**MENDELEY**

# MENDELEY (Reference Manager)

10

- Mendeley has **two** synchronized interfaces:
  - Desktop software: Software and documents manager.
  - Web Application: Incl. also an academic social network

# MENDELEY (Reference Manager)

11

- **Key characteristics** of Mendeley:
  - Content discovery & access
  - Knowledge management & collaboration
  - Publication & dissemination

# MENDELEY (Reference Manager)

12

- On April 9<sup>th</sup> 2013, Elsevier acquired Mendeley

ELSEVIER

# MENDELEY: Create your account

13

The image shows a laptop displaying the Mendeley website's account creation page. The page features the Mendeley logo at the top left, a 'Sign in' button at the top right, and the headline 'Your research, anywhere.' followed by the sub-headline 'For students and researchers'. Below this, a paragraph describes Mendeley as a free reference manager and academic social network. A prominent red button labeled 'Create a free account' is centered on the page. At the bottom, it lists download options for Mac, Windows, and iOS. The background of the website is a dark, wood-grain texture with a laptop, a notebook, and a pen visible.

MENDELEY

Have an account? [Sign in](#)

## Your research, anywhere.

*For students and researchers*

Mendeley is a **free reference manager** and academic **social network**.  
Make your own **fully-searchable library** in seconds, **cite** as you write,  
and **read and annotate** your PDFs on any device.

**Narrative Health Communication and Behavior Change:  
The Influence of Exemplars in the News on Intention to  
Quit Smoking.**

Authors: H. Kim, C. Bigman, A. Leader et al.

Journal: *The Journal of communication*

Year: 2012

Volume: 62

Issue: 3

Pages: 473-492

**Abstract:**

This study investigated psychological mechanisms underlying the effect of narrative health communication on behavioral intention. Specifically, the study examined how exemplification in news about successful smoking cessation affects recipients' narrative engagement, thereby changing their intention to quit smoking. Nationally representative samples of U.S. adult smokers participated in 2 experiments. The results from the 2 experiments consistently showed that smokers reading a news article with an exemplar experienced greater narrative engagement compared to those reading an article without an exemplar. Those who reported more engagement were in turn more likely to report greater smoking cessation intentions.

**Reducing obesity and related chronic disease risk in children and youth: a synthesis of evidence with 'best practice' recommendations.**

Authors: M. Flynn, D. McNeil, B. Maloff et al.

Journal: *Obesity reviews : an official journal of the International Association for the Study of Obesity*

Year: 2006

Volume: 7 Suppl 1

Issue:

Pages: 7-66

**Abstract:**  
Childhood obesity is a global epidemic and rising trends in overweight and obesity are apparent in both developed and developing countries. Available estimates for the period between the 1980s and 1990s show the prevalence of overweight and obesity in children increased by a magnitude of two to five times in developed countries (e.g. from 11% to over 30% in boys in Canada), and up to almost four times in developing countries (e.g. from 4% to 14% in Brazil). The goal of this synthesis research study was to develop best practice recommendations based on a systematic approach to finding, selecting and critically appraising programmes addressing prevention and treatment of childhood obesity and related risk of chronic diseases. An international panel of experts in areas of relevance to obesity provided guidance for the study. This synthesis research encompassed a comprehensive search of medical/academic and grey literature and the Internet covering the years 1982-2003. The appraisal approach developed to identify best practice was unique, in that it considered not only methodological rigour, but also population health, immigrant health and programme development/evaluation perspectives in the assessment. Scores were generated based on pre-determined criteria with programmes scoring in the top tertile of the scoring range in any one of the four appraisal categories included for further examination. The synthesis process included identification of gaps and an analysis and summary of programme development and programme effectiveness to enable conclusions to be drawn and recommendations to be made. The results from the library database searches (13,158 hits)...

