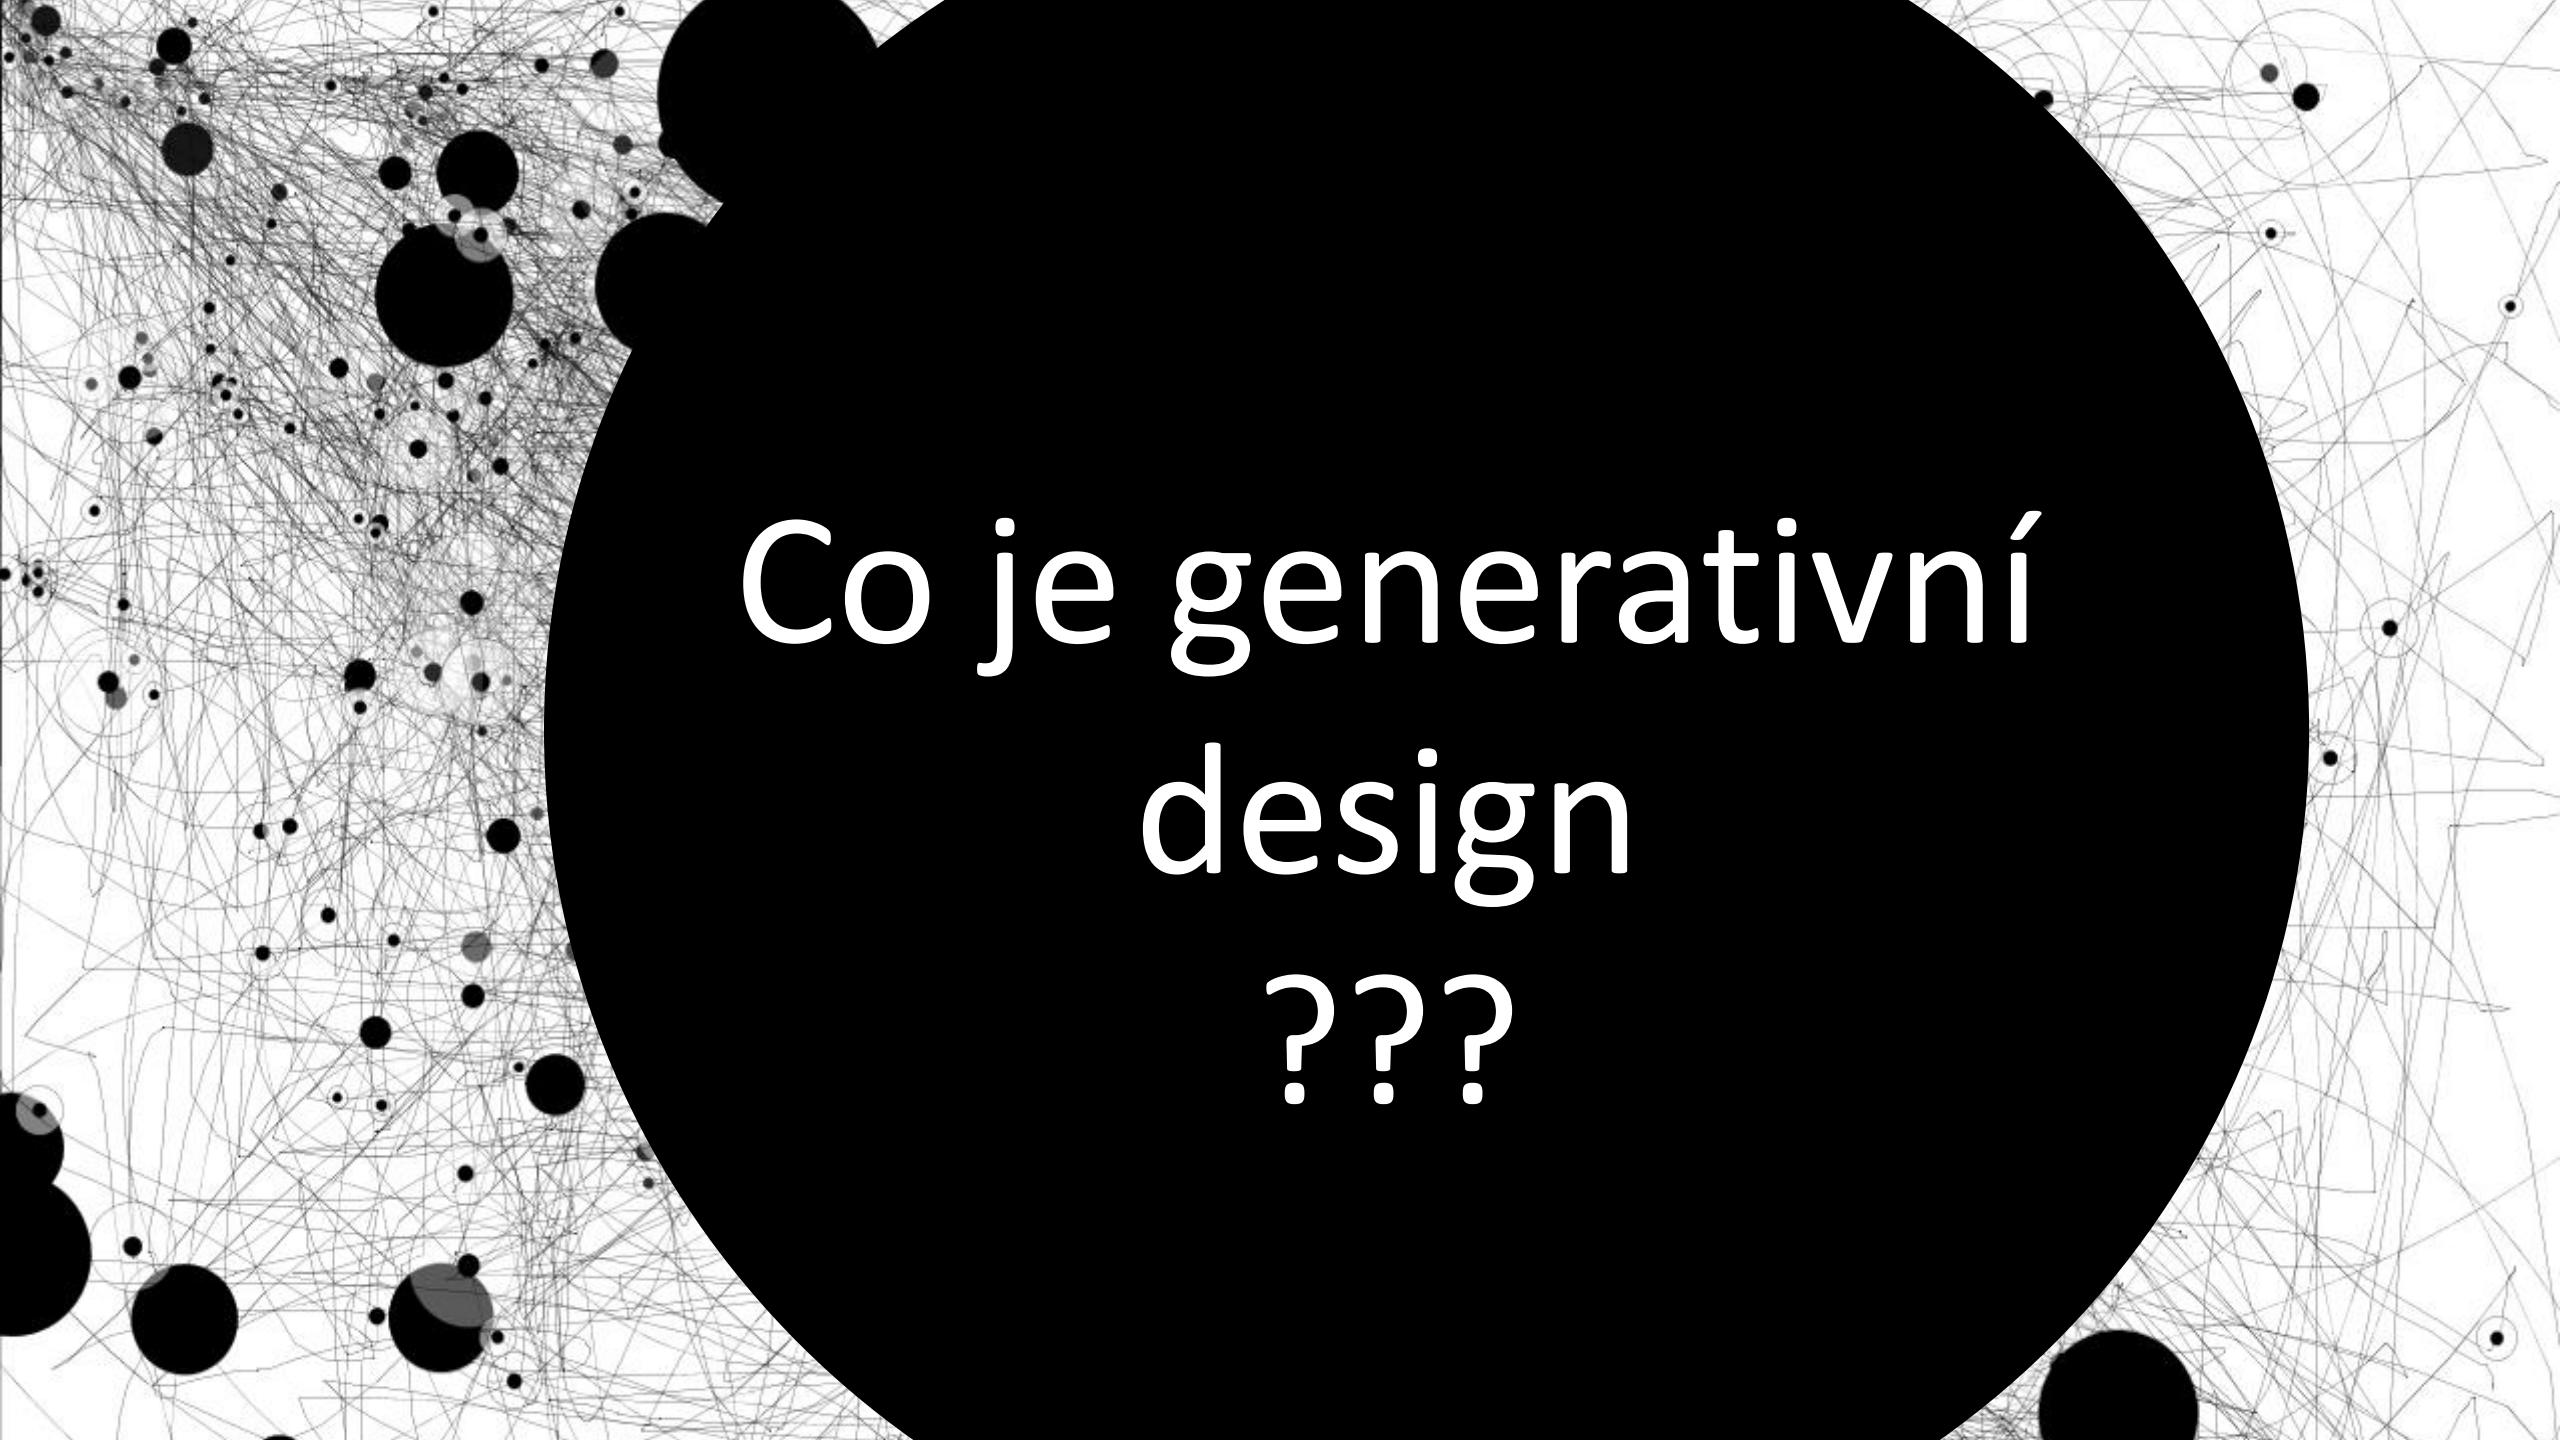
Inspirace

https://vimeo.com/60735314



Co je generativní
design
???

interaktivní aplikace
zpracování dat
generování vizuálních výstupů
tvorba vlastních nástrojů
vizualizace
animace

V širším smyslu je to dílo, které bylo vytvořeno pomocí autonomního systému, který v procesu určuje výslednou podobu díla.

Koncepce je dílem autora, je to tedy jeho dílo?

X

Systém je tvůrcem?

Příklady

Actelion is a biopharmaceutical company.
Its visual identity is based on the idea "From medical industry to medical magic".

Principy

Generativní design není nový styl, je to nová pracovní metoda.

How to make a Dadaist Poem (method of Tristan Tzara)

To make a Dadaist poem:

- Take a newspaper.
- Take a pair of scissors.
- Choose an article as long as you are planning to make your poem.
- Cut out the article.
- Then cut out each of the words that make up this article and put them in a bag.
- Shake it gently.
- Then take out the scraps one after the other in the order in which they left the bag.
- Copy conscientiously.
- The poem will be like you.
- And here you are a writer, infinitely original and endowed with a sensibility that is charming though beyond the understanding of the vulgar.

-Tristan Tzara

This surrealist method established itself as the creative vehicle for some of the most brilliant creative figures of the 20th century.

