1. History :

Price History

Pizza

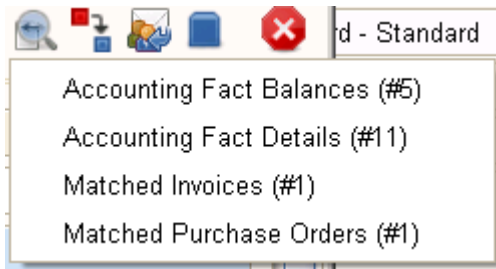

Price History | Reserved Quantity | Ordered Quantity | Unconfirmed Qty | Available to Promise

Business Partner	Unit Price	Quantity Invoiced	Trade Discount	&Document No	Date Invoiced	Organizatio
Masarykova Univerzita	50.0	3.0	50.00	Faktura 100001	11/28/2016	HQ
Standard	1,000.0	1.0	0.00	Faktura 100000	11/21/2016	HQ
Business partner	50.0	20.0	50.00	Faktura 1000000	11/14/2016	HQ

Using Zoom

It opens the basic window of Product

Here we can use Zoom Accross 

1. History: 

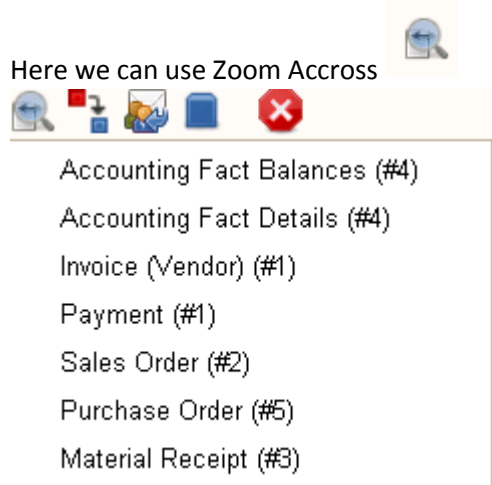

Price History

Masarykova Univerzita

Product	Unit Price	Quantity Invoiced	Trade Discount	&Document No	Date Invoiced	Organization
Pizza	50.0	3.0	50.00	Faktura 100001	11/28/2016	HQ

2. Using Zoom 

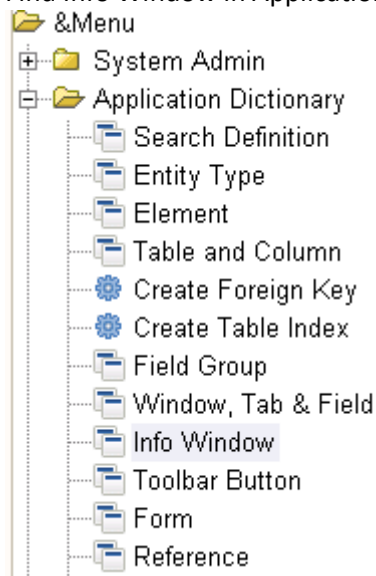

It opens the basic window of Business Partner

and we can see all documents related to specific business partner

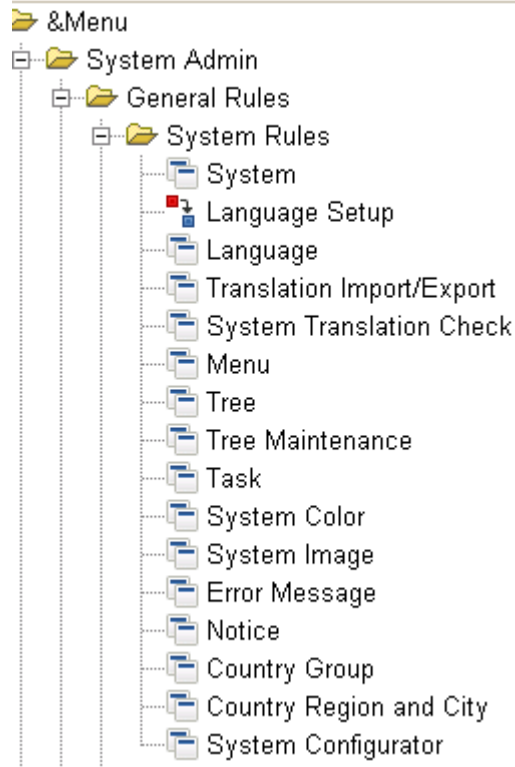

How to make my Info Window?

