

Military Responses to Unintentional Threats

Unintentional and natural threats to security (BSSb1194)

10/04/2024

Jan Kleiner

Source: idnes.cz

Source: natoaktual.cz

Outline-ish

- Civil Defence.
- Czech Army – COVID-19; floods, strategic documents, legal framework.
- CIMIC.
- Militaries in (international) humanitarian relief.
- COVID-19 and militaries + positive, negative impacts.

Source: lowyinstitute

Warm-up

Discussion: What are unintentional threats?

Unintentional threats definitions

- 'A threat can be **foremost a natural phenomenon** defined in terms of physics etc., e.g., a **natural disaster**. We call such a threat unintentional' (Zeman et al., 2002, p. 55).
- (Buzan, Waever, De Wilde, 1998, pp. 156-157) - Unintentional threats also as:
 - accidental, one-time threats;
 - 'unavoidable, interlocking, inadvertent' threats due to security conflicts between or among states and their conflicting principles (e.g., definition of Estonia as a threat to Russian minority and Russia).

Where does
the military
stand in the
crisis
management
?

*(Alexander, 2002 as cited
in Coppola, 2011, p. 10)*

Winkler's (1997) equation of risk as cited in Zeman (2002, p. 63)

Civil Defence (Protection)

- (Carpet) bombing runs in WWI (zeppelins) and WWII.
- Focus on WMDs during the Cold War era.
- After the CW thought to be outdated...
...but terrorism, pandemics, climate crisis, rogue states and Russia said nope → increased demand for survival and resilience (Cronqvist, Farbøl and Sylvest, 2022).
- Shift: intentional threats only → incl. unintentional ones.

Internationally recognized symbol of the CD units; rooted in the IHL.

Czech Civil Defence (SH ČMS, n.d.)

- 1951-1993 (*civilní obrana*)
- 1993 - 'Civil Protection' (*civilní ochrana*)
- 2001 – moved from the DoD to DoI (zákon č. 239/2000 Sb. – Integrated Rescue System) – fire dept (*ochrana obyvatelstva*)
- From original 5 military rescue batalions only 2 companies (under the 15th engineer regiment).

army operational units		commanded by	
field army (2–5 corps)		★★★★★	general
corps (2–7 divisions)		★★★★	lieutenant general
division (2–3 brigades or regiments)		★★★	major general
brigade or regiment (3 battalions)		★	brigadier general or colonel
battalion (2–5 companies)			lieutenant colonel
company (2–4 platoons)			captain
platoon (3–4 squads)			lieutenant

Source: Encyclopaedia Britannica

15th Czech Army's Engineer Regiment

Source: AČR

- 3 battalions – 2 in Bechyně, 1 in Olomouc
- (non)combat engineer support for the Czech Army, suppressing enemy's activity, rescue activities, support of the IRS, humanitarian tasks

Sweden - 2018

- Total defence duty – all citizens aged between 16 and 70 can be mobilized for war efforts + huge effort goes civil protection → **MOOTWs (civil defence) and combat ops (military defence) are highly connected.**
- Focus on education and strategic communication towards citizens, citizens' preparedness + warn against false information → **(civil) defence is multidomain, multimodal and cumulative effort of the whole nation.**

<https://rib.msb.se/filer/pdf/28706.pdf>

Council of the Baltic Sea States (CBSS, n.d.)

- Denmark, Estonia, Finland, Germany, Iceland, Latvia, Lithuania, Norway, Poland and Sweden.
- One of the bodies – **Civil Protection Network**.
 - Civil protection and societal security.
 - Capacity building, knowledge and expertise exchange, and implementation of transnational project.
 - Priority: the UN's **Sendai Framework for Disaster Risk Reduction Implementation**.

