### The DSM Diagnostic Criteria for Gender Identity Disorder in Adolescents and Adults

Author(s): Cohen-Kettenis, PT (Cohen-Kettenis, Peggy T.)<sup>[1]</sup>; Pfaefflin, F (Pfaefflin, Friedemann)<sup>[2]</sup>

Source: ARCHIVES OF SEXUAL BEHAVIOR Volume: 39 Issue: 2 Pages: 499-513 DOI: 10.1007/s10508-009-9562-y Published: APR 2010

Times Cited: 22 (from Web of Science)

Cited References: 99 [view related records] Citation Map

**Abstract:** Apart from some general issues related to the Gender Identity Disorder (GID) diagnosis, such as whether it should stay in the DSM-V or not, a number of problems specifically relate to the current criteria of the GID diagnosis for adolescents and adults. These problems concern the confusion caused by similarities and differences of the terms transsexualism and GID, the inability of the current criteria to capture the whole spectrum of gender variance phenomena, the potential risk of unnecessary physically invasive examinations to rule out intersex conditions (disorders of sex development), the necessity of the D criterion (distress and impairment), and the fact that the diagnosis still applies to those who already had hormonal and surgical treatment. If the diagnosis should not be deleted from the DSM, most of the criticism could be addressed in the DSM-V if the diagnosis would be renamed, the criteria would be adjusted in wording, and made more stringent. However, this would imply that the diagnosis would still be dichotomous and similar to earlier DSM versions. Another option is to follow a more dimensional approach, allowing for different degrees of gender dysphoria depending on the number of indicators. Considering the strong resistance against sexuality related specifiers, and the relative difficulty assessing sexual orientation in individuals pursuing hormonal and surgical interventions to change physical sex characteristics,

### News feeds from the BBC

#### What are News Feeds?

News feeds allow you to see when websites have added new content. You can get the latest headlines and video in one place, as soon as it's published, without having to visit the websites you have taken the feed from.

Feeds are generally known as RSS ('Really Simple Syndication') which are just web pages, designed to be read by computers rather than people.

BBC News provides feeds for both the desktop website as well as for our mobile site and the most popular feeds are listed here.

You can also access RSS feeds directly from pages on the site - the orange RSS icon will appear when a feed is available.

1. **Emerging adult perceptions of parental religiosity and parenting practices: Relationships with religiosity and psychological adjustment.**

Power, Leah McKinney, Cliff; Psychology of Religion and Spirituality, Vol 5(2), May, 2013. pp. 99-109. [Journal Article]

Recent research suggests that little is known about how parental religiosity influences child development, in particular the de  
research posits that ...

The screenshot shows the ResearchGate profile of Thomas Cash. The profile includes a navigation bar with 'ResearchGate', home, Q&A, Publications, Projects, and a search bar. The author's name 'Thomas Cash' is prominently displayed, along with his title 'Ph.D. Professor Emeritus' and affiliation 'Old Dominion University - Department of Psychology'. A 'Send message' button is visible. Below the profile header, there are tabs for 'OVERVIEW', 'CONTRIBUTIONS', 'INFO', 'STATS', and 'RG SCORE'. The 'OVERVIEW' tab is active, showing a summary of his work: 152 publications, 6k views, 3,737 downloads, 3,396 citations, and 264.80 impact points. To the right, his affiliation 'Old Dominion University, Department of Psychology, Norfolk, United States' is listed. Below the overview, there are sections for 'FEATURED PUBLICATIONS' and 'TOP CO-AUTHORS'. The featured publication is an article titled 'Multiple Perspectives on the Psychology of Plastic Surgery' by Thomas Pruzinsky, David B. Sarwer, Thomas F. Cash, Robert M. Goldwyn, John A. Persing, and Linton A. Whitaker. The top co-authors listed are Joel Kevin Thompson (University of South Florida) and David B Sarwer (University of Pennsylvania).

**Research Interests:** [Stable Isotope Analysis, Human-Environment Interactions, Nutrition, and 33 more](#)

**About:** I am a physical anthropologist specializing in stable carbon and nitrogen isotope biochemistry. My primary research interest is in human ecology, focusing on diet as the critical integrative link between human physiology, behavior and the environment. Much of my research concerns diet and diet change in Europe. Another particular interest of mine beyond diet reconstruction is the application of stable isotope analysis to understanding human physiology, past and present. Other ongoing research involves past human mobility, life history and non-human primate weaning.
