Volume 18

Issue 2

Evidence-Based Mental Health aims to engage psychiatrists and psychologists, particularly younger professionals, in the challenge of basing their practice on evidence.

Published by the [Royal College of Psychiatrists](#), the [British Psychological Society](#) and BMJ the journal surveys a wide range of international medical journals, applying strict criteria for the quality and validity of research. Clinicians assess the relevance of the best studies and the key details of these essential articles are presented in a succinct, informative expert commentary on their clinical application. *Evidence-Based Mental Health* also publishes Editorials, Perspectives, Reviews and Original Content.

The DSM Diagnostic Criteria for Gender Identity Disorder in Adolescents and Adults

Author(s): Cohen-Kettenis, PT (Cohen-Kettenis, Peggy T.)^[1]; Pfafflin, F (Pfaefflin, Friedemann)^[2]

Source: ARCHIVES OF SEXUAL BEHAVIOR Volume: 39 Issue: 2 Pages: 499-513 DOI: 10.1007/s10508-009-9562-y Published: APR 2010

Times Cited: 22 (from Web of Science)

Cited References: 99 [view related records] Citation Map

Abstract: Apart from some general issues related to the Gender Identity Disorder (GID) diagnosis, such as whether it should stay in the DSM-V or not, a number of problems specifically relate to the current criteria of the GID diagnosis for adolescents and adults. These problems concern the confusion caused by similarities and differences of the terms transsexualism and GID, the inability of the current criteria to capture the whole spectrum of gender variance phenomena, the potential risk of unnecessary physically invasive examinations to rule out intersex conditions (disorders of sex development), the necessity of the D criterion (distress and impairment), and the fact that the diagnosis still applies to those who already had hormonal and surgical treatment. If the diagnosis should not be deleted from the DSM, most of the criticism could be addressed in the DSM-V if the diagnosis would be renamed, the criteria would be adjusted in wording, and made more stringent. However, this would imply that the diagnosis would still be dichotomous and similar to earlier DSM versions. Another option is to follow a more dimensional approach, allowing for different degrees of gender dysphoria depending on the number of indicators. Considering the strong resistance against sexuality related specifiers, and the relative difficulty assessing sexual orientation in individuals pursuing hormonal and surgical interventions to change physical sex characteristics,

What are News Feeds?

News feeds allow you to see when websites have added new content. You can get the latest headlines and video in one place, as soon as it's published, without having to visit the websites you have taken the feed from.

Feeds are generally known as RSS ('Really Simple Syndication') which are just web pages, designed to be read by computers rather than people.

BBC News provides feeds for both the desktop website as well as for our mobile site and the most popular feeds are listed here.

You can also access RSS feeds directly from pages on the site - the orange RSS icon will appear when a feed is available.

LISTSERV: Search lists with *CataList*

50

□ Example:

L-Soft

List search

This form allows you to search the database for lists whose name (XYZ-L), host name (LISTSERV.XYZ.EDU) and/or title ("Central America Discussion List") matches your search string. You can search for multiple topics by separating them with a comma. For instance, a search on "opera,classical" will return all the entries containing the word "opera" OR the word "classical". To search for a topic that actually contains a comma, type two commas in a row.

Look for:

In: List name Host name List title