Sendai Framework for Disaster Risk Reduction Implementation (United Nations, 2015)

- UN strategic document adopted at the Third UN World Conference in Sendai, Japan, in March 2015.
- Outlines specific **goals and priorities**, underscores the importance of **international cooperation**, the roles of various **stakeholders**, and the need for dedicated efforts towards **understanding disaster risk**, strengthening **disaster risk governance**, **investing** in disaster risk reduction, and enhancing disaster **preparedness**.
- **Synergies with other strategic UN documents:** The Paris Agreement on Climate Change, The Addis Ababa Action Agenda on Financing for Development, the New Urban Agenda, and the Sustainable Development Goals.
- Does not mention civil defence/protection specifically though.

Discussion: how does civil
defence/protection look
like in your country?

Are countries without
the CD irresponsible
towards their
citizens?

Case 1: Irish Civil Defence during COVID-19

2021 Civil Defence Response to Covid-19 Pandemic

From
1st January 2021
- **31st December 2021**

Civil Defence completed 4,148 COVID-19 related taskings while providing sustained support to communities throughout the country.

Support was also provided to the Irish Blood Transfusion Service.

A total of 4,148 individual taskings were undertaken in support to the Principal Response Agencies, and the Irish Blood Transfusion Service.

DURING
THIS 365 DAY
PERIOD:

A daily average of
23
Civil Defence
volunteers
provided a daily average of
114
volunteer hours.

A total of
41,721
volunteer hours
were provided by over
900 different Civil
Defence volunteers.

These volunteers
were supported by a
fleet of Civil Defence
Vehicles including:

54
FOUR WHEEL
DRIVE VEHICLES

13
VANS

27
AMBULANCES

10
MINIBUSES

An Roinn Cosanta
Department of Defence

Case 2: Czech Army during COVID-19 (AČR, 2021)

- Around **15,000** personnel deployed → the largest Czech military op.
- Over **13 ops** – border patrols deployment, IRS support, logistics (incl. 'Condor flights'), deployment in homes for the elderly, clever quarantine, Litovel area lockdown, mixed police-army patrols etc.

Czech Army floods mitigation efforts

- 2009 – aftermath liquidation with 8020 deployed personnel and 2047 vehicles.

Source: idnes.cz

Relevant Czech legal framework

- The Armed Forces Law (zákon č. 219/1999 Sb.)
 - Main task for the AF defined as the defence against external threats.
 - **Rescue and humanitarian international missions.**
 - AČR can be tasked with helping the police, with a **response to a natural disasters** and other serious events that can result in **significant public health risks** or property damage.
 - BTW - What do the Czech Armed Forces consist of?
- Marginal mention in the z. č. 240/2000 Sb. (430/2010 Sb.).

Relevant Czech strategic security documents

- Conception of Civil Protection until 2025 (up to 2030) – HZS ČR.
 - Does not mention Czech AF.
 - Previous version (...until 2020): AČR as a potential part of the rescue system and as liquidator (its role is regulated by a framework agreement between the DoD and DoI).
- Czech Army Doctrine 2004 - 'Support ops' - humanitarian relief to the citizens, civil administration and organizations.

Source: army.cz

Relevant Czech strategic security documents

- Long-term Prospect for Defence 2035 – emphasis also on civil support during states of crisis and support for the IRS (especially the engineer corps).
- The POKOS programme (and its conception 2014-2024).

Militaries
and
(international
)
humanitarian
relief

Source: cgdev.org

- Humanitarian assistance as identified as MOOTW (mil. ops other than war).
- Contribution to humanitarian supply chains and logistics – main roles:
 - security and protection;
 - distribution;
 - engineering. (Barber, 2012)
- Civil-military cooperation/coordination (103rd Centre CIMIC).

Source: CIMIC-COE

Source: válka.cz

Recognize this unit?

Source: seabeehf.org

United States Naval Construction Battalions

A military definition of logistics (Barber, 2012)

‘The **science** of planning and carrying out the movement and maintenance of forces... those aspects of military operations that deal with the design and development, acquisition, storage, movement, distribution, maintenance, evacuation and disposition of material; movement, evacuation, and hospitalization of personnel; acquisition of construction, maintenance, operation and disposition of facilities; and the acquisition of furnishing of services’ (p. 124).

