# Prečo skúmať mesto z hľadiska volebnej geografie?

- Mesto nie je homogénna jednotka, je vnútorne heterogénne
- Priestorová variácia v mestách vykazuje určité vzorce
- Málo preskúmaná, resp. vôbec nepreskúmaná oblasť
- Suplovanie sociálnych dát (O'Loughlin et al. 1997; Charney a Malkinson 2015)
- Lepšia dostupnosť volebných dát
- Význam v politickom marketingu - geotargeting

# Čo vieme?

- Ľavicové/demokratické vnútromesto vs. pravicové/republikánske vonkajšie mesto
- Aj v ČR?

## Predictor Importance

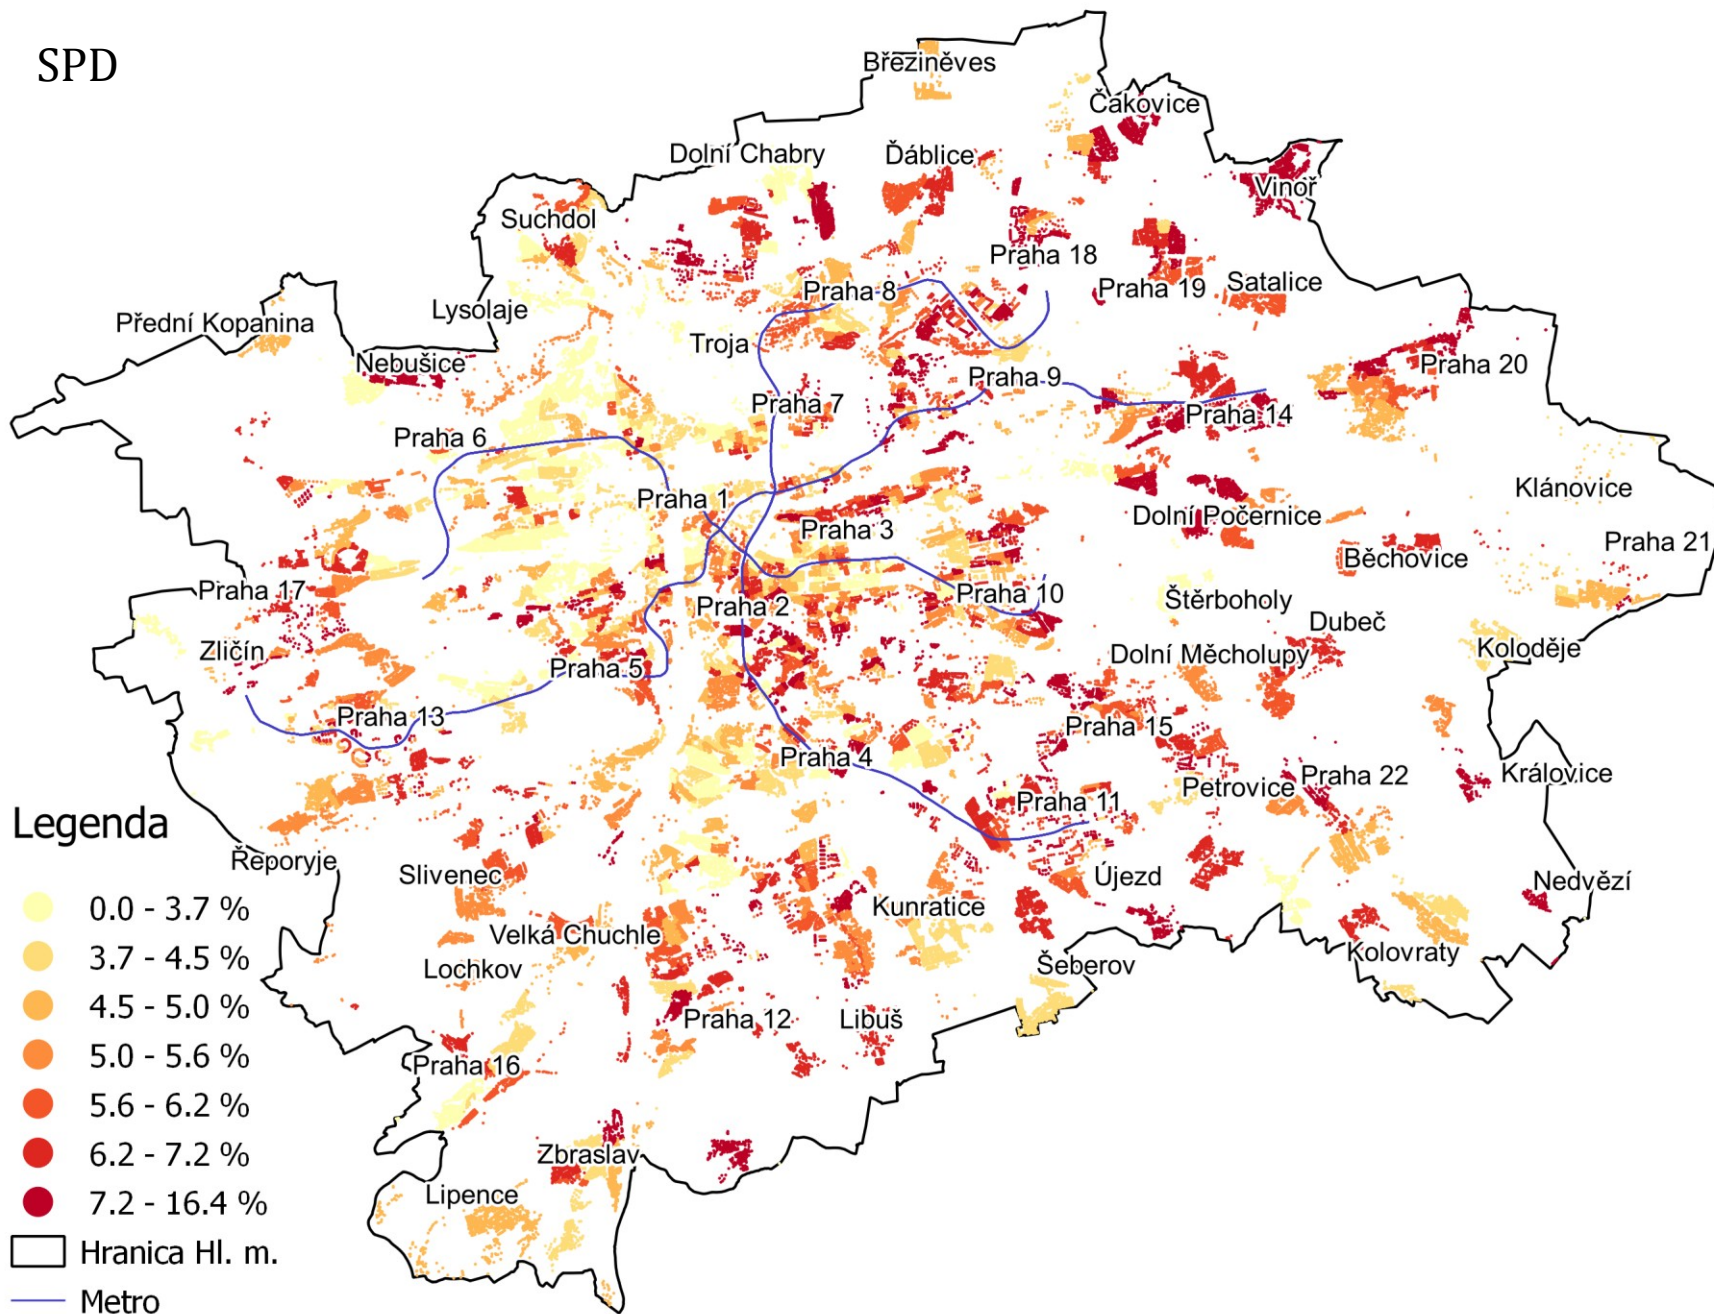

Target: ANO 2011