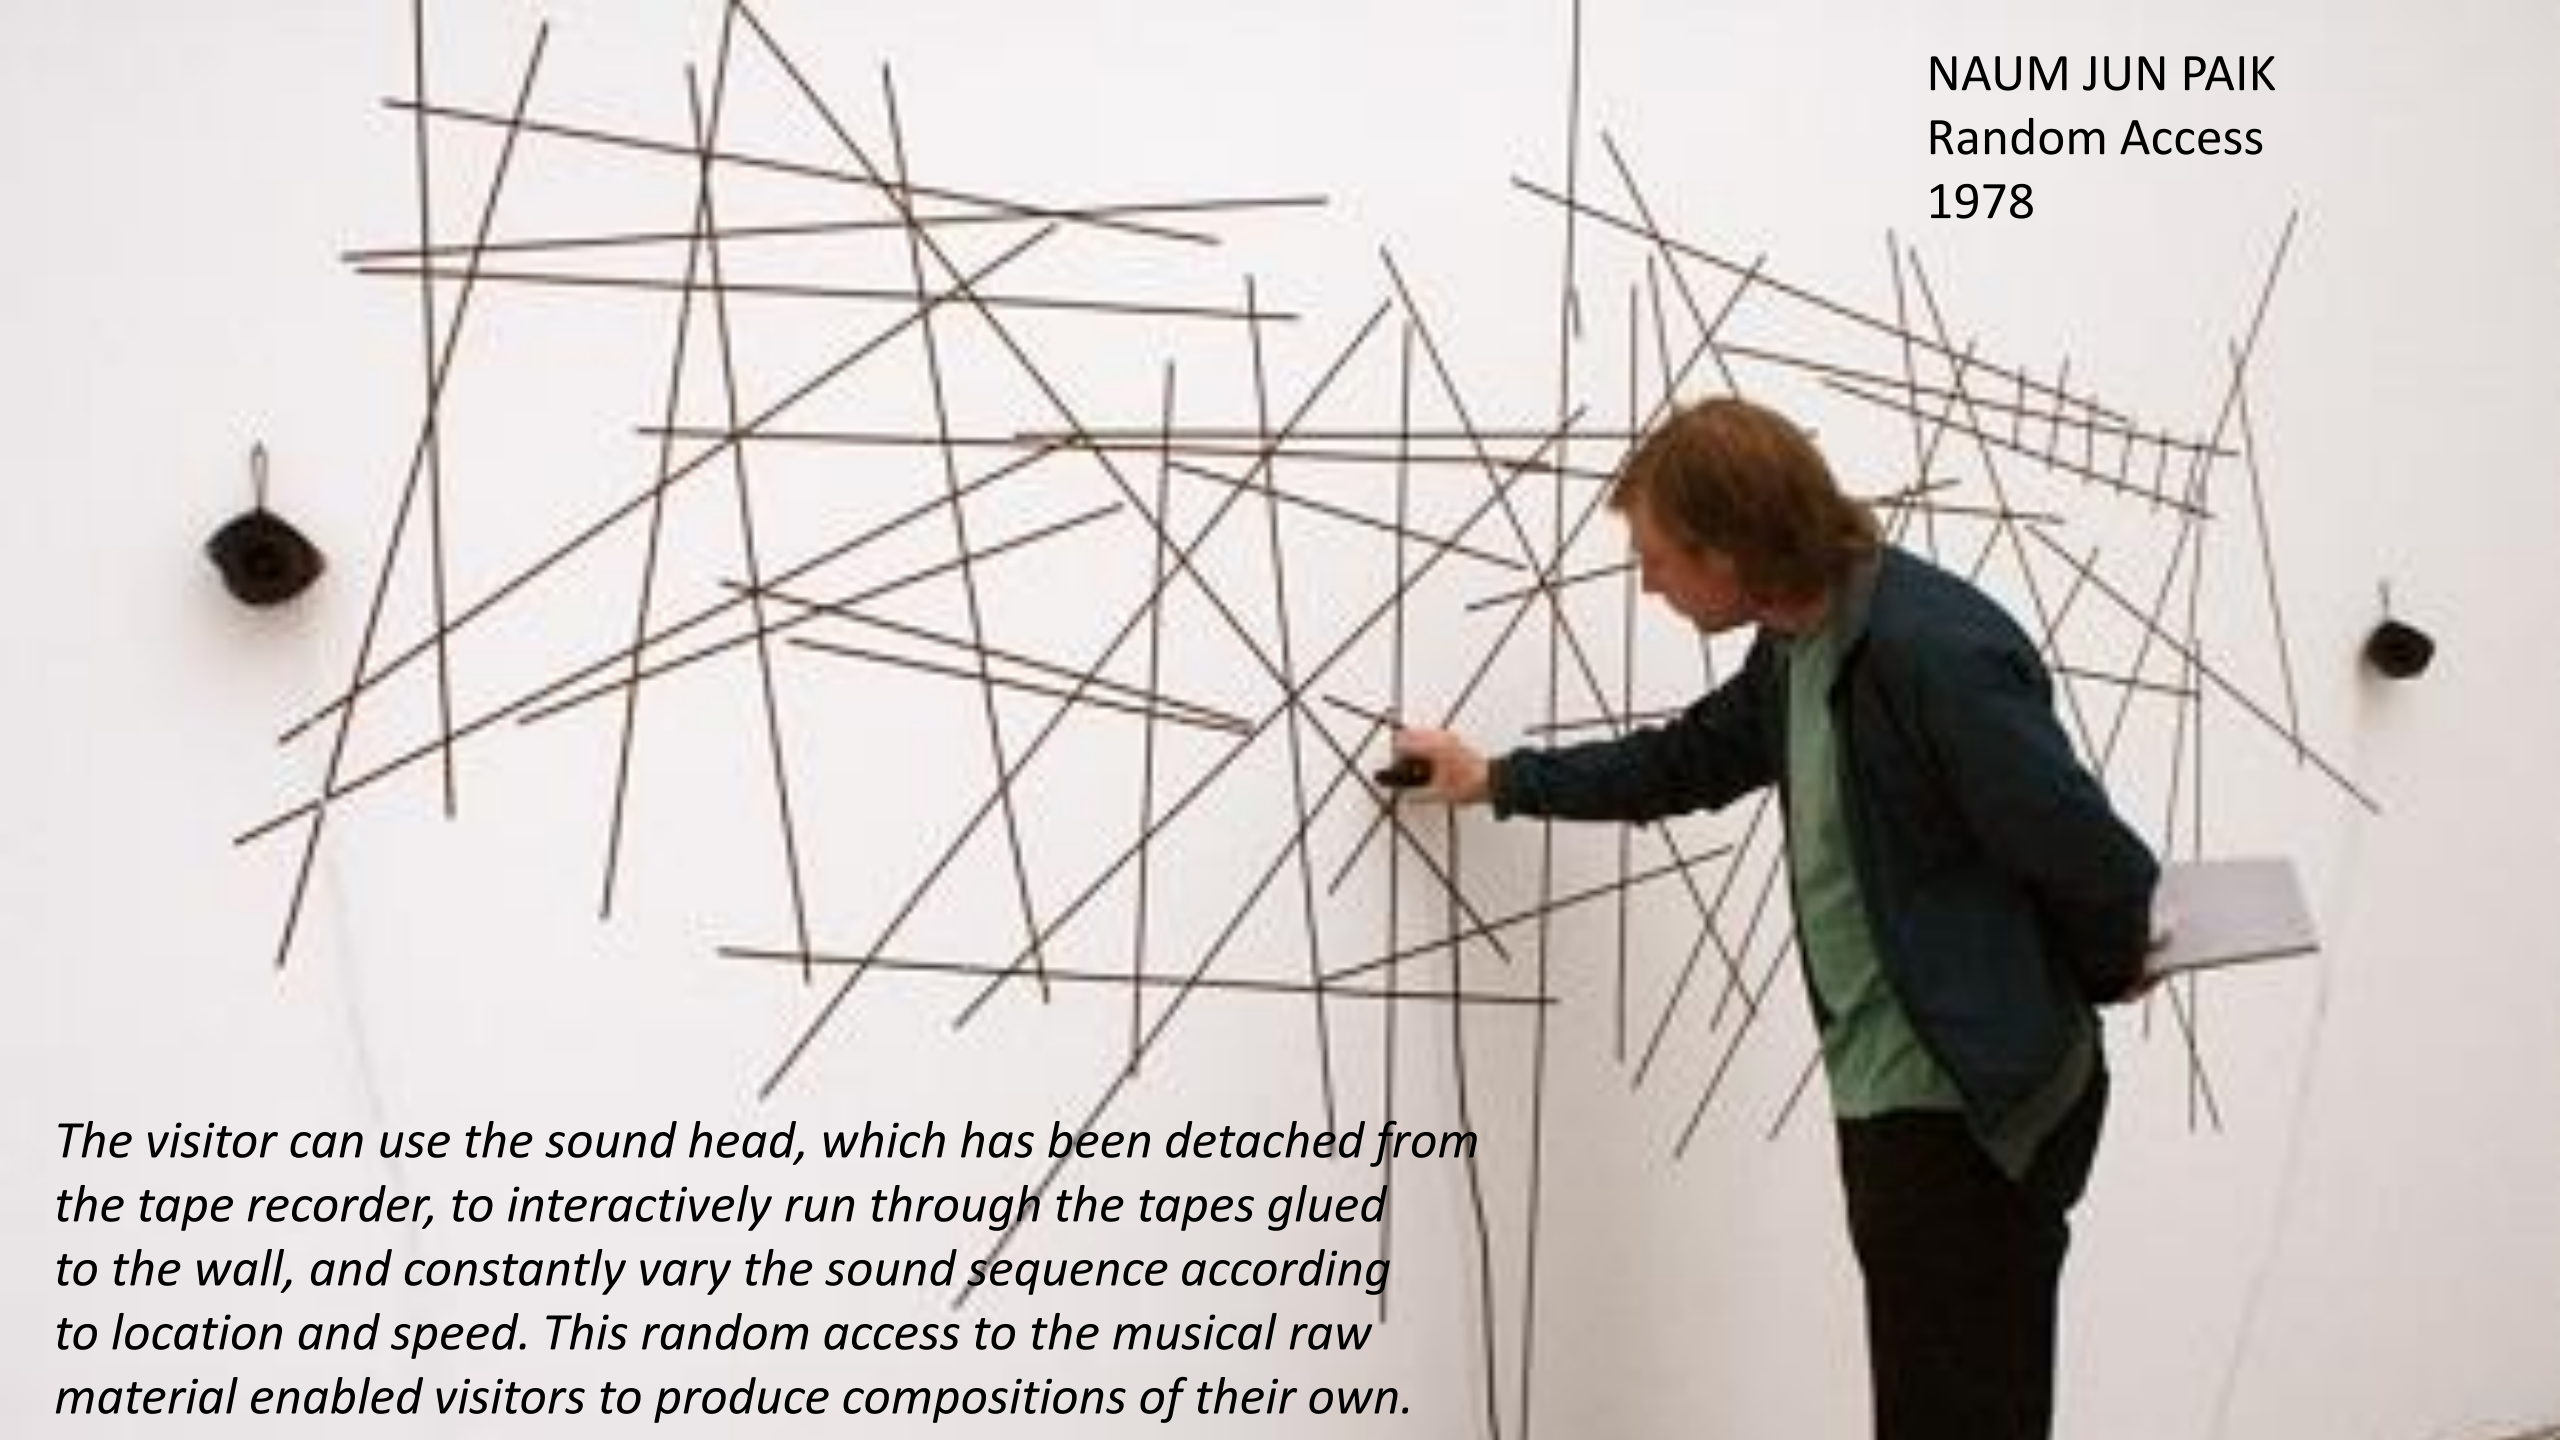
The idea becomes a machine that makes the art.

