

Intro

Preparation for biometrics seminar in PV181

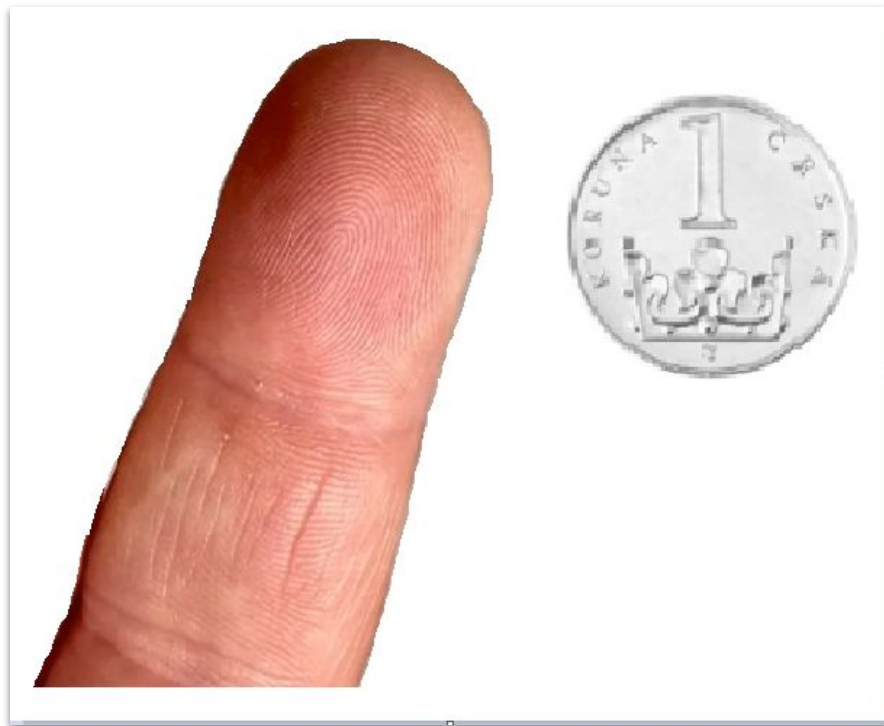

Content of the biometrics seminar

- Theory about biometrics and fingerprints
- Fake fingerprint creation from the photo
- Prepare the needed software in advance (you will receive an email)
- You can get bonus points :)

How to take a photo of fingertip

Preparation for biometrics seminar in PV181

Example of the expected result

Avoid blurred parts

Only the middle area of the
finger is visible.

Avoid shades

Only the middle area of the finger is visible because of the shades at the bottom and the blurred part upward.

Capture the whole fingertip

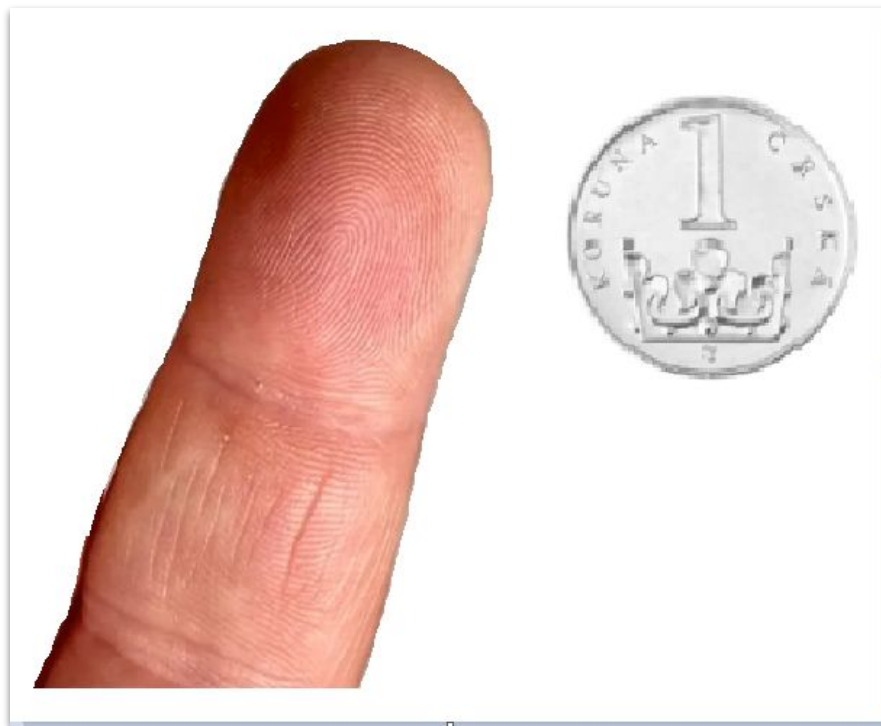

Only half of the finger is visible.

Good example :)

Coin as a size estimator

Coin position

- Coin distance matters!

- Place the coin at the same level as the fingertip
- Use several coins