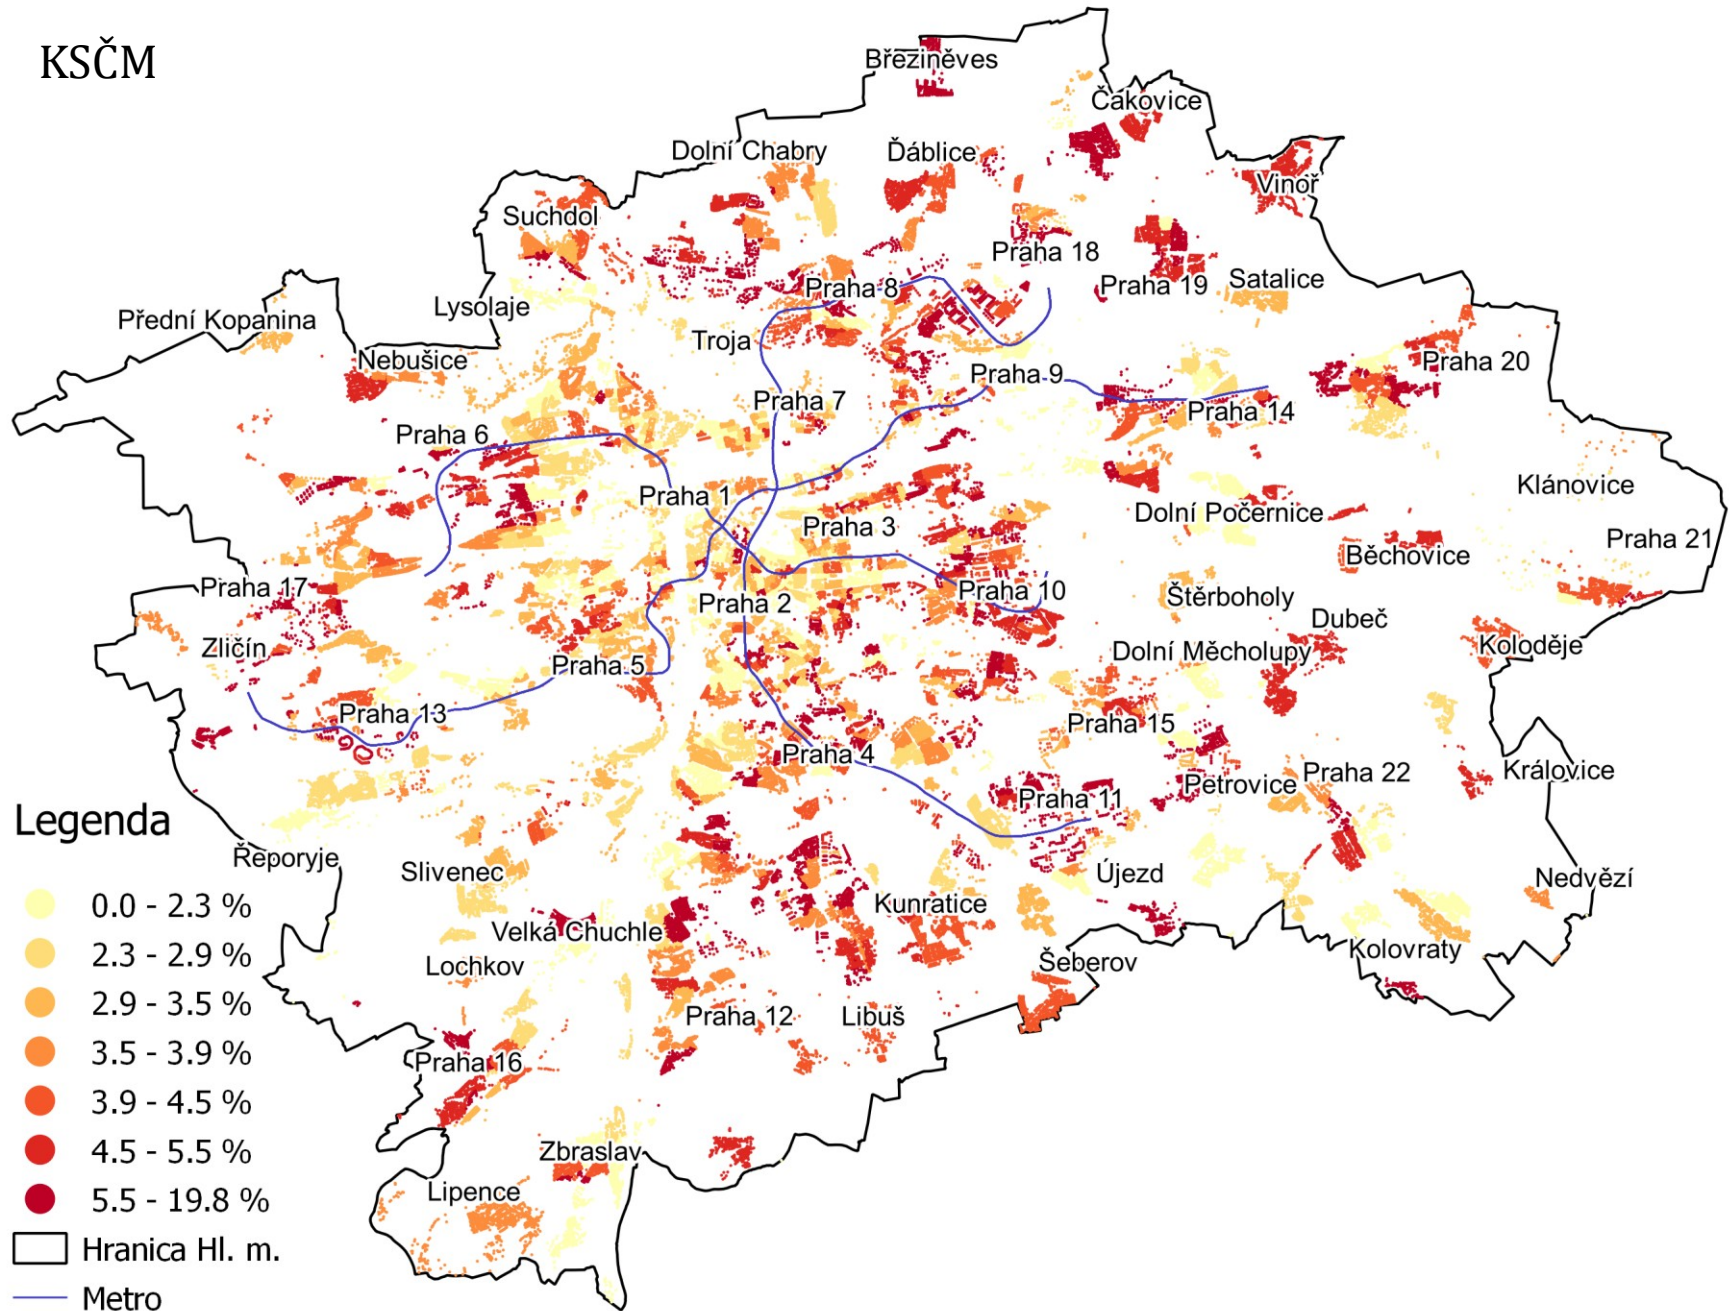

# SPD

# KSČM

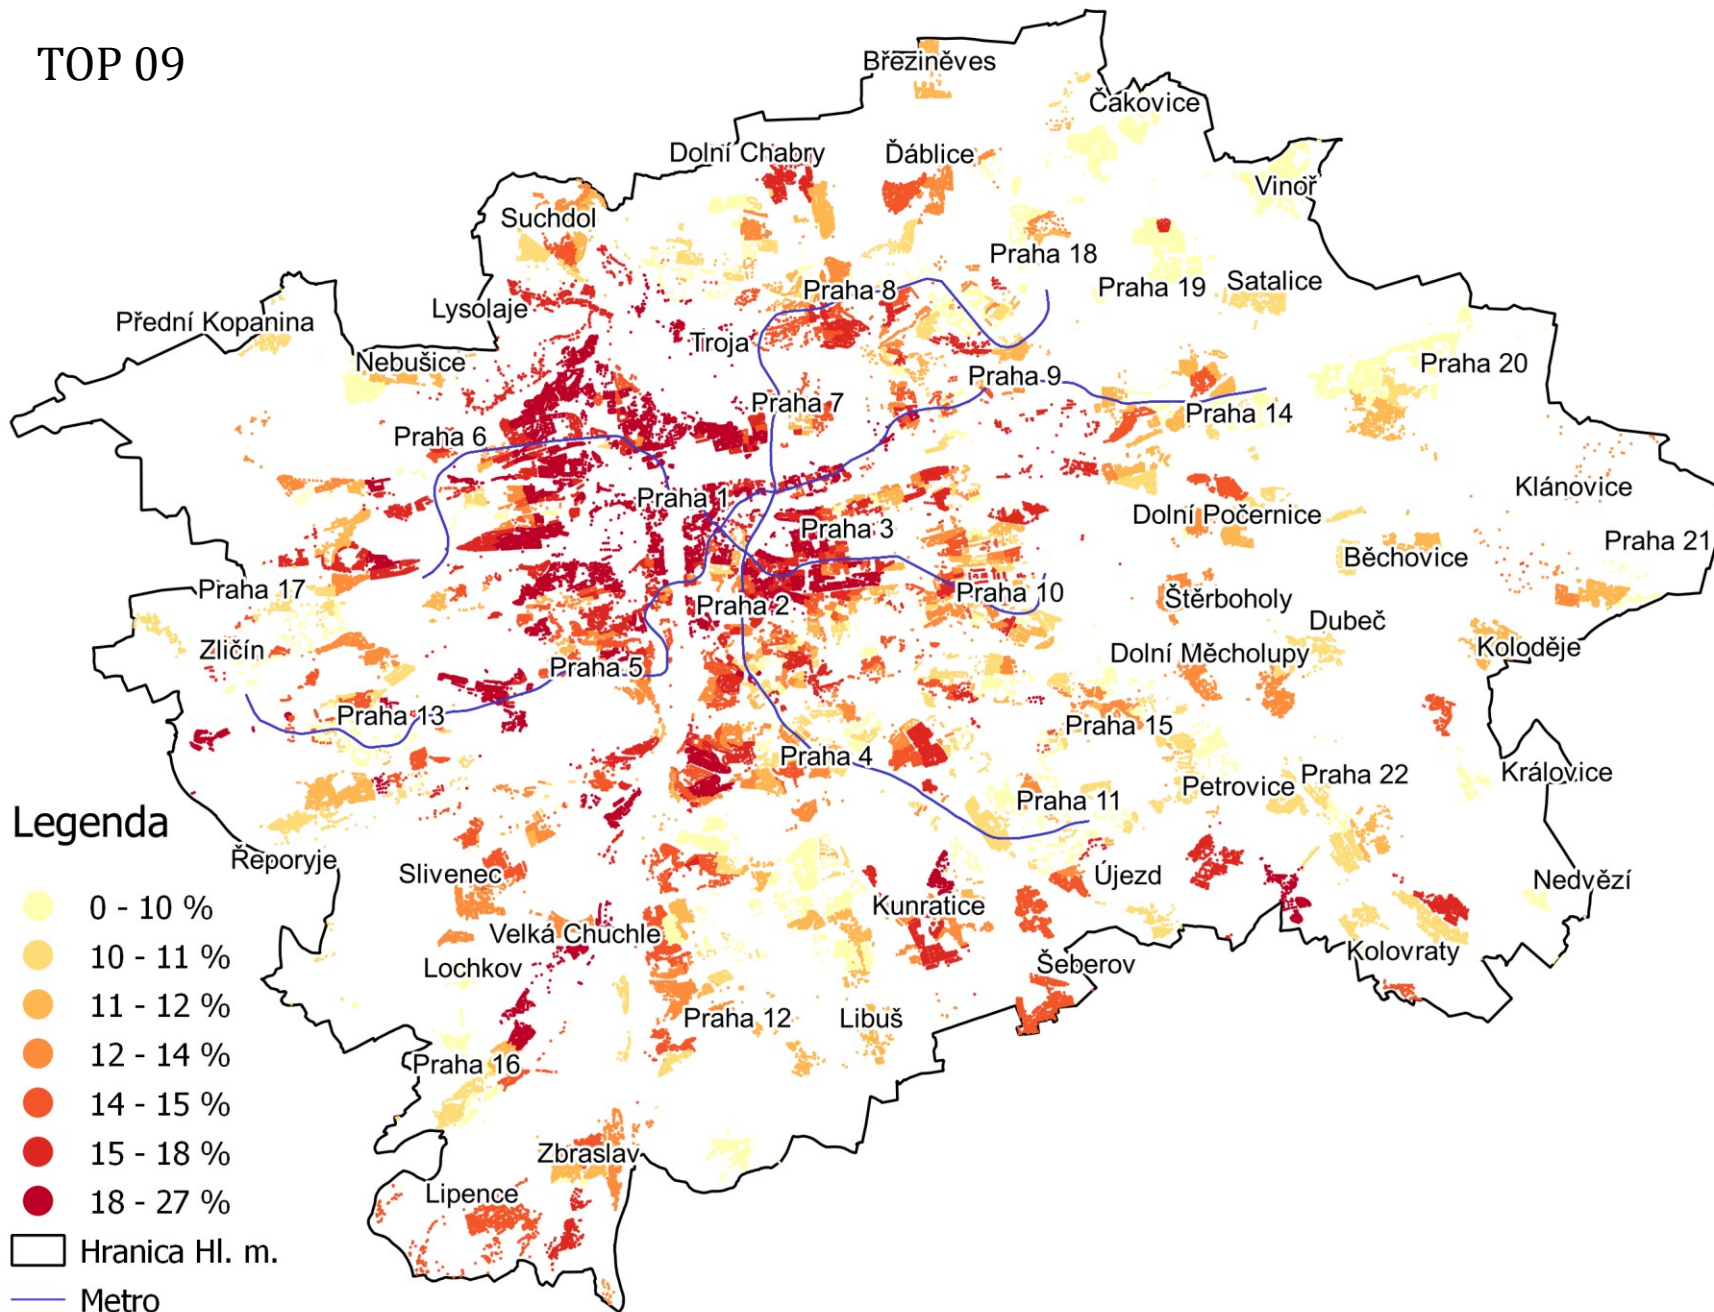

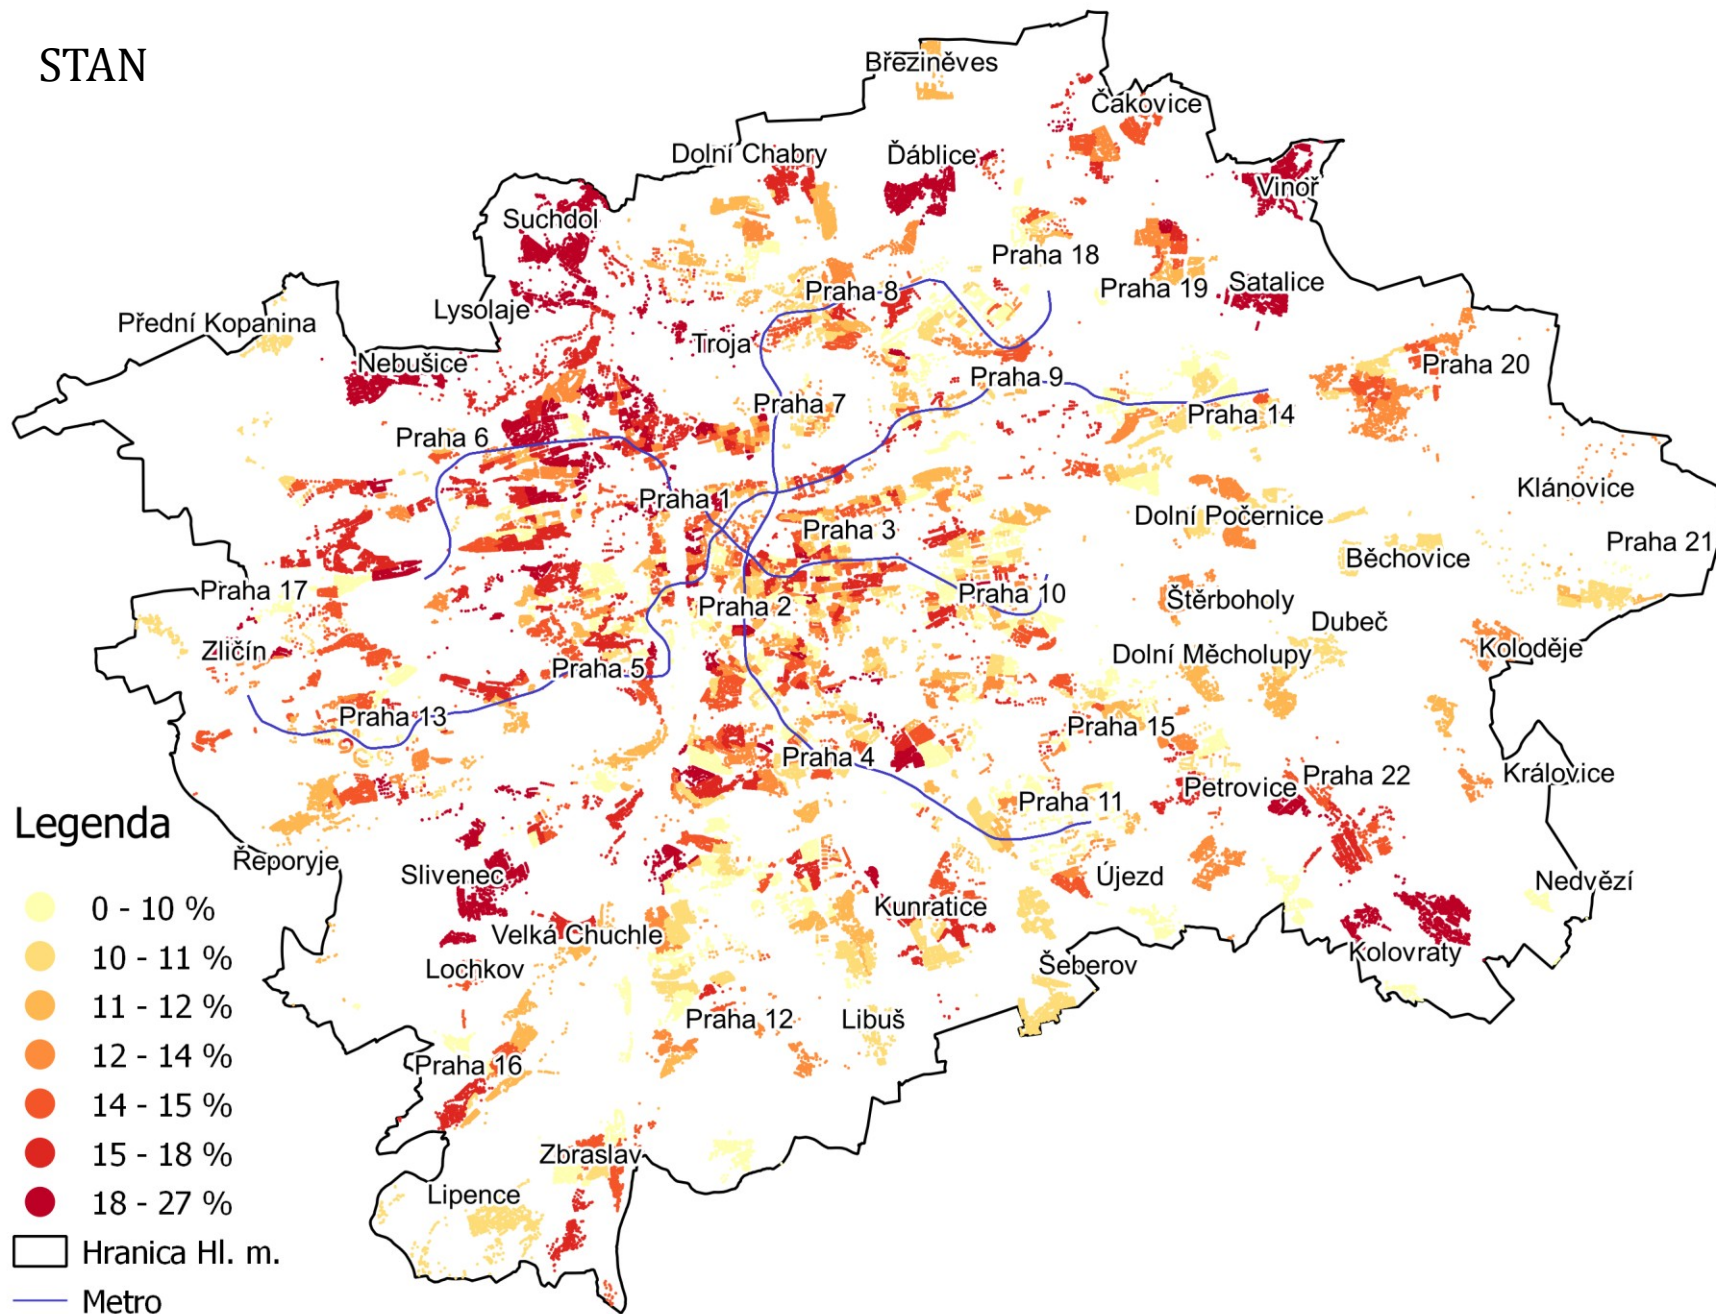

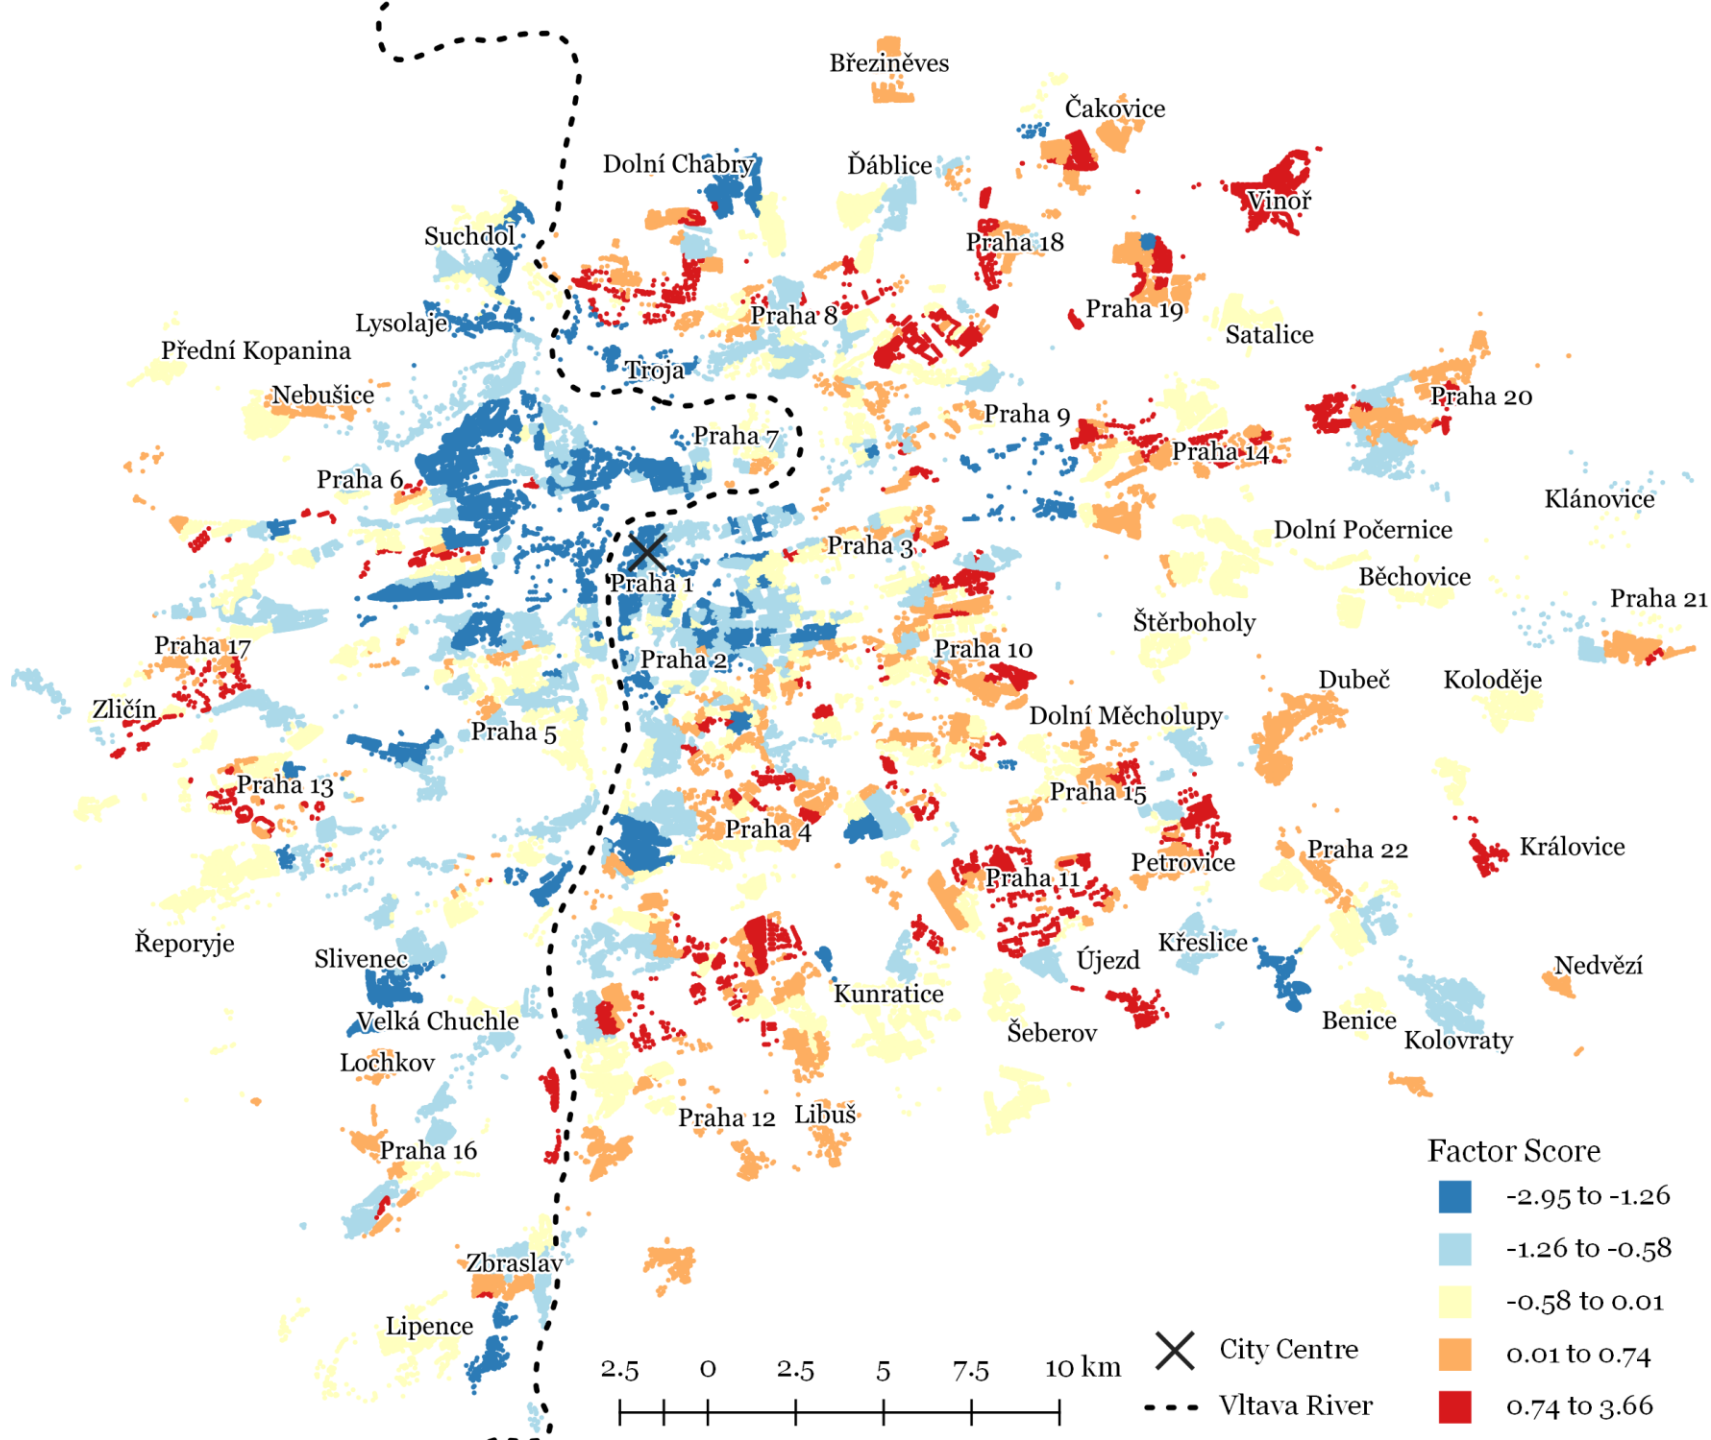

