reacts knowledge**

The optimum design of sports equipment _____ the application of a number of disciplines, not only for _____ performance but also to make the equipment as user-friendly as possible from the standpoint of _____ avoidance. Clearly, this design includes materials science, mechanical engineering, and physics; however, _____ of anatomy, physiology, and biomechanics is also necessary. *Biomechanics* can be simply defined as the science of how the body _____ to internal and external forces. Thus, it is an attempt to apply the basic laws of physics and mechanics to the _____, ligaments, and tissues of the body as they are subjected to loading. In designing sports equipment, the various characteristics of materials must be _____. Among these characteristics are _____, density, fatigue resistance, toughness, modulus (damping), and cost.

TASK 3

Reading

Seven parts of sentences have been removed from the text below. Choose from the removed parts (A-G) the one which fits each gap. Write the appropriate letter next to a number, e.g. 4A.

- A) the client is overtrained or at risk of becoming overtrained
- B) carries a risk of overtraining
- C) some immediate changes in the program
- D) who is extremely motivated
- E) to perform well and concentrate
- F) or overload, the physiological systems
- G) work, home, social interactions, and training load

A basic principle of training is to stress, (1) _____. Positive stress causes the body to respond with, for example, increases in strength, muscular endurance, or cardiorespiratory capacity.

The basic training principle of using progressive increases in overload (2) _____.

Overtraining is a combination of stress that is experienced through (3) _____. It can lead to exhaustion and injury. You must avoid overtraining the client by first placing work and recovery cycles into the plan and then altering the training program when it becomes apparent that _____.

Susceptibility to overtraining can result from a combination of a hard-driving trainer and a client (5) _____. The underlying causes of overtraining are a combination of emotional and physical factors.

Although the symptoms of overtraining may vary greatly from one individual to another, the most common are feelings of heaviness and the inability (6) _____. Working out is no longer a joy. If you believe this situation exists, it is time to make (7) _____.

TASK 4

Translations

Translate into English:

Zdravá výživa

Natažené svaly

Rozsah pohybu

Tréninková jednotka – trénink

Srdeční frekvence

TASK 5

Grammar

Transform the sentences so that they have the same meaning as before.

1. The lecture was really confusing for the students.
The students were really after the lecture.
2. It is not necessary for you to leave now.
You leave now.