Sol LeWitt, 1967

Myšlenka je základem díla. Často se jedná o plán, který eventuálně autor naplňuje.

Vzniká tak nový přístup ve výtvarné tvorbě, výrazný na přelomu 60 a 70tých let, které souhrnně označujeme jako

Konceptuální umění



NAUM JUN PAIK
Random Access
1978

The visitor can use the sound head, which has been detached from the tape recorder, to interactively run through the tapes glued to the wall, and constantly vary the sound sequence according to location and speed. This random access to the musical raw material enabled visitors to produce compositions of their own.

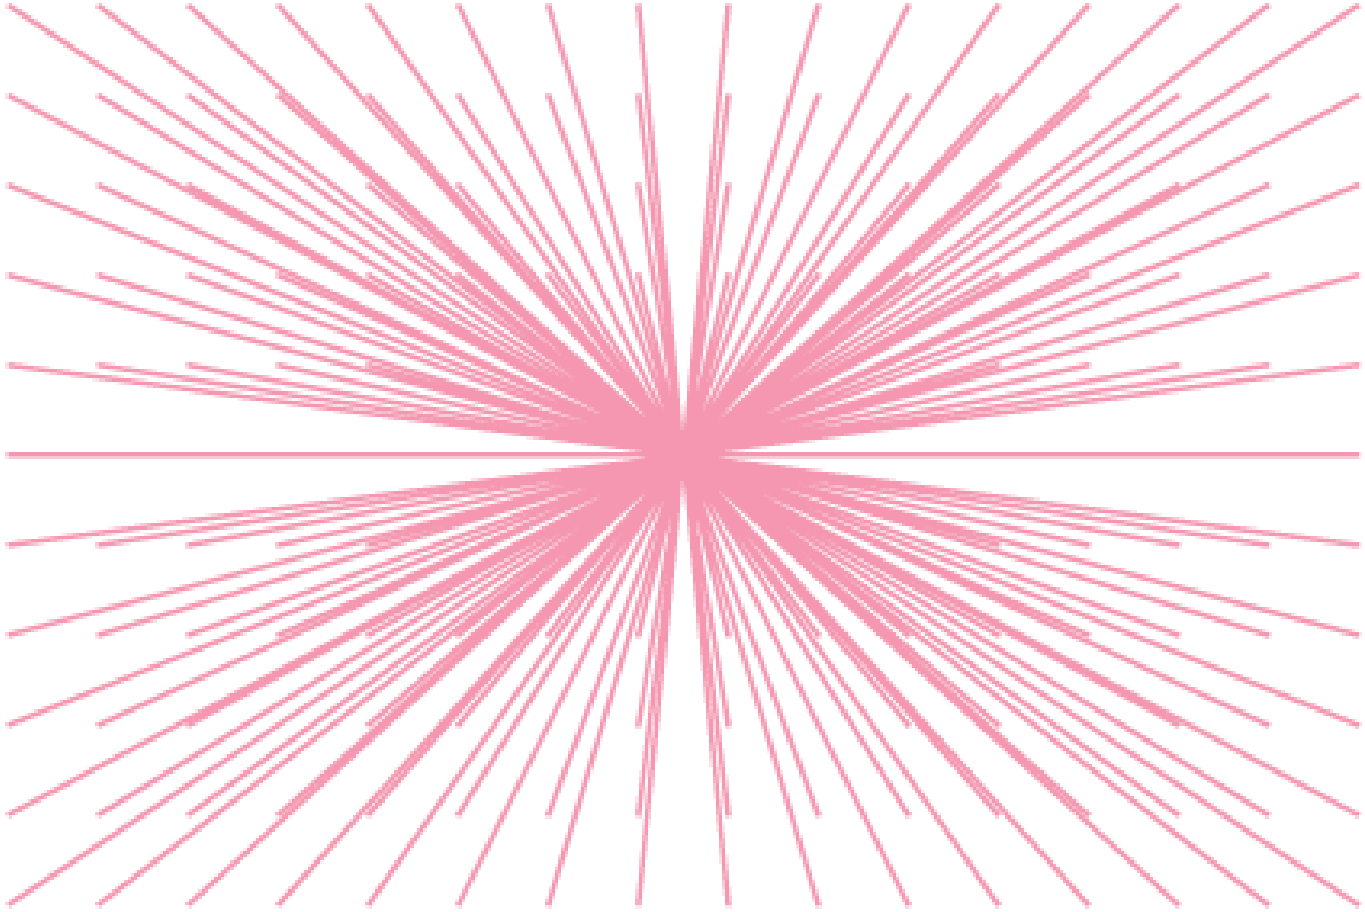
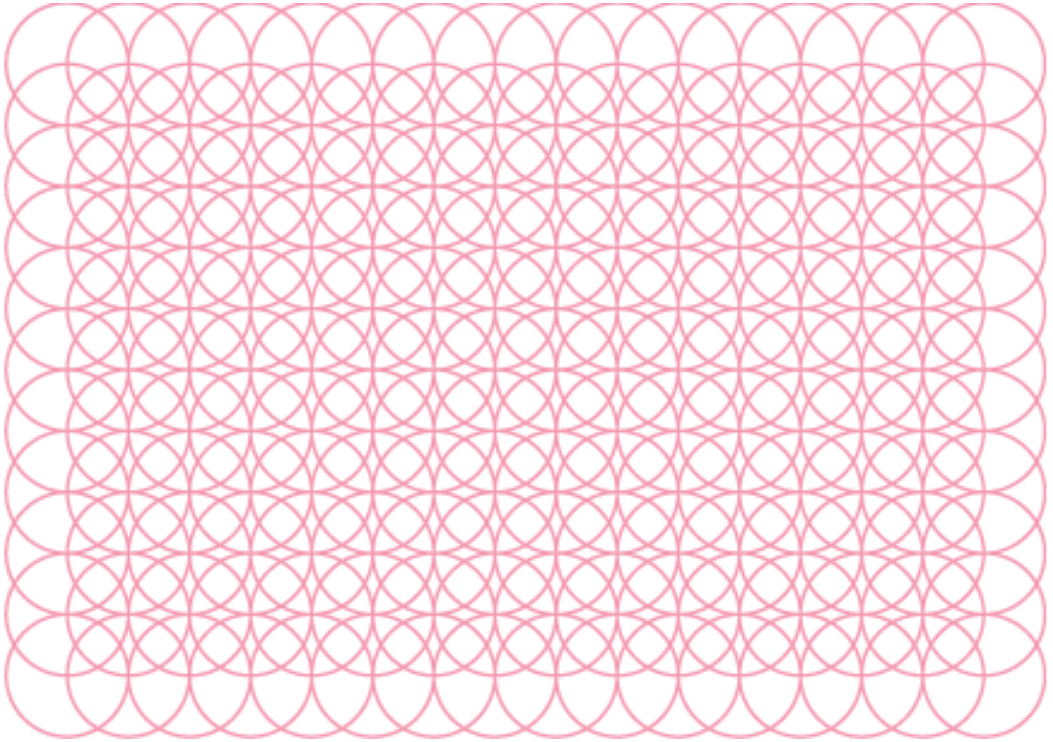
Opakování





All programming languages can repeat an action, such as drawing the same shape over and over. When one repetition sequence is embedded within another, the effect multiplies. This simple technique can be used to explore many kinds of patterns.

