**Impression share:** parodymų dalis - procentais išreikštas jūsų reklamos parodymų ir paieškų srauto santykis. Šį kriterijų įtakoja reklaminės kampanijos nustatymai, ar skelbimai yra patvirtinti Google, nustatyta raktažodžių kaina ir skelbimų „kokybės balas“.

**Lost IS(budget):** parodymų dalis kurią praradote dėl biudžeto ribojimų. Šituos parodymus būtų galima gauti nuėmus biudžeto ribojimus.

**Lost IS(rank):** parodymų dalis kurią praradote dėl skelbimo reitingo. Šituos parodymus būtų galima gauti pagerinus reklamines pozicijas ir reklaminės kampanijos kokybę.

---

## Keyword optimization

### Kelios pastabos apie raktažodžius:

- Adwords sistemoje nėra skirtumo tarp mažųjų ir didžiųjų raidžių – pavyzdžiui „Vilnius“ ir „vilnius“ yra atpažįstami kaip vienas ir tas pats žodis.
- Nėra reikalo raktažodžiuose naudoti skyrybos ženklų, Vilnius-Londonas ir Vilnius Londonas tai sistemoje yra viena ir ta pati frazė.

---

## „Keyword matching“ –

### **broad match:**

skelbimas rodomas, jei ieškoma panašių frazių ir susijusių variantų

### **+modified broad match:**

\*\*galimybė, turintį daugiau kontrolės megu broad match, bet platesnė negu „phrase match“. Reikalauja, kad frazėje būtų tikslus žodis, prie kurio yra +

### **„phrase match“:**

skelbimas rodomas, jei yra tiksli frazės atitiktis.

### **[exact match]:**

skelbimas rodomas tik konkrečiam raktažodžiui

---

## „Keyword matching“ pasirinkimai

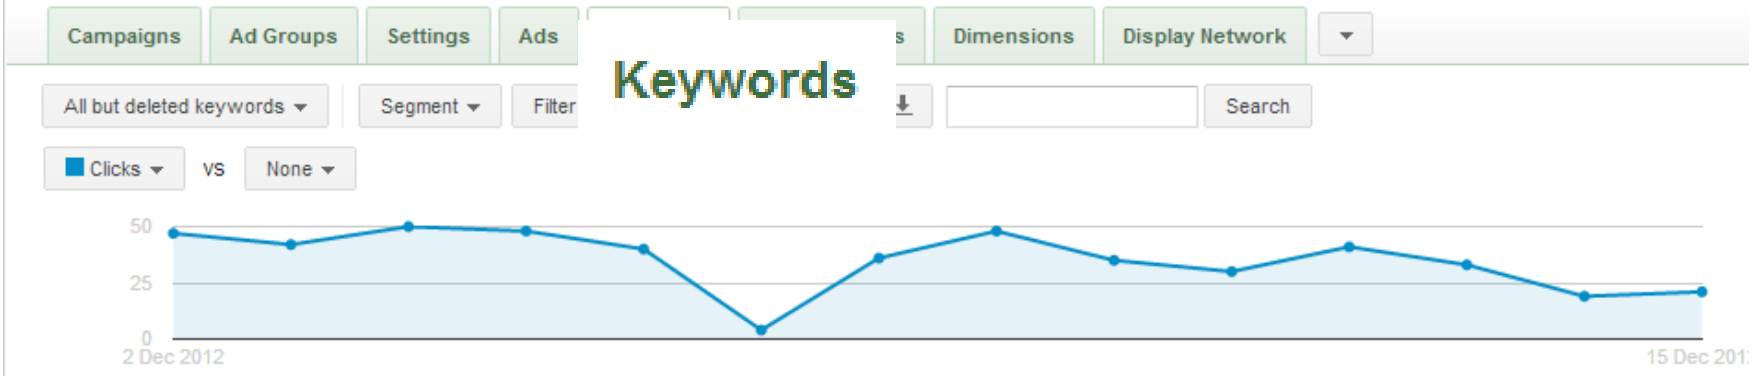

**Exact match: [plastikiniai langai]** – tik, jei kažkas įveda į paiešką būtent plastikiniai langai;

**Phrase match: „plastikiniai langai“** – plastikiniai langai, pigūs plastikiniai langai, plastikiniai langai vilniuje ir t.t.