# TOP 09

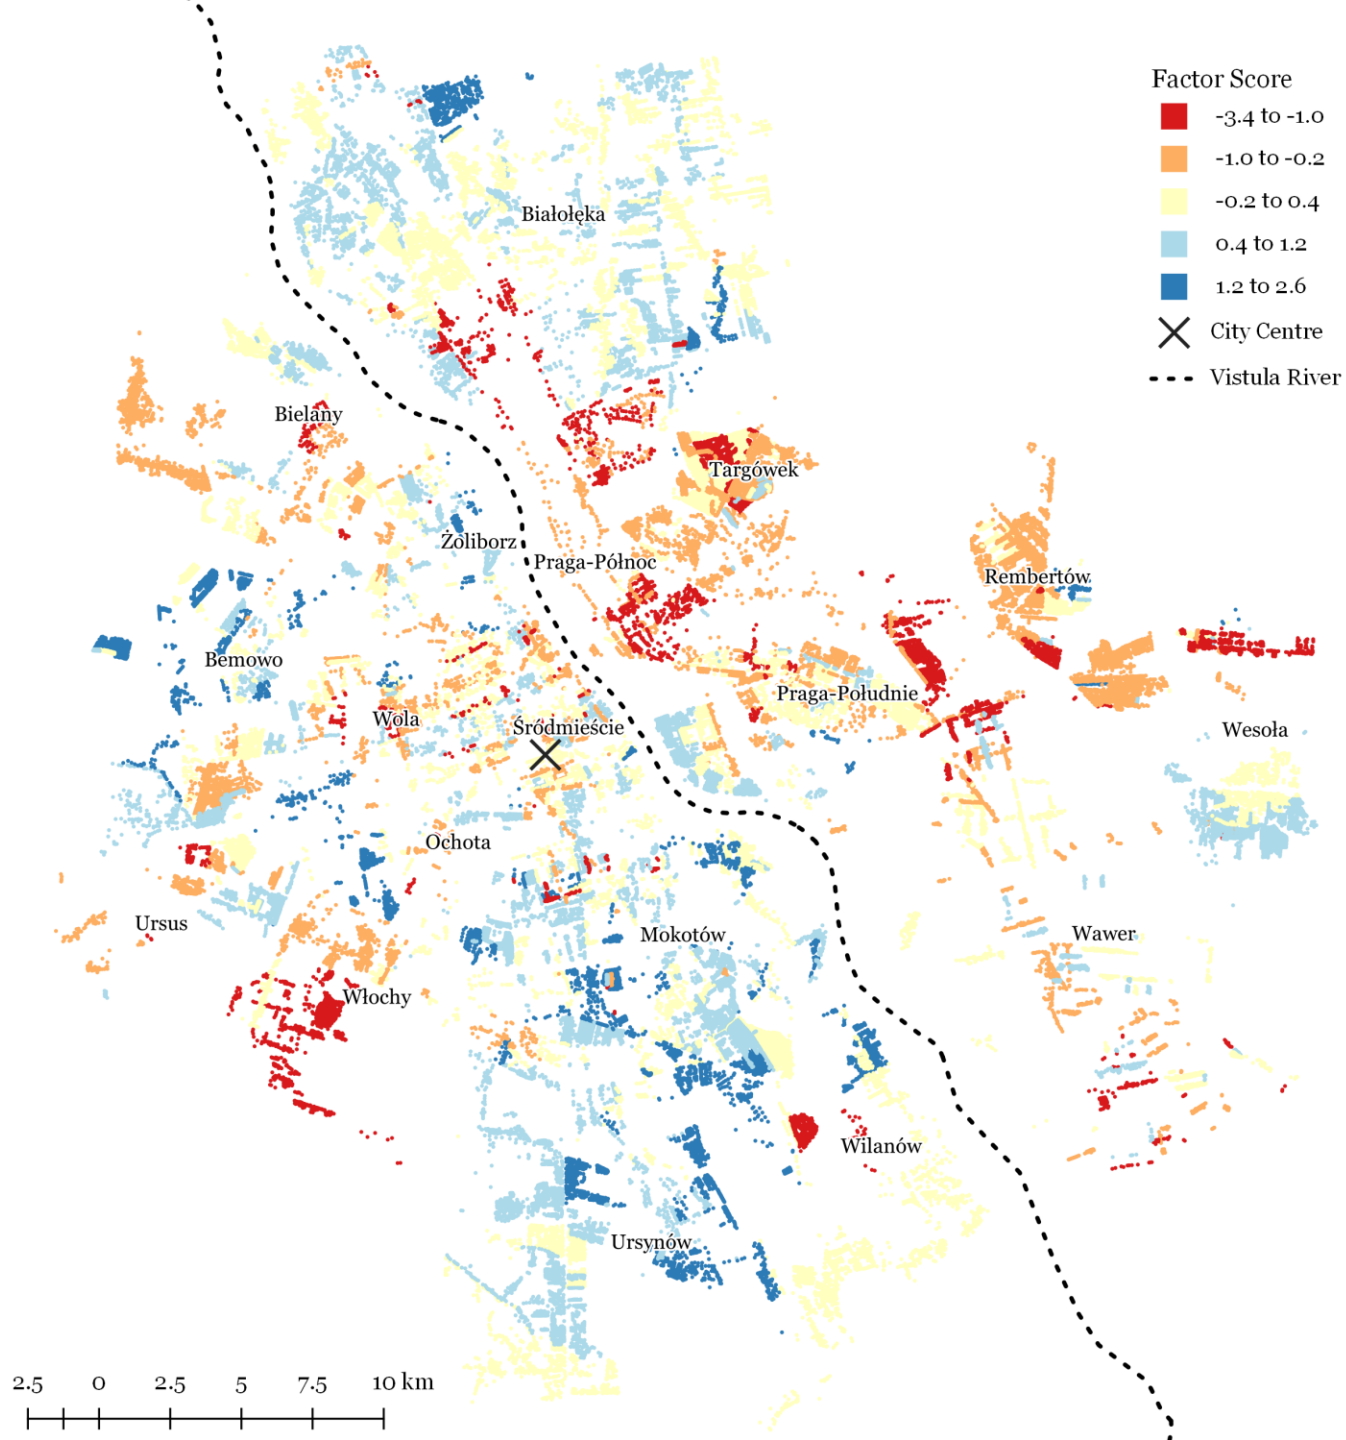

# STAN

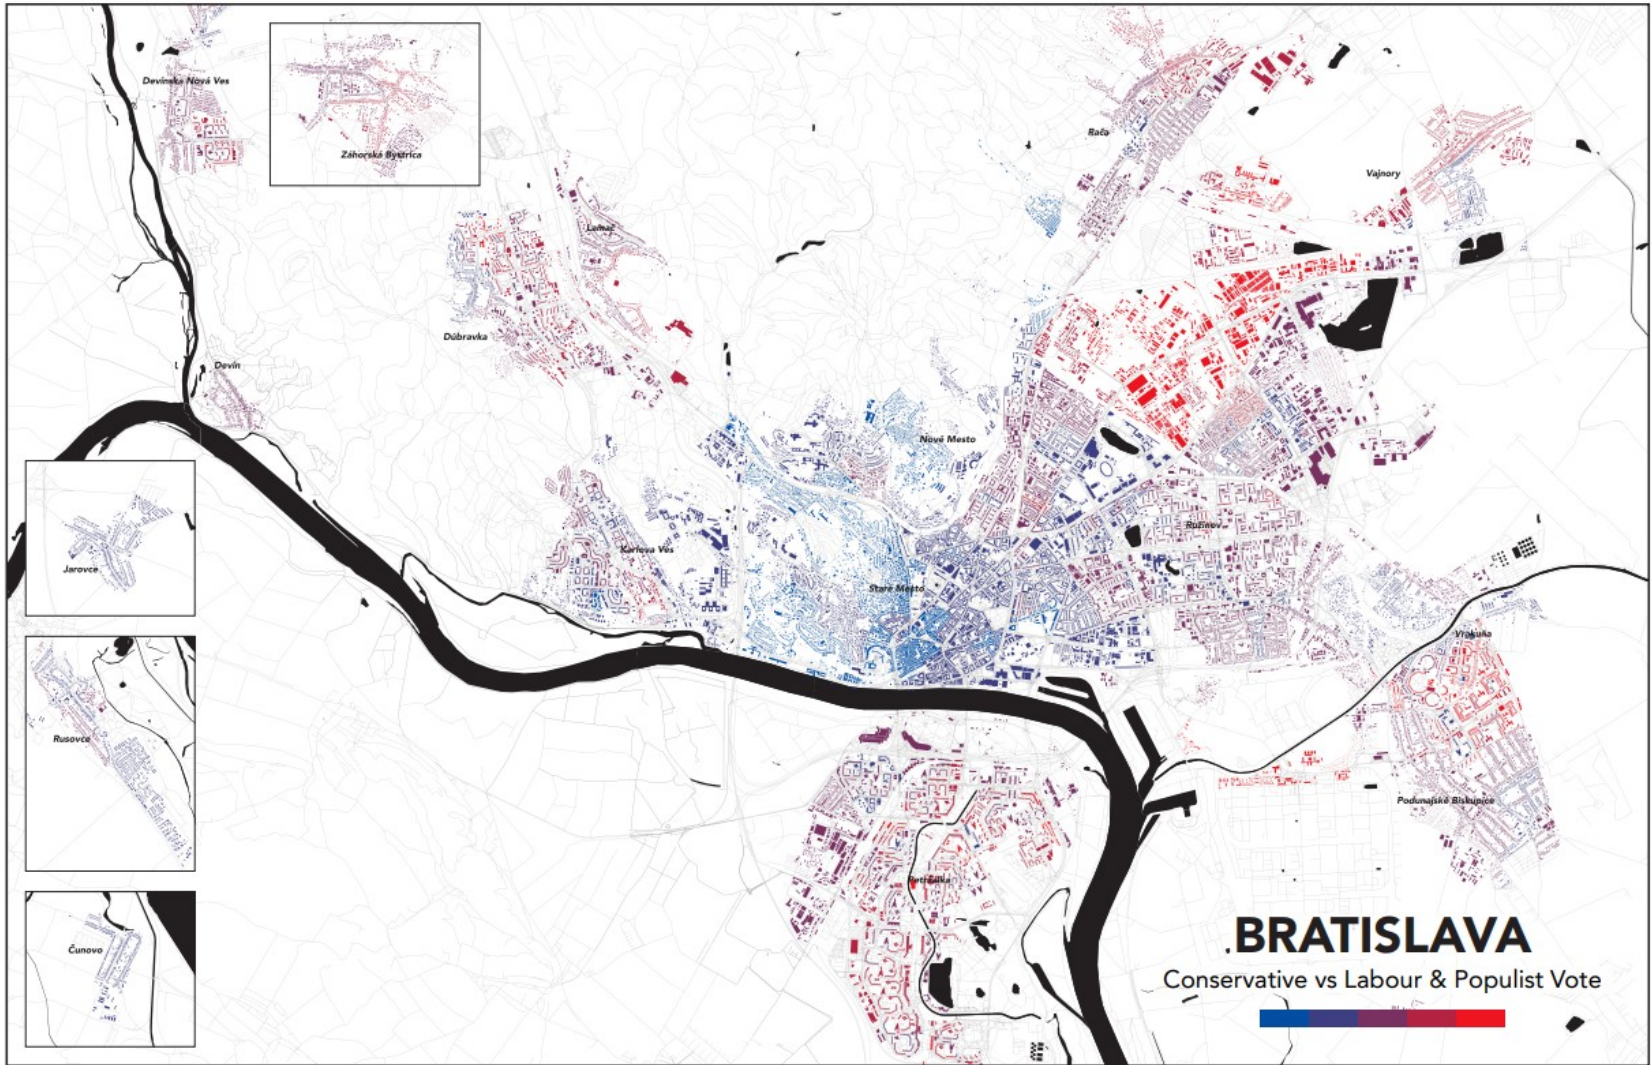

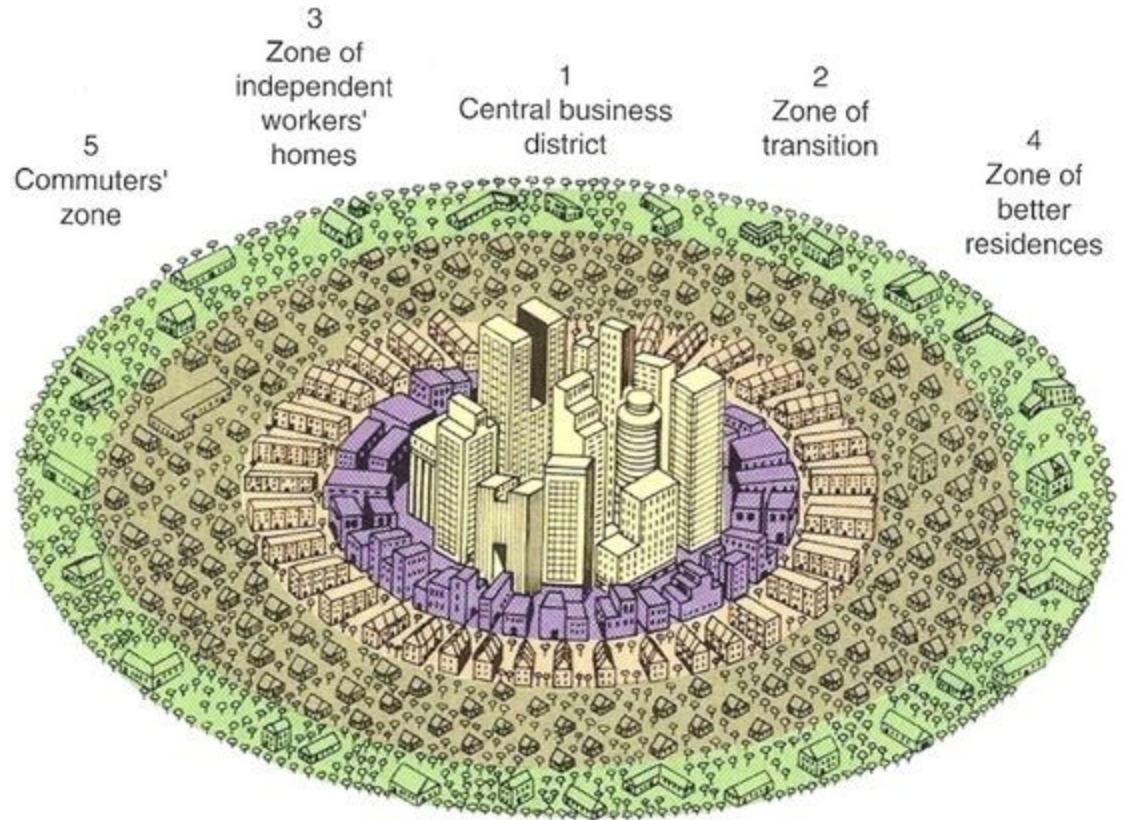

# Burgess Concentric Zone Model

- 1 Central business district
