

Available reading materials – library books and papers

There's a LOT of literature available to you here, even without searching for more yourself (which of course you can do). Of course, you do not *have* to read more than the book chapters I have put on the web site. Everything else is there so that those of you who develop a particular interest or want to know more about one particular thing can do so more easily. You'll see I've included a number of references to people's relationships to animals, which is an area we have not had time to go into but which you might still find interesting.

If you look up any of these references and cannot find them either in the library catalogue or as PDF copies (papers or selected chapters) on the course web site, they are either on order and still to arrive or exist as paper copies in the yellow folder in office 3.14 – ask Dr Johanisova or Ivona Tolarová when you want to borrow them (please return them after you have read them).

Books are in larger type size; the three in bold are the critical set texts and you should definitely look at them.

Aldridge, J. and J. Sempik (2002). *Social and Therapeutic Horticulture: evidence and messages from research*. Loughborough, Centre for Child and Family Research, Loughborough University: 4.