**Extended broad match: +plastikiniai +langai** – plastikiniai langai, gamina plastikinius langus, plastikinių langų montavimas, plastikiniai apvalūs langai ir t.t.

**Broad match: plastikiniai langai** – plastiko langai, mediniai langai, langų skaičiuoklė, geri langai, langų gamyba šiauliuose ir t.t.

## Ads account structure

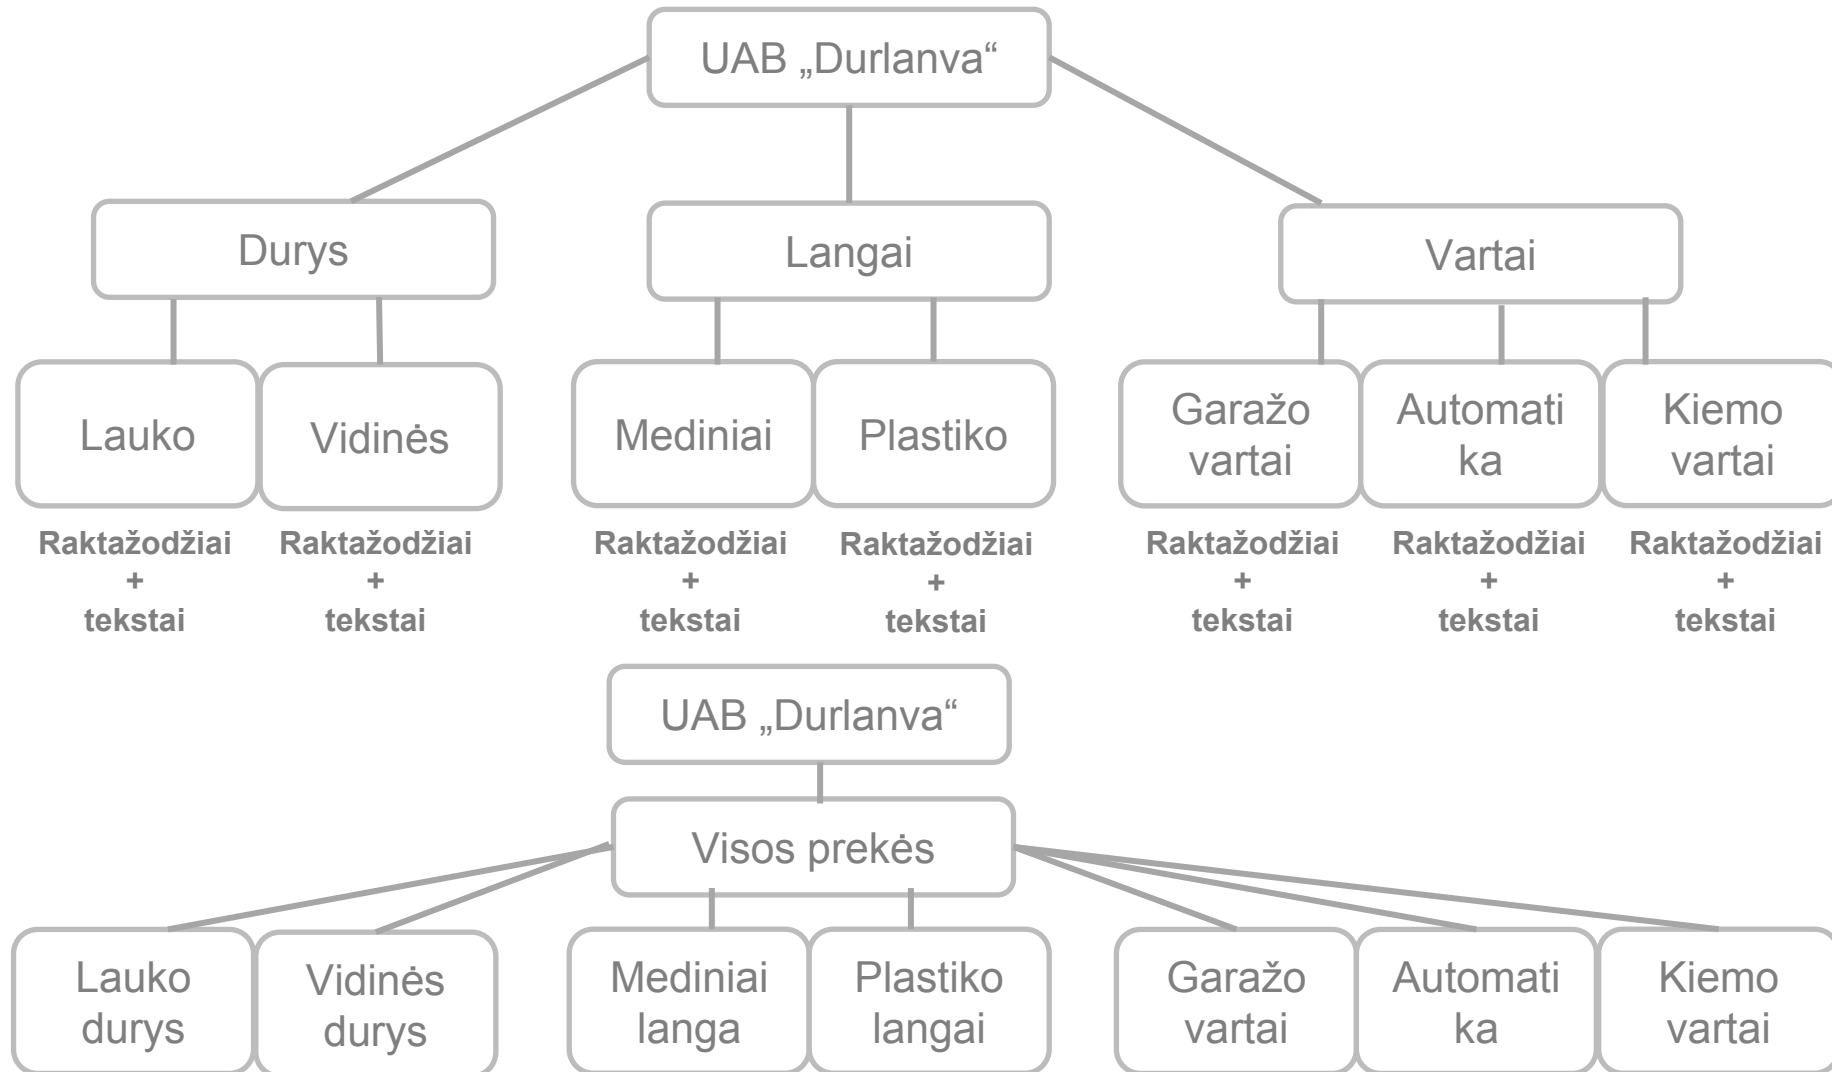

**Kampanijos** – atskiras kampanijas verta kurti tada, kai norime reklamuotis keliose šalyse, kai planuojame reklamuotis paieškoje ir vaizdiniame reklamos tinkle, kai turime skirtingas veiklos rūšis, kai norime skirtingoms veikloms priskirti skirtingus biudžetus;

**Skelbimų grupės** – jas kuriame taip, kad kiekvienoje jų galima būtų sugrupuoti panašius raktažodžius. Galima kurti atskiras grupes skirtingiems produktų ar paslaugų rūšims, skirtingas grupes bendrinėms ir tikslinėms frazėms ir t.t.

Pastaba – vienas iš paprastų ir veiksmingų būdų sukurti reklaminės kampanijos struktūrą – remtis reklamuojamo tinklapio struktūra.

## Pavyzdys – paskyros struktūra

# Navigacija paskyroje

The screenshot displays the Google AdWords interface. At the top, the navigation bar includes 'Home', 'Campaigns', 'Opportunities', and 'Tools'. The 'Campaigns' tab is selected. The user's account information is shown as 'Customer ID: 962-084-6751' and 'mokymai@digitalacademy.lt'. A search bar is located on the left side of the main content area.

The main content area is titled 'All online campaigns' and shows a date range of 'Last 7 days: Jan 15, 2014 - Jan 21, 2014'. Below this, there are several tabs for navigation: 'Campaigns', 'Ad groups', 'Settings', 'Ads', 'Keywords', 'Audiences', 'Ad extensions', and 'Auto targets'. The 'Campaigns' tab is active.

