GREYCORTEX

We are looking for
a new
Network Security Analyst

this is a full-time position
also suitable for freshly graduated

Are you seeking a career in cybersecurity?
Do you want to help reveal cyber threats hidden
in an organization's infrastructure using
our MENDEL network traffic analysis solution
and **contribute to a more secure virtual world?**

Our **CyberOps Team** is growing. We are looking
for a new teammate whose main objective will be
to **monitor network traffic** and any anomalies
and threats in IT networks while finding ways
to **eliminate and remove the security threats**
and performance imperfections.

This means someone who will make sure that
our **customers' data is safe,** and that any threat
is revealed before it causes any harm.

ABOUT THE ROLE - You will participate in the following:

SECURITY ANALYSIS & INVESTIGATION:
- You will be monitoring, analyzing,
and evaluating security incidents of our clients'
networks

- In a case of anomaly or security threat, you
will investigate its cause and help to prevent
any harm

- On a regular basis, you will produce reports
including recommendations for security
measures

MALWARE LAB:
- You will analyze the behavior of malicious
software in our Malware Lab
- You will take part in building and further
improving the Lab

YOUR SKILLS

You will be the expert in Network Traffic Analysis,
so you should have:
- Great analytical and synthetical skills
- An eye for a detail

- The ability to think/willingness to learn
how to think one step ahead (especially
in a case of a cyber threat)
- You have great communication skills to help
and explain behavior on customer networks

REQUIREMENTS

- You have a strong interest in cybersecurity
and you keep up to date with news and
current trends
- You have basic Linux knowledge

- You should have basic knowledge of network
traffic analysis tools (Wireshark, tcpdump, etc.)
- You can speak English, and Czech/Slovak

Note: If you don't match all the criteria but
you think you will be great at this job,
send us your CV and a cover letter
explaining why.