1. Task: I want the info window that list for me the all employees
2. Log as System
3. Find Info Window in Application Dictionary

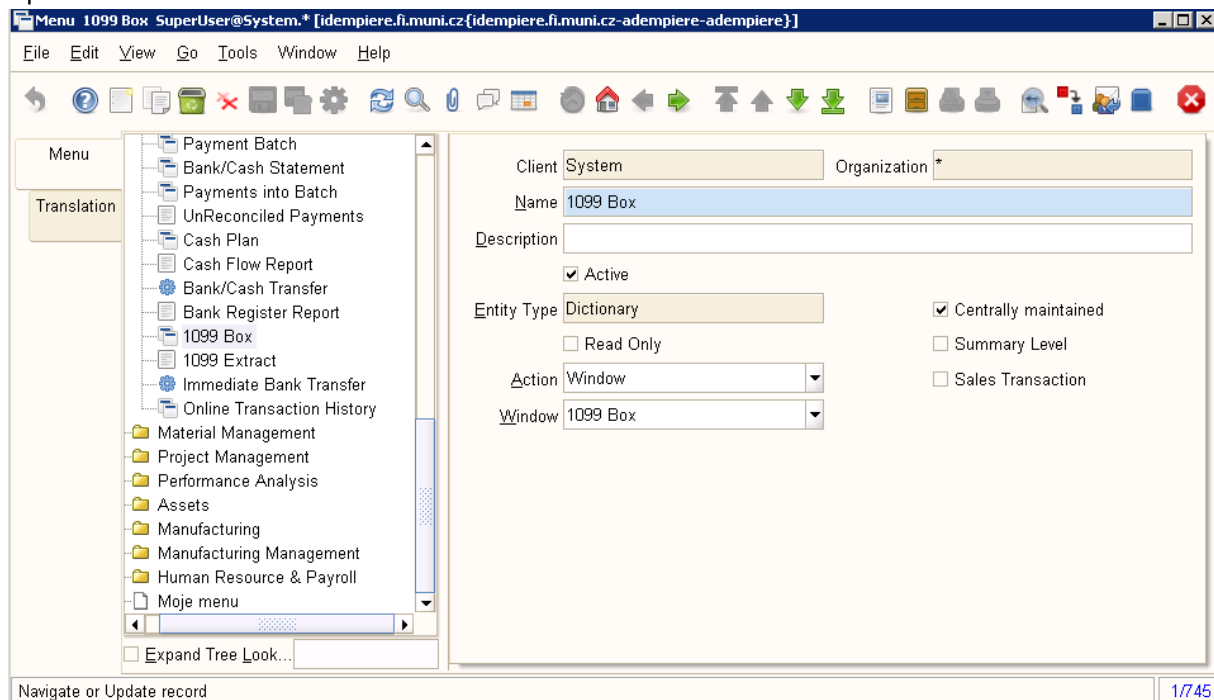

4. Open Info Window and click on New Record and
 - a. In Name write **Employees list**
 - b. In Table select **C_BPartner**
 - c. In SQL FROM it is automatically written C_BPartner a
5. Than define columns
 - a. In System Element write **Name** – all informations are written. Save and click New
 - b. In System Element write **IsEmployee** – all informations are written. Check **Displayed**. Save.
6. Put your info window to menu:

- a. Find Menu in System Admin – General Rules – System Rules

- b. Open Menu with all records

- c. Click New and:
- i. Into the Name put Employee list
 - ii. Into Action – Info
 - iii. Into Info Window select Employee list

7. Log as normal user of the company (in thick client!!!)
8. Try your info window 😊

Modifications

1. Employee as filter criteria
 - a. In Column (Info Windows settings) IsEmployee select Query Criteria
 - b. Set Query Operator to “=”
 - c. Save
 - d. See the difference
2. Employee as default parameter of the query
 - a. In Window (Info Window settings) into the field Sql WHERE write “a.IsEmployee='Y'”
 - b. In Column IsEmployee deselect Query Criteria
 - c. See the difference