Below the tabs, there are filters for 'All but deleted campaigns', 'Segment', 'Filter', and 'Columns'. There are also buttons for 'View Change History' and a 'Download' icon. A chart area shows a line graph with a single data point at '1' on 'Wednesday, January 15, 2014'. The x-axis is labeled 'Wednesday, January 15, 2014' and 'Tuesday, January ...'. The y-axis is labeled '0' and '1'.

Below the chart, there are buttons for '+ CAMPAIGN', 'Edit', 'Details', 'Bid strategy', 'Automate', and 'Labels'. A table of campaigns is displayed below these buttons.

<input type="checkbox"/>	<input type="checkbox"/>	Campaign	Campaign type ?	Campaign subtype	Budget ?	Status ?	↓ Clicks ?	Impr. ?	CTR ?

# Optimize quality score

## Optimizing for Quality Score

### What is Quality Score?

The 1-10 Quality Score reported for each keyword in your account is an estimate of the quality of your ads and the landing pages triggered by them. Higher quality ads can lead to lower cost-per-click (CPC) and better ad positions. Three factors determine your Quality Score:

- [Expected clickthrough rate](#)
- [Ad relevance](#)
- [Landing page experience](#)

### How to review Quality Score?

Your current [Quality Score and its component scores can be seen](#) with 4 Quality Score status columns: Quality Score, Landing page experience, Ad relevance, and Expected clickthrough rate (CTR).

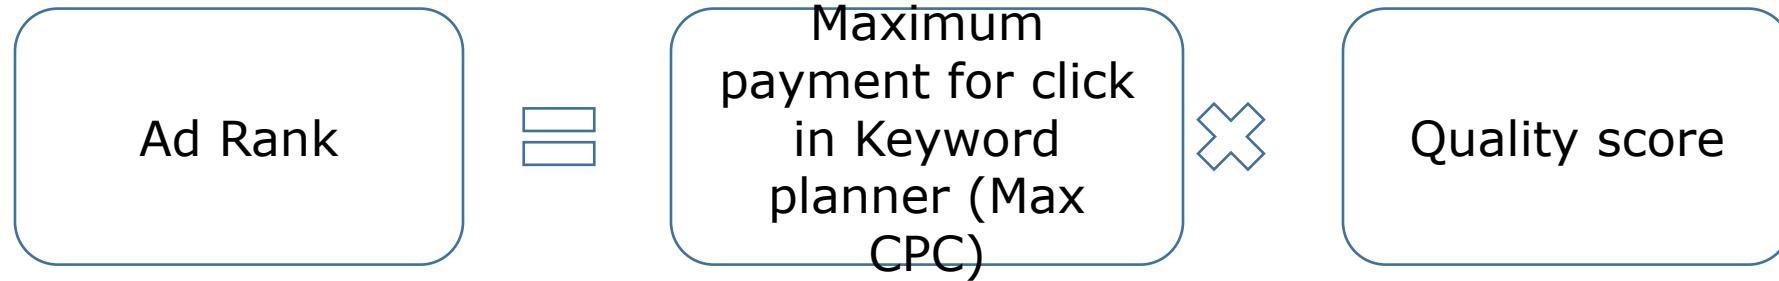

1. Click **Keywords** in the page menu.
2. Hover over a keyword's status in the "Status" column. You'll be able to see ratings for **Expected Click-through Rate, Ad Relevance, Landing Page Experience and Quality Score**.

### Tips for optimizing Quality Score

1. Understand Quality Score is a helpful diagnostic tool, not a key performance indicator.
2. Re-evaluate your [keyword choices](#). Keywords should be relevant to your organization's mission, and covered on your website; make sure you group these keywords in tight themes.
3. Create eye-catching and relevant [ad copies](#), include keywords in your ad text and [use strong call to actions](#).
4. Ensure a great [landing page](#) experience by including relevant content on the landing page and ultimately provide a better opportunity for conversions.
5. Improve [expect](#)