- 2 Zone of transition
- 3 Zone of independent workers' homes
- 4 Zone of better residences
- 5 Commuters' zone

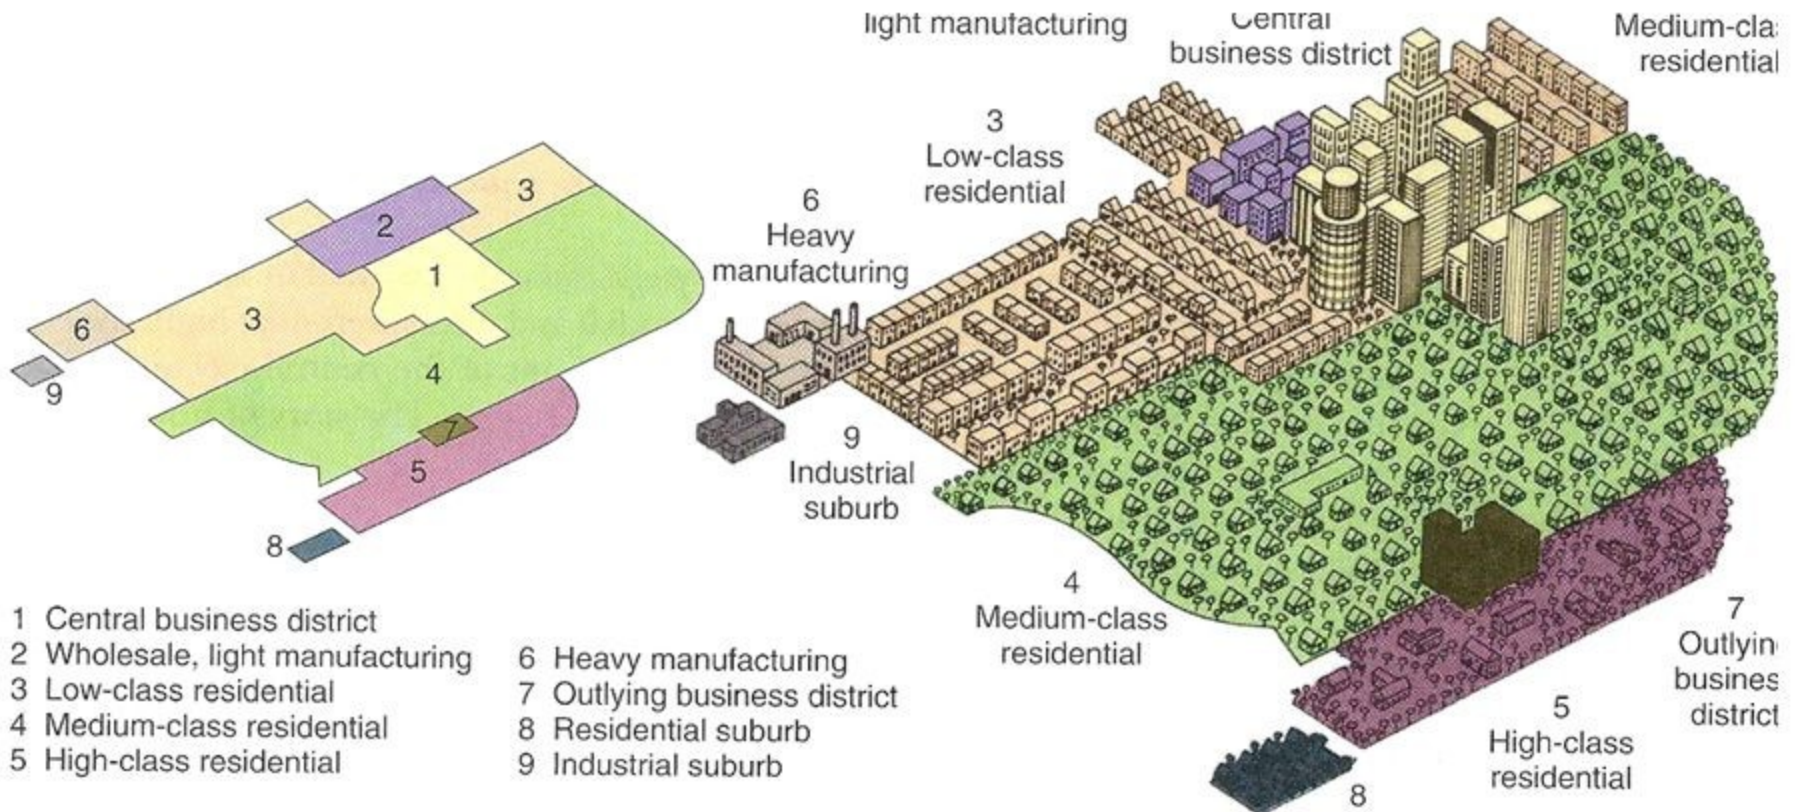

# Hoyt Sector Model

1. Central business district
2. Transportation and industry
3. Low-class residential
4. Middle-class residential
5. High-class residential

# Multiple Nuclei Model : Harris and Ullman

# Záver

- mestá v ČR majú spravidla koncentrické usporiadanie
- neplatí všeobecný vzorec o ľavicovom vnútornom meste a pravícovom vonkajšom meste
- skôr pravica – ľavica – pravica