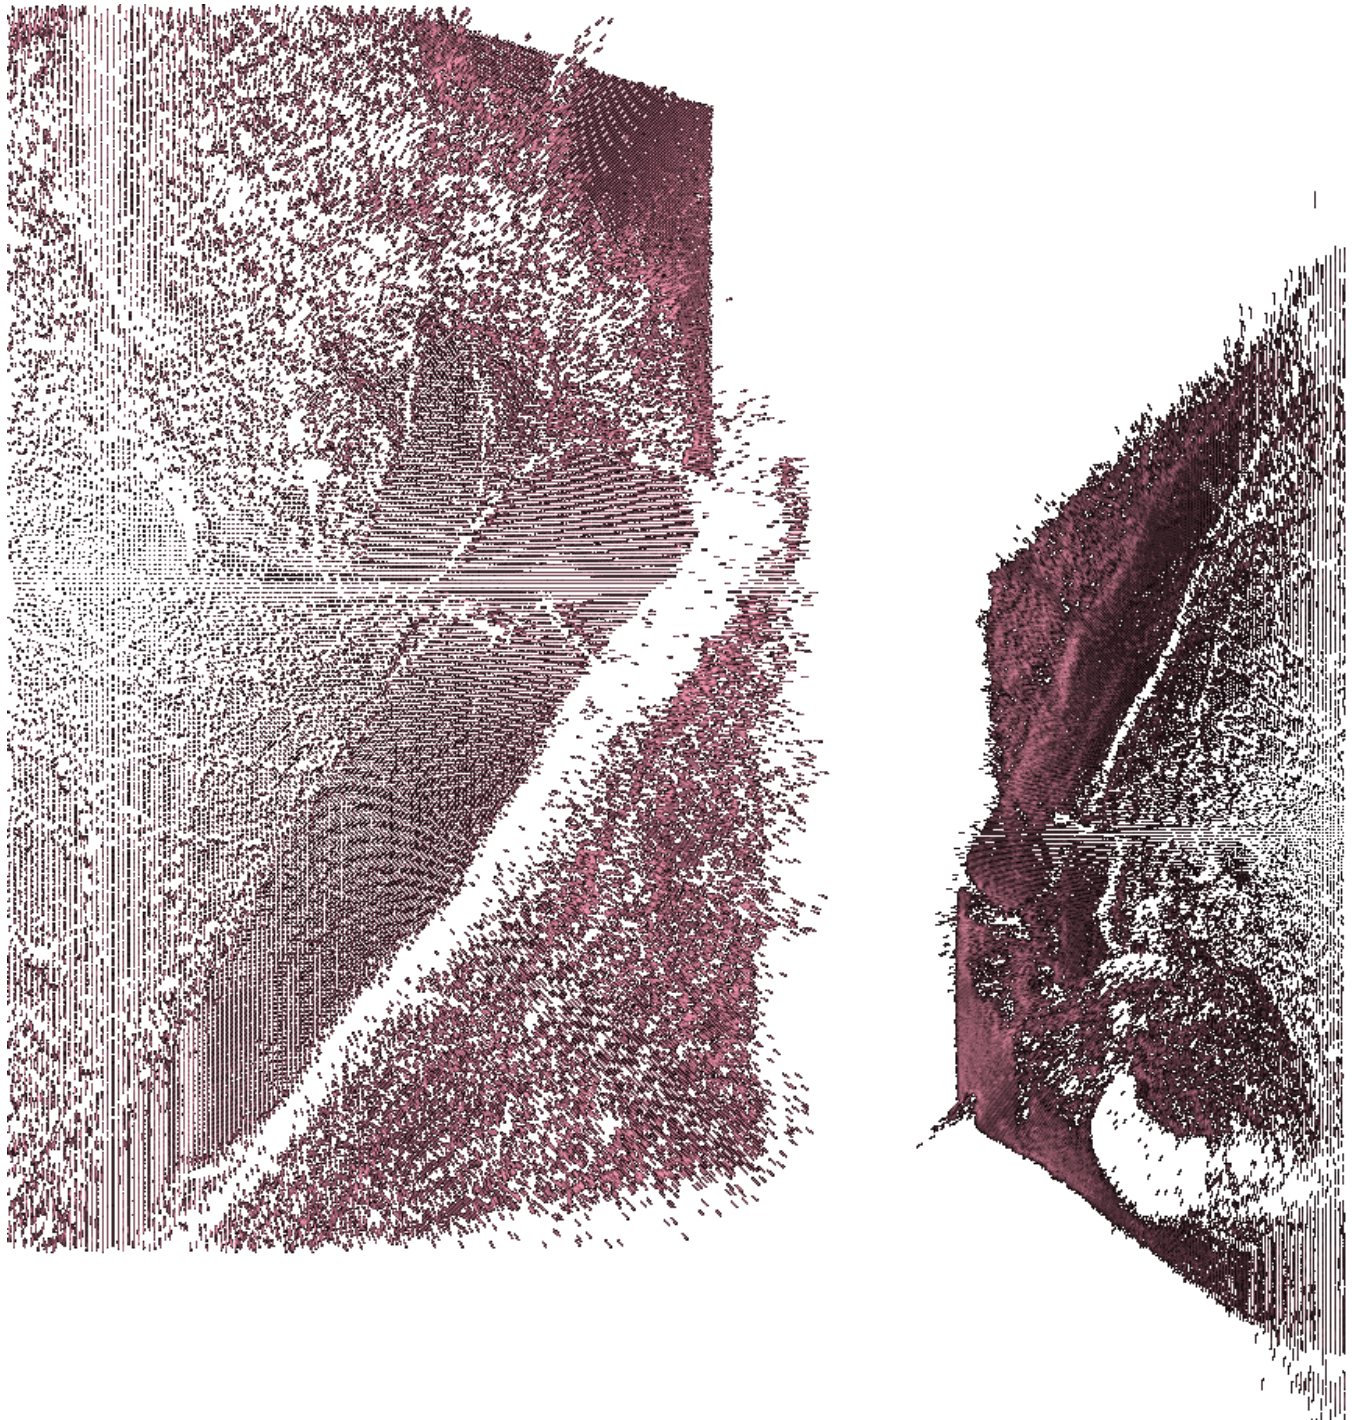
