

Escape Game

How to play

In the middle there will be some situation and below will be multiple actions that you can take. Click on the box with the action you would take.

Disclaimer: This game concentrates only on work and school and ignores other very important parts of your day like social interactions, workouts, ... The reason for this is that there would be simply too many options and it would simply be unmanageable.

I understand. Let's start the game.

Wha...?

How to play ... Again

Wha...?

General Info

- You are a student at FI MUNI. You are in your last year of Master's degree and you still have to work a lot on your final thesis. You also work part-time at small IT company.

Info about your day

- You have 2 tasks to do. One is to write documentation for feature you did last week which is quite boring but important task. The second task is to start object design of a new feature.
- You want to go home at 16:00 to do your master's thesis

Noon 12:00

You came to work after school and a good lunch.

Do the documentation

Start designing

Think about priorities of your tasks

Noon 12:01

You think that documentation will take approx. 1.5 hours. The object design of the other feature will take approx. 3 hours.

Do the documentation

Start designing

Afternoon 14:00

Just after you have finished documentation a colleague assigned you two code reviews with high priority.

Think about possible delegation of code reviews

Start doing code reviews

Ignore tasks and do the design task

Afternoon 14:10

One of the tasks you should review modified code that you are already familiar with. The second one is from code you did not see yet and you have no idea why it was assigned to you.

Delegate the one and do the other one

Start designing and ignore reviews

Start doing reviews because you want to do all the work

END

You have started with the design and then went home. The next day you were in trouble because you ignored the reviews.

Afternoon 15:00

You did the review and still have 1 hour left to start with the desing of the new feature.

Start designing

Afternoon 16:00

It's 4 o'clock but you have not finished the design yet.

Continue with designing

Go home

END

You have finished the design at 6 o'clock and then went home. You were exhausted and procrastinated quite a bit instead of doing your master's thesis.

END

You went home happy with the work you did at work. Since you were in good mood you did quite a lot of work on your master's thesis.

Afternoon 16:00

You have done with one review but the second one is taking quite long to finish because you are missing context. You want to go home but the review needs to be done today.

Ask colleague for help

Continue with the review

END

Your colleague helped you with the second review and then you went home exhausted. You procrastinated quite a bit and did almost nothing with your master's thesis.

END

You have finished the second review quite late and went home exhausted. You did not have the energy to do your master's thesis. Later a bug was found in the code you reviewed that you did not catch because you were not familiar with the context.

Afternoon 14:00

While you were designing your colleague assigned you 2 critical reviews.

Think about possible delegation of code reviews

Start doing code reviews

Ignore and continue with design

Afternoon 14:10

One of the tasks you should review modified code that you are already familiar with. The second one is from code you did not see yet and you have no idea why it was assigned to you.

Delegate the one and do the other one

Start designing and ignore reviews

Start doing reviews because you want to do all the work

You have finished the second review quite late and went home exhausted. You did not have the energy to do your master's thesis. Later a bug was found in the code you reviewed that you did not catch because you were not familiar with the context.

Afternoon 15:00

You did the review. What will you do next?

Continue with the design

Do the documentation

Afternoon 16:00

You are still not finished with the design.

Continue with designing

Go home

Do the documentation

END

You have finished the design at 6 o'clock and then went home. You were exhausted and procrastinated quite a bit instead of doing your master's thesis.

END

You went home quite happy but you felt like you should not postponed the documentation. You procrastinated only a little bit and did quite a lot of work on your master's thesis.

END

You have finished the documentation at 18:45 and then went home.
You were exhausted and procrastinated quite a bit instead of doing
your master's thesis.

Afternoon 16:00

You done one review but the second one is taking quite long to finish because you are missing context. You want to go home but the review needs to be done today.