## Rating of our ad

Ad rank		Max CPC		Quality score
	=	1,00 EUR	×	8
	=	1,00 EUR	×	10
	=	2,35 EUR	×	3

## Actual CPC what exactly is paid per click

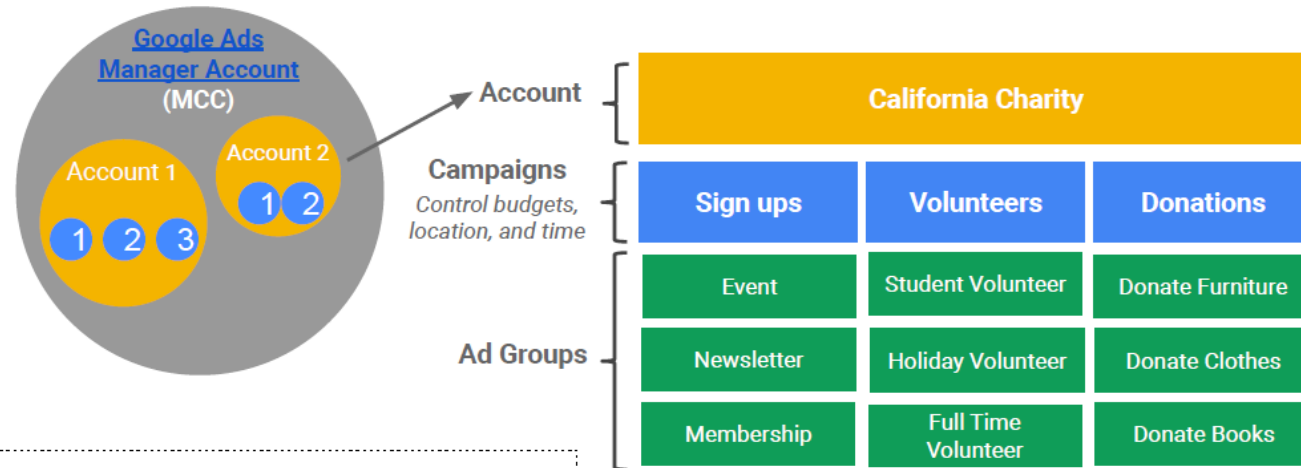

Paskutinėje vietoje esantis moka tam tikrą minimalią vertę, reikalingą pasirodymui paieškos rezultatuose (Google neatskleidžia, kiek konkrečiai). Kuo quality score yra mažesnis, tuo tokia reklama gali turėti aukštesnę kainą (matuojama taip vadinamu „estimated first page bid“).

**Google Ad Grants is a social impact program that connects people to causes through free Google Ads.**

*Since 2003, the Ad Grants Program has awarded over 115,000 Ad Grants and \$8B dollars in free advertising to organizations in 50+ countries.*

*Set Up An Account That Meets Your Goals*

## Sample Of Account Structure

### Minimum Requirements for Account Structure:

- 1 active campaign
- With 2 active ad groups
- With 2 text ads in each ad group

[Learn more about account structure](#)

# Budget allocation: per click, daily, monthly

- Daily may vary + / - 20 %
- Monthly will not exceed the set value

# Google Ads pricing application: how much does it cost to advertise, risk due to auction principle

- Start payment from above 50 USD
- Monthly payment with periodic adjustment
- Minimum value (not announced) for expense <50

# Google Ad grants experience for students: GOMC (Google online marketing challenge) by Google

- <https://www.google.com/grants/get-help/nonprofit-marketing-immersion/>

# Ad Grants OMC Post-campaign Report

# Executive Summary

- 1 Identify problem and set a goal to increase website traffic and donations.
- 2 Working with strategy development.
- 3 Analyzed Child Care Services Association website and systematized the information.
- 4 Identify ad group of CCSA: Providers group, Families group, Donators group.
- 5 Identify and create ad company: Educators, Directors, Find Child Care, Additional Resources, Donate for CCSA, Donate to Covid-19 Relief Fund.
- 6 Upload created ad campaigns to Google Adwords system.

# Campaign Overview

Proprietary + Confidential

## Campaign 1: Providers

We aimed to attract as many service providers to the CCSA website.

### **What can be improved:**

More interesting ad content;  
Keyword optimization.

## Campaign 2: Family

We tried to direct families with children in need of financial and informational assistance as possible to the CCSA website.

### **What can be improved:**

More interesting ad content;  
Keyword optimization.

