Console speed modification

console speed in /boot uEnv.txt

The console speed needs to be changed to:

console=ttyS0,9600n8

```

apt-get update – fix-missing

apt-get upgrade

apt-get install libmraa

apt-get install -y build-essential

mraa-gpio list

A test with push-button application:

mrra-gpio set 12 0

12 = GP-1 GPIO2_A5 (LED pin in the hardware description)

0 = pin's value
