

# Transfer of hyphenation patterns across Slavic languages

- patterns = “model of hyphenation” for given set of words to hyphenate
  - good generalization
- hyphenation is syllabic
  - clear trend
- some languages have good hyphenation, some bad
- orthography different
- use IPA to bridge ɔ: 'θɔgrəfi

main reason i'm here;

i think it will be fun to discuss stuff with you?

taming the complexity

garbage in garbage out?

can this work?