# MENDELEY: File (Menu bar)

56

The screenshot displays the Mendeley Desktop interface. The 'File' menu is open, showing options such as 'Add Files...', 'Import...', 'Export...', 'Merge Documents', and 'Delete Documents'. A red arrow points from the 'Merge Documents' option in the menu to a yellow tooltip in the document list. The tooltip contains the text '2 documents selected' and 'Edits will affect all selected documents.' with a 'Merge Documents' button. Another red arrow points from the text 'Click here or here' to the 'Merge Documents' button in the tooltip. The document list shows several entries with columns for Authors, Title, Year, Published In, and Added.

## Prevalence and correlates of eating disorders in adolescents. Results from the national comorbidity survey replication adolescent supplement.

[Swanson SA](#)<sup>1</sup>, [Crow SJ](#), [Le Grange D](#), [Swendsen J](#), [Merikangas KR](#).

### ⊕ Author information

#### Abstract

**CONTEXT:** Eating disorders are severe conditions, but little is known about the prevalence or correlates of these disorders from population-based surveys of adolescents.

**OBJECTIVES:** To examine the prevalence and correlates of eating disorders in a large, representative sample of US adolescents.

**DESIGN:** Cross-sectional survey of adolescents with face-to-face interviews using a modified version of the Composite International Diagnostic Interview.

**SETTING:** Combined household and school adolescent samples.

**PARTICIPANTS:** Nationally representative sample of 10,123 adolescents aged 13 to 18 years.

**MAIN OUTCOME MEASURES:** Prevalence and correlates of eating disorders and subthreshold conditions.

**RESULTS:** Lifetime prevalence estimates of anorexia nervosa, bulimia nervosa, and binge-eating disorder were 0.3%, 0.9%, and 1.6%, respectively. Important differences were observed between eating disorder subtypes concerning sociodemographic correlates, psychiatric comorbidity, role impairment, and suicidality. Although the majority of adolescents with an eating disorder sought some form of treatment, only a minority received treatment specifically for their eating or weight problems. Analyses of 2 related subthreshold conditions suggest that these conditions are often clinically significant.

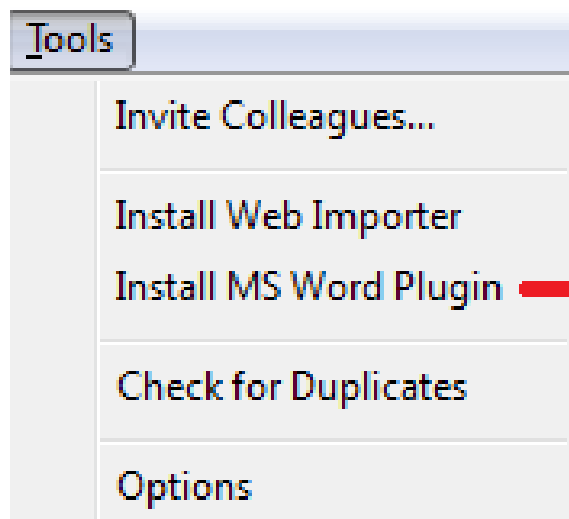

**CONCLUSIONS:** Eating disorders and subthreshold eating conditions are prevalent in the general adolescent population. Their impact is demonstrated by generally strong associations with other psychiatric disorders, role impairment, and suicidality. The unmet treatment needs in the adolescent population place these disorders as important public health concerns.

## □ General

The screenshot shows the 'Options' dialog box with the 'General' tab selected. The window title is 'Options' and it has standard Windows window controls (minimize, maximize, close). The 'General' tab is active, and other tabs include 'Document Details', 'File Organizer', 'Watched Folders', 'BibTeX', 'Zotero', and 'Connection'. The 'Account Usage' section contains a message: 'For more Web Space, restricted groups and members, please [upgrade your account](#).' Below this, there are two progress bars: 'Personal Web Space' (474 MB / 5 GB) and 'Shared Web Space' (8 MB / 20 GB). At the bottom, there is a table titled 'Restricted groups that you own' with columns for 'Web Space' and 'Members'. The table lists two groups: 'POPs and Biobehavioral Outcomes' (8 MB, 1/25 members) and 'Tests and Measures in the Social Sciences' (0 MB, 1/25 members). At the bottom right of the dialog are 'OK', 'Cancel', and 'Apply' buttons.