## Campaign 3: Donations

We strive to attract as many donations as possible to the CCSA

**What can be improved:** Due to the Covid-19 situation, Google is sensitive to related ads and they has been blocked.

# Core Performance Metrics

The campaign had solid number of impressions, although total number of impressions decreased, the same was with clicks and CTR. On the other hand, it is hard to say if the campaign was weak or it had to be active for more time to increase some metrics.

# Online Marketing Strategy Analysis

**Strategy:**  
**Increase website traffic and donations**

Achieved overall quite good impressions total rate (223). Total clicks rate is very low (12)

**Goal 1:**  
**Drive more web traffic of child care providers in North Carolina**

Overall this goal is not achieved, because clicks rate is very low (6), but impressions rate is quite good (131).

**Goal 2:**  
**Drive more web traffic of families looking for child care in North Carolina**

Overall this goal is not achieved, because clicks rate is very low (6), but impressions rate is quite good (91).

**Goal 3:**  
**Increase donations**

This goal is not achieved. Campaign and ad groups have no impressions and clicks.

# Marketing Goal Achievement and Social Impact

- The organization is doing a great job in a child care area. They are helping the children in need to get a proper child care and education and moreover they are helping the educators and child care providers to get some additional money for their work.
- Our campaign was focused on the goal the non-profit organization had to us, to increase the web traffic of their target audience, so we did our best to show the ads to the target audience and not to the people who are not interested in the activity of this organization.

# Recommended Next Steps

**A**

The company could optimise their website to include more text and searched keywords and negative keywords.

**C**

Invest in more expensive keywords in the first week of your ads for better ads competition.

**B**

Create at least 100 different ads for each group.

**D**

To make an online donation's form for better website quality and google search optimisation.

# Learning Component

## Learning Objectives

Create a campaign

Team work

Increase site traffic

3 Ads Campaign

13 running ads

223 Impressions

## Outcome

**Deadline for submitting Post-Campaign report and Looker Studio reports:** July 1, 2023

**Professors nominate their best Teams:** June 1, 2023 – July 5, 2023

**Finalists announcement:** September 15, 2023

**Winner announcement:** October 15, 2023

All deadlines are 23:59 (11:59 pm) GMT

# Price levels for advertising in the internet

- The most common price range is 0.02 – 4 EUR per click
- Depending on the type of ad, and the competition the prices differ
- In Lithuania the horoscope webpage is cheap to advertise – 0.01- 0.02 EUR per click
- However if there are 50 enterprises willing to advertise in this webpage and only 11 places for putting advertisement, the price goes up and can reach 0.5-0.6 EUR

# How to decide worth of advertising?

- Main thing is conversion:
- If we have only 5% response form the customers viewing the ad, it means that after 20 shows, one customer asks for the purchase (e.g. yielding 10EUR profit). This profit has to be similar to the sum of advertising expenses for 20 customers ( $20 * \text{CPC}$ )

# Examples of conversions

- The advertising by Adwords of legal (law) or insurance services in United States can cost 50-60 USD
- However conversion yields about 4000 USD
- In Lithuania the fast credits are rather expensive 1-2 EUR per click. But the conversions do not sufficiently cover expense. However the second credit has much larger level of conversion, than the first - about 20% . Thus it is reasonable to advertise 0% for the first credit as it attracts 2-time customers.

# Possible abuse

- Automatically generated clicks can click on your ads. It means, that you will pay the cost per click sum as much as you have set in your budget, but no real customers will see your ad.
- The competitors using same keywords for their product search can manually click your ads till they reach sum of your budget (usually similar firms use similar advertising budgets, therefore it is easy to guess). Then your ads will never be shown to customers using the competitive keyword set

# Possible solution

- You can apply to Google for detecting automated click or manual clicking (defined by IP, location and reasonable interval of clicks or usual patterns of customer behaviour)
- If the abuse is confirmed, Google returns advertising expenses

# You can even make market forecast and define budget by Ads keyword prices

- The real estate ad prices grew for 3 times till 2008, then fell down for 2 times, now recovering up
- The most common advertising budget is 200-300 EUR per month
- Largest enterprises have it 10,000/month
- The top high- hosting centres (Mediashop)
- Large enterprises are now moving to Youtube (acquired by Google due to its potential)