- Rapid response (capabilities to distribute, shelter, sanitate, evacuate, construct, liquidate etc.) → main characteristic ‘capacity for preparedness’ (p. 128).
- Military logistics are mostly appreciated in the early stage of a crisis situation.
- 2005 Hurricane Katrina – large military supply convoys for New Orleans.

Source: czdefence

CIMIC in Humanitarian Relief

- Not so smooth – differences among various militaries.
 - Principles, doctrines, agendas, SOPs etc.).
- CIMIC humanitarian dimension not new - Napoleonic Wars, WWI/II (Marshall Plan), Berlin Airlift, Yugoslavia, Rwanda etc.
- conceptual confusion - the 'C' in CIMIC
 - 'Collaboration: working with others on a joint project.
 - Coordination: integrating diverse elements in an harmonious operation.
 - Cooperation: promoting assistance or awillingness to assist' (OED, 2000 as cited in Heaslip, 2012, p. 152).

(Too) many actors

Humanitarian Aid Supply Network (Kovács and Spens, 2008, p. 223 as cited in Heaslip, 2012, p. 151)

Challenges (Heaslip, 2012)

1. Coordination with other actors.
 - Parallel activities, and duplication avoidance, time-sensitive tasks, military sense of precedence etc.--> planning and negotiation.
 - → (non)UN cluster groups (e.g., Haiti earthquake aftermath):
 - Water, sanitation and hygiene – chaired by UNICEF.
 - Health cluster – chaired by WHO etc.
2. Culture – military and civilian especially.
3. Resource and capability gap – how to get relief resources to the disaster area?
 - Elements of uncertainty and randomness of disasters.
 - UNJLC – UN Joint Logistics Centre – logistics information services.

1. Financial and human resources.
 - Focus often on short-term funding.
 - Donors negligent towards strengthening organizational capacity and capability.
 - → available aid, no one to deliver.
2. Infrastructure degradation.
3. Comms (e.g., incompatible radios).
4. Personality
 - Success of collaboration depends on the field-level personnel rather than SOPs
 - high rate of staff turnover, differences in cultures and chain of command, comms breakdown, absence of communication procedures, refusal of military aid due to independence and impartiality, threat of use of force by military.

Source: L3Harris

**COVID-19 and militaries + how
did the pandemic impact the
armed forces?**

Intro
(Michaud et al., 2019;
Kleiner, 2022)

- Wartime rhetoric (Macron, Trump, Babiš etc.) → massive deployment of militaries.
- WMDs protection units, research facilities etc.
- Usually medical assets deployed after a disaster.
- Need to separate infected and uninfected can be a challenge → need of close communication with local authorities – can be also challenging (CIMIC).
- Military is driven by defence and security objectives – can be problematic in global health issues.

Ramification S

- Austerity cuts – defence ministries often come first (Zandee et al., 2020).
 - Why are ad hoc defence budgetary cuts harmful for the military (see Kufčák, 2015)?
- Regular military activities harder or impossible to perform (Kalkman, 2020).
- Mental toll on deployed personnel (Gupta et al., 2020; Lázaro-Pérez et al., 2020).
- Personal toll (families – children).
- Enforcement of public-restraintment measures.

Positive impacts (Kleiner, 2022)

- Public opinion – PR campaigns (e.g., British – see Kennard and Glenton, 2020).
- Also after floods – public support of 33% (1997) → 74% (2019) (STEM, 2021).
- Kalkman (2020) – the worth of taxpayers' money.

Wrap-up

- Civil Defence (Protection) units still operational
- Military as an actor in all phases of the Crisis management cycle.
- Military as a capable fast-responder (mainly logistics, but also combat engineers, scientists etc.).
- Military has its own interests (dealing with ramifications of a crisis, PR campaigns, defence and security).
- The importance of CIMIC (among other things mitigating ramifications of the military-civil cooperation during humanitarian relief efforts).