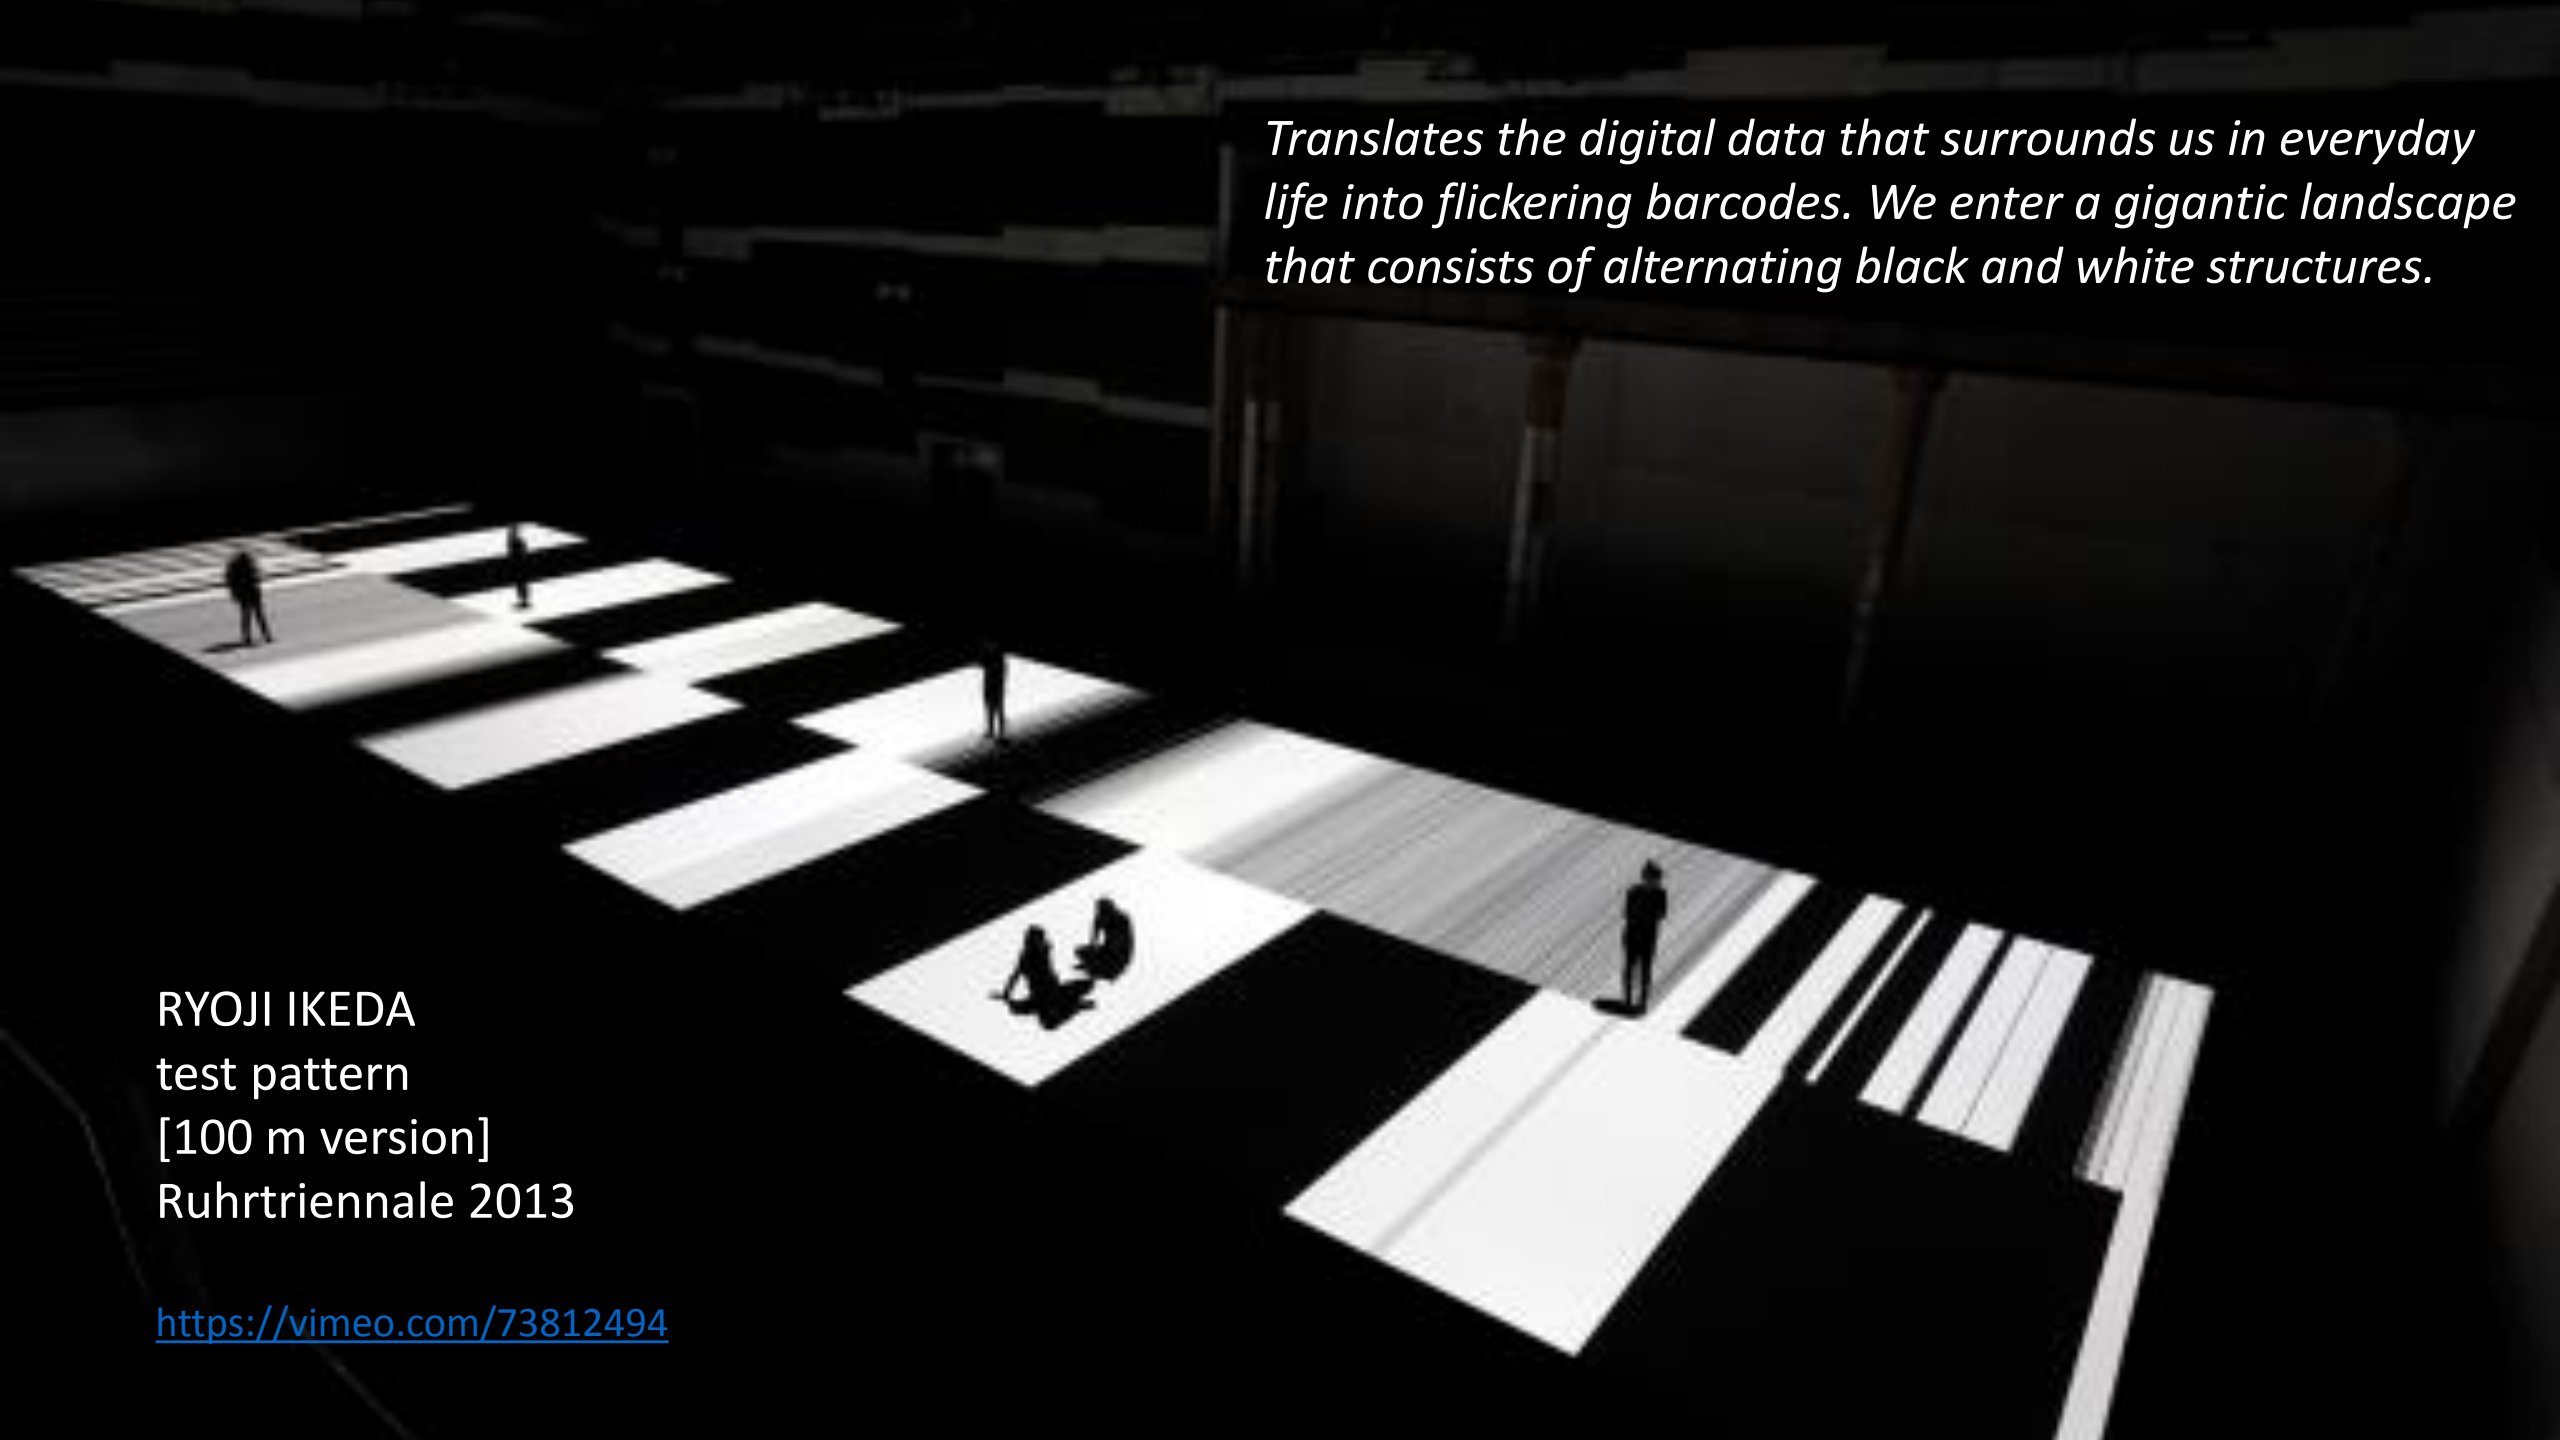
http://www.studioludens.com/epakato/

Transkódování



A rich source of data, and transcoding can be used to interpret this data from a different perspective.



Translates the digital data that surrounds us in everyday life into flickering barcodes. We enter a gigantic landscape that consists of alternating black and white structures.

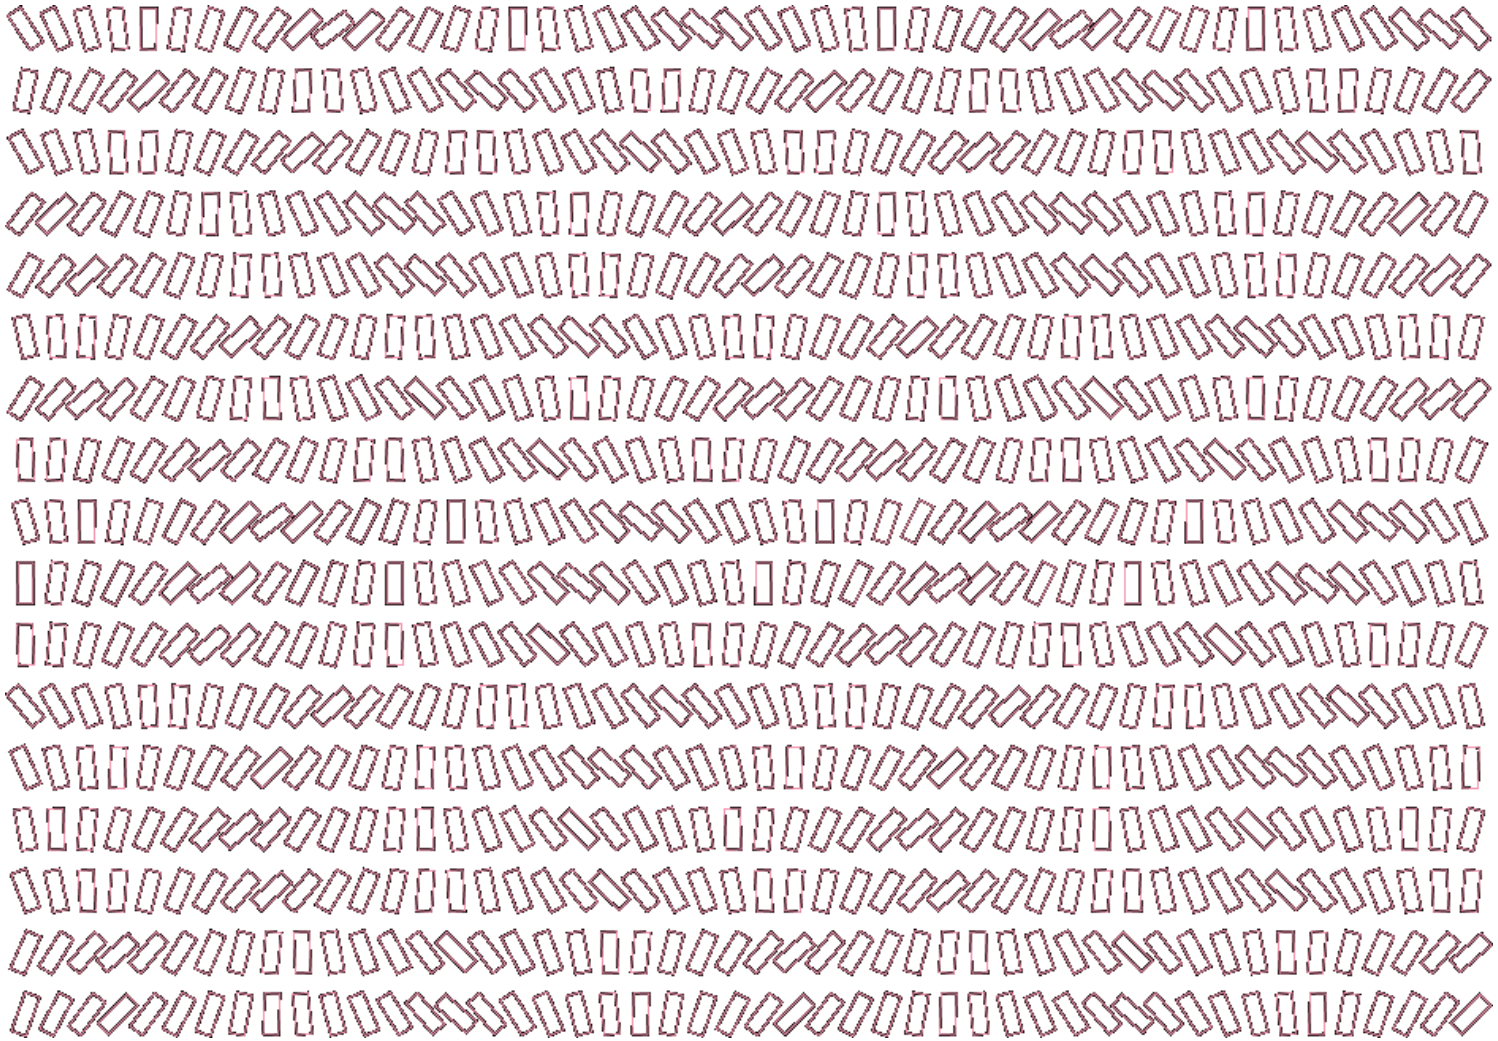
Parametrizace



Parameters are powerful tools for controlling a series of objects. The behavior or form of each object can be connected to the value of one or more variables. The designer can think about more than just the individual objects.

Parametrizace
